A NEW DAY

January 29, 2024

TO: Dustin Freeman
Chief of Procurement

THRU: Nina Sickler, P.E.
Director of Public Works

FROM: Steven D. Long, Jr. P. E.,
Director of Operations

SUBJECT: Amendment 2 Contract 70252-23/ PO# 655051-23 CDB-0177-22
Perry McCall Construction Inc
Construction Manager at Risk Services for Medical Examiner's Office

---

In accordance with Design/Build CDB-0177-22, Contract 70252-23 for the Medical Examiner's Office was awarded in the amount of $73,471.65 for preconstruction services. Amendment 1 in the amount of $72,826,963.00, is for the 100% Construction Management at Risk (CMAR) Services. Amendment 2 is for additional scope and design plan changes. Negotiations have resulted in the attached Scope of Work and Fee summary as detailed in Exhibit C, in the amount of $1,007,423.93. In addition, the award stated that the contingency was in the amount of $2,913,078.52. The correct contingency should have been stated as $2,396,711.00. Perry McCall Construction, Inc. is committed to meeting the 25% JSEB participation goals established for this contract.

Accordingly, this is to recommend that Contract 70752-23, originally executed on June 30, 2023, between the City and Perry McCall Construction, Inc. for Construction Manager at Risk Services for the Medical Examiner's Office be amended to incorporate the Attached Fee Summary, Exhibit C to increase the GMP by $1,007,423.93 to a new GMP amount of $73,907,858.58.

Funding is as follows:

Attachment: Exhibit C

NBR	MASTER ITEM DESCRIPTION	QUANTITY	UOM	UNIT COST	NET ADDITION	NET DELETION	NET TOTALS
	ADDITONAL SCOPE						
1	Generator Credit	1.00	LS	$ (3,636.00)	$ -	($3,636.00)	($3,636.00)
	JUSTIFICATION: Per Public Buildings request the (2) Cummins C32 generators and being changed to (2) C32 Ring Power Caterpillar generators and the bio-fuel requirement for the generators is beign removed from the scope.						
2	Amendment 1 Drawing Changes and Permit Comments	1.00	LS	$ 1,000,090.44	$ 1,000,090.44	$ -	$1,000,090.44
	JUSTIFICATION: Additional scope and scope changes from the Amendment 1 plans dated 6/29/2023 and Permit Comments dated 5/12/2023 and 8/15/2023. Scope includes landscaping and irrigation changes, autopsy chases and drywall reveals, wall tile at Toilet Room 1055, power changes including SPDs, Starline busway, UPS and one-line revisions for $682,574, generator level D impact rating, 1000 gallon belly tanks, EV charger and security changes						
3	Fiber, Roof Drains, Footing	1.00	LS	$ 40,228.91	$ 40,228.91	$ -	$40,228.91
	JUSTIFICATION: These were generated from the responses to RFIs 070, 082, 120, 127, 136, 144 and Submittal 275313-01. Scope of work changes/additions include using 24F SM fiber in lieu of 18F SM fiber, changes to the overflow roof drains at the canopy, modified footing at the existing storm pipe at the screen wall, removal of existing and concealed structures, utilities and foundations and for providing Primex clocks in lieu of Inova.						
4	Records Room Preaction System	1.00	LS	$ 39,401.81	$ 39,401.81	$ -	$39,401.81
	JUSTIFICATION: This cost is to extend the 1st floor IT Room 1063 & 1113 preaction fire sprinkler system to the 2nd floor Records Room 2003 in lieu of the wet system currently in the design.						
5	JEA Electrical Manhole	1	LS	$ 20,344.66	$ 20,344.66	$ -	$20,344.66
	JUSTIFICATION: Installation of the JEA electrical manhole furnished by JEA. This manhole was not on the contract documents. It was brought up during a site meeting with JEA.						
6	Raised Access Flooring at Gallery	1	LS	$ (6,800.00)	$ -	$ (6,799.00)	($6,799.00)
	JUSTIFICATION:RFI-155 changed the Gallery and associated ramp and stairs to a rasied access floor system.						
7	Site Telecom Conduits	1	LS	$ 19,029.37	$ 19,029.37	$ -	$ 19,029.37
	JUSTIFICATION: Additional site conduit per mark up to drawings sheet G100. Included is switching from Sch-80 to Sch-40, additional handholes and new North bound and East bount conduits with pull strings.						
8	Testing Credit	1	LS	$ (125,638.00)	$ -	$ (125,637.00)	($125,637.00)
	JUSTIFICATION: Crfedit back for testing that will be provided by the CEI.						
9	Tree Mitigation	1	LS	$ 110,319.25	$ 110,320.25	$ -	$110,320.25
	JUSTIFICATION: Reconciling the Tree Mitigation Allowance to include the revised calculations per Sheet L1.02 issed in RFIs 142, 150 & 165.						
10	Delete Gasifier Allowance	1	LS	$ (300,000.00)	$ -	$ (299,999.00)	($299,999.00)

JUSTIFICATION: Delete the LP Gasifier allowance indicated on sheet M010 per RFI 017 response.

11	Mopec Cooler & Autopsy	1 LS	$ 214,079.49	$ 214,079.49		$214,079.49

JUSTIFICATION: Changes to the Mopec cooler to meet the clarified design parameters per RFI 105 and 105.1 responses. Responses included revised Mopec equipment types and quantities.

Date: 11/06/2023
Job: 23-002--Medical Examiners Office

Description: Ring Power Generator & Bi-Fuel Deduct

We are pleased to offer the following:

Add to provide, per owner request, (2) C32 Ring Power Caterpillar Generators in lieu of the specified Cummins C32 Generators. Deduct being provided to remove the bi-fuel requirement for the generators as approved by the owner and engineer of record. See attached pricing backup included for review.

The total amount to provide this work is.....$-3,636.00

(Please refer to attached sheet for details.)

THIS CHANGE INDIVIDUALLY MAY OR MAY NOT EFFECT THE COMPLETION DATE AND MAY OR MAY NOT COST ADDITIONAL JOBSITE AND HOME OFFICE OVERHEAD/EXTENDED GENERAL CONDITIONS. CUMULATIVE CHANGES TEND TO EFFECT COMPLETION DATES AND OVERHEAD COSTS WHICH CAN NOT BE DETERMINED ON AN INDIVIDUAL BASIS. THEREFORE, WE CAN NOT DETERMINE THE IMPACT OF THIS PROPOSAL AT THIS TIME. BE AWARE THAT CUMULATIVE CHANGES WILL BE ANALYZED LATER WHEN IT BECOMES APPARENT THEY ARE/OR HAVE EFFECTED THE SCHEDULED & COST. THERESORE, WE RESERVE THE RIGHT FOR COMPENSATION OF ADDITIONAL CONTRACT TIME EXTENSION AND EXTENDED FIELD/HOME OFFICE OVERHEAD GENERAL CONDITIONS COST.

THIS PROPOSAL MAY BE WITHDRAWN IF NOT ACCEPTED WITHIN SEVEN (7) DAYS OF THE DATE OF THIS CHANGE REQUEST.

LEAD TIMES:
Ring Power currently has Two (2) C32 1250 KVA generators on order and due to Ring Power July 2023, all stock generators are subject to prior sale without notice.
The Current Generator lead time form date of order from the factory is currently 53-54 weeks.
Stand Alone tank has a current lead time of 65-67 Weeks.
The Custom Enclosure and Sub-Base Fuel Tank is currently 65-67 Weeks from release.
The Transfer switch's is currently 52-53 Weeks from release.
(All lead times are current as of the day of this proposal and are subject to change without notice)

NOTE:

1. **NO FUEL IS INCLUDED.**
2. **NO ELECTRICAL OR MECHANICAL INSTALLATION IS INCLUDED.**
3. **FREIGHT TO THE JOBSITE IS INCLUDED. OFFLOADING IS NOT INCLUDED.**
4. **THE ABOVE PROPOSAL IS BASED ON A NON-STOCK GENERATOR.**
5. **SPECIFICATIONS WERE PROVIDED FOR THIS PROPOSAL.**
6. **CURRENT PRODUCT LEAD TIME IS NOTED ABOVE IN WEEKS BUT IS SUBJECT TO CHANGE ACCORDING TO FACTORY AVAILABILITY.**
7. **Cancellation Fee: If, at any time, after release for production, Buyer repudiates, cancels or otherwise terminates this Order, Ring Power Corporation shall without waiving any rights or remedies allowed by law, collect from Buyer, and Buyer shall remit to Ring Power Corporation within 10 business days of repudiation, cancellation or termination, an amount equal to 25% of the total Purchase Price of this Order.**
8. **Under no circumstances does Ring Power accept any flow down provisions without specific written agreement between Ring Power and Buyer".**
9. **"The Seller shall not be responsible for any failure to perform, or delay in performance of, its obligations resulting from the COVID-19 pandemic or any future epidemic, and Buyer shall not be entitled to any damages resulting thereof."**
10. **"The Seller has provided product lead times based upon the information provided to Seller from its suppliers at the time of quotation. The Buyer accepts that lead times for products can change without notice and due to reasons, that are beyond any control of the Seller. As such, the Seller shall not be responsible for any failure to perform, or delay in performance of, its obligations resulting from lead times that extend past those originally quoted, and Buyer shall not be entitled to any damages resulting thereof."**
11. **Electrical coordination study will be provided by others.**
12. **Ring power will only start-up equipment that is provided by Ring Power.**
13. **Ring Power will provide the above only after a successful submittal process.**
14. **NO THIRD-PARTY TESTING IS PROVIDED UNLESS CALLED OUT IN THE QUOTE**

Exceptions: 26 3213.13 Written spec was reviewed.
3.4 FIELD QUALITY CONTROL J 1 and 2
Infrared Scanning: This is to be performed by others.
Natural Gas Blend not to exceed 50% in lieu if 70%
Exception to over current protection requirement written in specification 2.7 B.1
Notes ({E} - Exception, {D} - Deviation, {C} - Clarification)
{C} Enclosure is designed and constructed to meet the requirements of an on-site UL2200 field evaluation (by others). The combination of this enclosure and UL listed. stationary engine generator assembly will require additional evaluation and/or testing. per UL2200.
{E} 3.10.A.1- Enclosure panels are not removable without tools
{E} 3.10- Fire protection system provided by others.

Nothing other than what is on this quote will be provided.

Quote value does not include any tax.

NOTES:

- Current Submittal Lead Time: 4 weeks
- Current Production Lead Time (*after receipt of approved submittal and accepted PO*):
  - Transfer Switch(es): 65 weeks
  - Generator: 65 weeks
- Proposal based upon supplied **xxxx** documents dated **xx/xx/xxxx** only.
- Price quoted is F.O.B. factory with freight allowed to the first U.S. destination.
- Price does not include any applicable taxes unless listed above.
- All ship loose items installed by others.
- Unloading, installation, and fuel are not included and will be the responsibility of others.
- **Indoor Generator:**
  - All exhaust and fuel piping provided by others. All calculations for determining of sizing of exhaust and fuel piping sizes provided by others.
  - Providing **xx** grade muffler and stainless-steel flex connector(s) only. All other piping, accessories and installation are provided by others.
- **Natural Gas or LP Gas Generator:**
  - Main gas regulator, flex piping and stepdown regulator provided by others. Installation of main gas regulator not done by Cummins Personnel
  - Gas Pressure – For generators between 20kW-200kW 6-14 inches H2O to engine, for generators 250kW - 750kW 15-20 inches H2O to engine– Main gas supply should be 5 PSI+ feeding a step-down regulator located as close to the engine as possible. Line should be dedicated to the generator.
- **Warranty:**Cummins **x**-year warranty begins at the successful completion of startup and testing in lieu of acceptance or substantial completion.
- **Startup & Training:**
  - Providing Cummins standard startup and the specific testing listed above only. All other testing including NETA testing is provided by others.
  - Our proposal includes **xx** trips during normal business hours to complete the onsite services listed above. If additional trips or after-hours trips are required, additional cost will be incurred.
  - Training for maintenance personnel will be concurrent at time of startup unless otherwise noted.
  - No videotaping is included with this quotation. All taping is supplied by others.
- **PMA:**Generator Maintenance Agreement is not included and will be negotiated directly with the owner once equipment has been successfully started up and tested.

TOTAL: $ 1,283,272.94 3

Quote value does not include any tax.

NOTES:

1) Proposed units are offered for use in a Standby application which carries a rating of 1563 KVA. This unit also has a "Prime Rating" of 1420KVA, which exceeds the spec requirements for a service load of 1250KVA. This application would be defined as "standby"; in that, the units are designed to run in the event of a loss of utility. The units are offered with additional capacity, above the load requirements, if the engineer is wanting to build in additional longevity.

Cummins can offer larger units rated for 1500KW- 1873 KVA Standby- 1705KVA Prime for an addition $66,000 total.

2) The Bi-fuel system would need to be purchased directly from the supplier by either the owner or contractor for installation in the field. Due to the resulting effects to the engine emissions, Cummins cannot install this equipment and maintain our factory EPA Emissions certification. Customer should also investigate the requirements for initial on-site testing for emissions certifications and any ongoing compliance testing in the future.

   The cost estimate for the initial equipment installation, purchased by owner directly from Coastline Power Solutions.....**$95,000 per unit.**

3) Optional deduct to remove the 4000 Gal Stand Alone tanks from the scope.....$116,000. Total for 2
4) Cummins will be offering Square D breakers in lieu of ABB.

- Current Submittal Lead Time: 4-6 weeks
- Current Production Lead Time (*after receipt of approved submittal and accepted PO*):
  - Transfer Switch(es): 34 weeks
  - Generator: 72 weeks
- Proposal based upon supplied **xxxx** documents dated **xx/xx/xxxx** only.
- Price quoted is F.O.B. factory with freight allowed to the first U.S. destination.

Regency Add. Bi-Fuel Item 1

21. Regency has included (2) security camera poles to be installed during construction. The cameras are to be provided for installation.

22. Cisco & Computer Equipment scope E704 desktop #87, #88, #89 and #90 are not included in our base number.

V. Alternates ADDs

1. Generator Bi-Fuel Upgrade 4 $235,939.

Regency Electric appreciates the opportunity to provide this pricing and looks forward to working with you on this project. If further clarification is required, please do not hesitate to call, Thomas Smith 904-485-4046

Item Description	Color	Qty	UOM	Unit Price	Extended Price
Amendment 1 Additional Pricing -Supply and install T-14 wall tile in TLT 1055 room -Setting materials, grout and freight included.		1.00	Lot	$1,035.00	$1,035.00
				Base Bid Total:	**$1,035.00**

Proposal Inclusions and Exclusions:

1. Extensive floor prep is not included in the price but may be necessary due to unforeseen conditions of the sub-floor. This work may include, but is not limited to, leveling or grinding, encapsulation or sealing, or extensive scraping of the sub-floor. Should extensive floor prep be required, you will be notified and a price estimate for the completion of the additional work will be prepared.
2. Moisture mitigation is NOT included. Spectra Flooring is NOT responsible for conditions detrimental to resilient, carpet, and/or ceramic installations. **All new trenches being covered with moisture sensitive materials such as VCT, LVT, or carpet tiles must be moisture mitigated to control moisture emission. This can be performed at an additional cost if required. To help control costs please contact Spectra prior to pour backs. NOTE: ALL TRENCH POUR BACKS TO BE LEFT 1/16" LOW.
3. NO FULL TIME SUPERVISION INCLUDED. LEAD FOREMAN FOR EACH TRADE WILL BE THE COMPETENT PERSON IN CHARGE REPRESENTING SPECTRA CONTRACT FLOORING.
4. All pricing is based on work being completed during normal working hours. After hours work will incur additional cost.
5. No caulking of ANY kind included in pricing.
6. No wash, wax, final clean, or floor protection included in pricing.
7. Price includes work as specifically stated in the above description for the quantities stated. Any circumstances that require additional labor will be handled through the change order process.
8. Attic stock not included in pricing

We PROPOSE to perform the work complete in accordance with the specifications and as described above for the SUM of:

Signature: _____ **Shane Biery** **$1,035.00**

Email: shane.biery@spectracf.com

Conditions of Proposal:

1. This Proposal may be withdrawn, if not accepted, within 30 days of its issuance. Spectra will consider reasonable requests to engage in negotiations for revisions to this Proposal, including signing a subcontract that includes the terms of this Proposal. A proposal not accepted within 30 days will be subject to price escalation of materials, labor, freight and fuel costs.
2. This proposal is subject to credit review and approval. Payment terms are net 30 days. A convenience fee of 2% will be added if paying via credit card. Past due invoices are subject to service charges of 1.5% per month (18% per annum). In the case of any default, Customer shall pay Spectra's reasonable attorney fees and costs, including those on any appeal, even if no suit or action is filed.
3. All work shall be performed in a workmanlike manner according to industry standards. Areas to receive flooring shall be free and clear of debris. Any changes to the work shall be performed only after execution of a written change order.
4. Prior to commencement of Spectra's work: (a) Customer shall test all concrete sub floors receiving flooring for vapor emission levels and alkalinity per manufacturers' recommendations utilizing ASTM F2170 and provide written results to Spectra, including a list of any sealers applied to the concrete sub floor; (b) If Customer does not provide such reports at least 10 days prior to commencement of Spectra's work, then Customer shall provide Spectra with access to all concrete sub floors for appropriate testing and Customer shall be responsible for the costs of such testing; and (c) Any concrete sub floors not meeting manufacturers' requirements for installation will require correction or the execution of a separate waiver agreement.
5. All work is contingent upon strikes, accidents or delays beyond Spectra's control. Customer shall carry insurance for all hazards, including fire. Spectra's workers are fully covered by Worker's Compensation and Liability Insurance.
6. Customer represents and warrants that: (a) the project site contains no hazardous or other dangerous substances, either exposed or concealed; or (b) Customer has given written notice to Spectra of all such substances and their location(s). To the fullest extent permitted by law, Customer shall indemnify, defend and hold Spectra harmless from any damage, claim, loss, expense and attorney fees related to Spectra's liability, if any, including any federal or state statute related to hazardous or other dangerous substances.
7. Spectra is fully licensed, bonded, and insured. This proposal does not include participation in any OCIP/CCIP or related programs. Requests for Spectra to participate in such programs may result in additional costs.
8. Notwithstanding anything herein to the contrary, all prices are subject to immediate increase without limitation in the event of material change to applicable duties, taxes, tariffs, similar charges, or other government action.

ACCEPTANCE OF PROPOSAL: The above prices, specifications, and conditions are satisfactory and are hereby ACCEPTED. You are authorized to do the work as specified.

Medical Examiner's Office District IV

Subject: REC-9 Amendment #1 Drawings dated 6/28/2023 - (revised 8/23/2023)

Mr. LeBlanc

Per your recent request, Regency Electric Company is pleased to quote the additional work associated with the referenced changes. Our proposed scope of work is as follows:

1. **Page E010 – Site Page**
   a. (2) New Chiller yard controller circuits with external SPDs have been added. The controllers are to be supplied and installed by others. The breakers have been updated.
   b. Chiller controller low voltage conduit has been included with WP boxes. Low voltage cabling by others.
   c. (1) A new emergency water pump circuit with exterior SPD has been added to the project. No low voltage conduit has been included and the controller will be supplied and installed by others. The breaker has been included.

2. **Page E300 – First Floor Power**
   a. (2) New Elevator pit weatherproof GFI receptacles with new 120v circuits being fed from E-room 1066 panel LC1 circuits #61 and 63 have been included.

3. **Page E301 – First Floor Power**
   a. AHU-4 has (2) 100amp circuits with disconnects that have been deleted and credited to this change order. Rough material in the amount of $5,028.99 plus labor and disconnects have been credited.
   b. AHU-4 currently reflects a single 15amp 3p 480v circuit with disconnect in lieu of the 2x 100amp circuits. Breakers have been updated.
   c. (1) 120v 20amp receptacle circuit with SO plug cord for equipment connection has been included per keynote #5.

4. **Page E304 – Second Floor Power**
   a. AHU-1, 2, 3, 5, 6, and OA-1 supplied VFDs and 100amp 480v circuits have been deleted. The Rough material in the amount of $4,687.51 plus labor has been credited.
   b. AHU-1, 2, 3, 5, 6, and OA-1 each currently reflects a single 480v circuit with (1) disconnect each in lieu of the 100amp circuits. The breakers have been updated.
   c. (6) 120v 20amp receptacle circuits with SO plug cord for equipment connections have been included per keynote #5.

CR-02

Item 2

5. **Page E329 Data Room #2025 - Starline Busway**

   a. Regency deleted (18) 30amp T-lock receptacles and circuits which were fed from panels ULA3, & ULB3. The Rough material in the amount of $1,581.31 plus labor has been credited.
   b. (4) 100amp T3 4P white Busways 10-foot in length with (4) End fed 100amp meters & displays have been included. End caps, joint kits, and cords have been included as white.
   c. Conduit for these circuits has been included as white.
   d. Final Feed/meter/plug orientations TBD.
   e. Identification labeling and grounding has been included.
   f. System startup has been included.

6. **E500 – One-line Electrical Riser**

   a. Data room #2025 will have (2) new 100kva Schneider Static Uninterrupted Power Supply systems. UPS-C & D which have been included with (2) maintenance bypass panels with RSKU unit, dry-transformer, and remote batteries as shown.
   b. UPS-A & B have been updated to include (2) maintenance bypass panels with 3-breakers.
   c. The UPS battery location is assumed to be in the mechanical room across the corridor. Our conduit and cabling has been included as a 100' allowance per UPS system.
   d. The conduit inside Data room #2025 which feeds UPS-C & D has been included as white.
   e. ULA3 & ULB3 mini power centers have been replaced with (2) 400amp white panels which will now feed the Starline Busways.

7. **E600 - 100kva UPS Bypass, EPO Relay System**

   a. EPO Relay cabinet 12" x 12: x 6" deep with hinged cover box with RED plastic nameplate, letters stating "EPO TEST/RESET SYSTEM".
   b. EPO Green Indicator light - Square D class 9001 type KPIR31 with GREEN pilot light labeled "EPO SYSTEM IN BYPASS".
   c. EPO Red indicator light - Square D class 9001 type KPIR31 with RED pilot light labeled "EPO SYSTEM ACTIVATED".
   d. EPO Reset pushbutton - Square D class 9001 type KPIR31 with RED labeled "EPO SYSTEM RESET".
   e. Emergency power off relay - Square D class 8501 type XO-40-XL-VO2 with 120v coils.
   f. Emergency Power Off pushbutton; red with a clear protective hinged cover. Red labeling "EMERGENCY POWER OFF".
   g. A normally closed 2-pole key switch labeled "EPO BYPASS".
   h. ½" Conduit has been included as white in color with #12 THHN copper.
   i. Battery cabling has been included at 110-foot each with (2) sets of 2-inch white EMT conduit with (2) #250 MCM welding cables for the new two 100kva UPS system.

Item 2

8. **E704 Equipment List per Presidio**

   a. Regency has **EXCLUDED** the equipment page E704 update per amendment #1 sent by the owners preferred subcontractor Presidio for line items #42, #43, and #44 which totals **$388,821.76**,

General Notes

1. Updated circuits and feeders in Data room #2025 have been included as white in color this room only. Circuits and feeders that have not changed have not currently been updated in white. Regency will submit an ALL-WHITE Data room change order after receiving written direction.
2. The panel schedule breakers have been updated per the drawings dated 6/28/2023. Breakers that have been added to devices not shown on the E-Drawings are included in this change order but if circuits have been added and not shown on the E-Drawings currently, there will be in additional cost to include the circuits if Regency is unaware of their final locations.
3. The AV pages show clouded areas which have remained since REC-1 dated 5/12/2023. No updates have been included for the AV system currently.
4. No low voltage system changes have been found or included per the E-drawings dated 6/28/2023, this includes but is not limited to the Fire-Alarm system, Access controls, video surveillance system, and Structured Cabling.
5. UPS load bank testing has been included.
6. 10-Day UPS testing period has been included per 4.7b (40 days total).
7. UPS Battery management has been included per Schneider.
8. Leak detection for the batteries has not been included as it is not shown or specified to be included currently.
9. Identification labeling and grounding has been included.

j. Ups System startup has been included.

k. The disconnects cannot be provided in white.

l. POE fixtures and controls have had no changes included per amendment #1.

m. Credits for Changes have been included in our base number in the amount of ($23,037.08) for deleted rough material and labor.

Should we be given written directions to proceed, Perry McCall's additional cost will be Six Hundred Eight-Two Thousand Five Hundred Seventy-Four Dollars and Zero-cents. $682,574.00

These prices are valid for fourteen (14) days from the date of this change order proposal.

Should you have any questions, please feel free to call.
Sincerely,

REGENCY ELECTRIC COMPANY, INC.

Thomas D. Smith,
Thomas D. Smith
Senior Estimator

Item 2

Proposal

We Appreciate Your Request and Take Pleasure in Responding As Follows

GRAYBAR ELECTRIC COMPANY, INC.
TERMS AND CONDITIONS OF SALE

1. ACCEPTANCE OF ORDER; TERMINATION - Acceptance of any order is subject to credit approval and acceptance of order by Graybar Electric Company, Inc. ("Graybar") and, when applicable, Graybar's suppliers. If credit of the buyer of the goods or services ("Buyer") becomes unsatisfactory to Graybar, Graybar reserves the right to terminate upon notice to Buyer and without liability to Graybar.
2. PRICES AND SHIPMENTS - Unless otherwise quoted, prices for goods shall be those in effect at time of shipment, which shall be made F.O.B. shipping point, prepaid and bill. Unless otherwise indicated in the applicable quotation or statement of work, prices for services shall be those in effect at the time of completion. The contract price for goods and or services shall be increased by the amount of any applicable tariff, excise, fee, assessment, levy, charge or duty of any kind whatsoever, imposed, assessed or collected by any governmental body, whether or not reflected in the costs charged to Graybar, and Graybar may increase its cost for goods and or services appropriately to take into account such increases in Graybar's costs.
3. RETURN OF GOODS - Credit may be allowed for goods returned with prior approval. A deduction may be made from credits issued to cover cost of handling. Returns will not be accepted for services or any material which has been modified at the request of or by Buyer. In addition, no custom orders may be returned.
4. TAXES - Prices shown do not include sales or other taxes imposed on the sale of goods or services. Taxes now or hereafter imposed upon sales, shipments or services will be added to the purchase price. Buyer agrees to reimburse Graybar for any such tax or provide Graybar with acceptable tax exemption certificate.
5. DELAY IN DELIVERY - Graybar is not to be accountable for delays in delivery of goods or services occasioned by acts of God, failure of its suppliers to ship or deliver on time, or other circumstances beyond Graybar's reasonable control, including but not limited to, sourcing, shipment or delivery issues caused by, related to or resulting from COVID-19 or other similar national or global health situations. Factory shipment or delivery dates are best estimates, and in no case shall Graybar be liable for any consequential or special damages arising from any delay in provision of services, shipment or delivery.
6. LIMITED WARRANTIES - Graybar warrants that all goods sold are free of any security interest and will make available to Buyer all transferable warranties (including without limitation warranties with respect to intellectual property infringement) made to Graybar by the manufacturer of the goods. Buyer acknowledges that the performance of any service which alters the manufacturer provided goods as indicated in the statement of work may void the manufacturer's warranty. Graybar shall use the same care and skill a similarly situated provider of like services would exercise following commonly accepted industry practices in the performance of its duties under this agreement. GRAYBAR MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES, AND SPECIFICALLY DISCLAIMS ALL IMPLIED WARRANTIES INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PURPOSE. UNLESS OTHERWISE AGREED IN WRITING BY AN AUTHORIZED REPRESENTATIVE OF GRAYBAR, PRODUCTS SOLD HEREUNDER ARE NOT INTENDED FOR USE IN OR IN CONNECTION WITH (1) ANY SAFETY APPLICATION OR THE CONTAINMENT AREA OF A NUCLEAR FACILITY, OR (2) IN A HEALTHCARE APPLICATION, WHERE THE GOODS HAVE POTENTIAL FOR DIRECT PATIENT CONTACT OR WHERE A SIX (6) FOOT CLEARANCE FROM A PATIENT CANNOT BE MAINTAINED AT ALL TIMES.
7. LIMITATION OF LIABILITY - Buyer's remedies under this agreement are subject to any limitations contained in manufacturer's terms and conditions to Graybar, a copy of which will be furnished upon written request. Furthermore, Graybar's liability shall be limited to either repair or replacement of the goods, re-performance of the services, or refund of the purchase price, all at Graybar's option, and IN NO CASE SHALL GRAYBAR BE LIABLE FOR INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES. In addition, claims for shortages, other than loss in transit, must be made in writing not more than five (5) days after receipt of shipment. Unless otherwise agreed in the applicable statement of work, acceptance of services will occur not more than five (5) days after completion of performance.
8. WAIVER - The failure of Graybar to insist upon the performance of any of the terms or conditions of this agreement or to exercise any right hereunder shall not be deemed to be a waiver of such terms, conditions, or rights in the future, nor shall it be deemed to be a waiver of any other term, condition, or right under this agreement.
9. MODIFICATION OF TERMS AND CONDITIONS - These terms and conditions, and any associated statement of work, supersede all other communications, negotiations, and prior oral or written statements regarding the subject matter of these terms and conditions. No change, modification, rescission, discharge, abandonment, or waiver of these terms and conditions shall be binding upon Graybar unless made in writing and signed on its behalf by a duly authorized representative of Graybar. No conditions, usage of trade, course of dealing or performance, understanding or agreement, purporting to modify, vary, explain, or supplement these terms and conditions shall be binding unless hereafter made in writing and signed by the party to be bound. Any proposed modifications or additional terms are specifically rejected and deemed a material alteration hereof. If this document shall be deemed an acceptance of a prior offer by Buyer, such acceptance is expressly conditional upon Buyer's assent to any additional or different terms set forth herein.
10. REELS - When Graybar ships returnable reels, a reel deposit may be included in the invoice. The Buyer should contact the nearest Graybar service location to return reels.
11. CERTIFICATION - Graybar hereby certifies that these goods were produced in compliance with all applicable requirements of Sections 6, 7, and 12 of the Fair Labor Standards Act, as amended, and of regulations and orders of the United States Department of Labor issued under Section 14 thereof. This agreement is subject to Executive Order 11246, as amended, the Rehabilitation Act of 1973, as amended, the Vietnam Veterans' Readjustment Assistance Act of 1974, as amended, E.O. 13496, 29 CFR Part 471, Appendix A to Subpart A, and the corresponding regulations, to the extent required by law. 41 CFR 60-1.4, 60-741.5, and 60-250.5 are incorporated herein by reference, to the extent legally required.
12. FOREIGN CORRUPT PRACTICES ACT - Buyer shall comply with applicable laws and regulations relating to anti-corruption, including, without limitation, (i) the United States Foreign Corrupt Practices Act (FCPA) (15 U.S.C. §§78dd-1, et. seq.) irrespective of the place of performance, and (ii) laws and regulations implementing the Organization for Economic Cooperation and Development's Convention on Combating Bribery of Foreign Public Officials in International Business Transactions, the U.N. Convention Against Corruption, and the Inter-American Convention Against Corruption in Buyer's country or any country where performance of this agreement or delivery of goods will occur.
13. ASSIGNMENT - Buyer shall not assign its rights or delegate its duties hereunder or any interest herein without the prior written consent of Graybar, and any such assignment, without such consent, shall be void.
14. GENERAL PROVISIONS - All typographical or clerical errors made by Graybar in any quotation, acknowledgment or publication are subject to correction. This agreement shall be governed by the laws of the State of Missouri applicable to contracts to be formed and fully performed within the State of Missouri, without giving effect to the choice or conflicts of law provisions thereof. All suits arising from or concerning this agreement shall be filed in the Circuit Court or St. Louis County, Missouri, or the United States District Court for the Eastern District of Missouri, and no other place unless otherwise determined in Graybar's sole discretion. Buyer hereby irrevocably consents to the jurisdiction of such court or courts and agrees to appear in any such action upon written notice thereof.
15. PAYMENT TERMS - Payment terms shall be as stated on Graybar's invoice or as otherwise mutually agreed. As a condition of the sales agreement, a monthly service charge of the lesser of 1-1/2% or the maximum permitted by law may be added to all accounts not paid by net due date. Visa, MasterCard, American Express, and Discover credit cards are accepted at point of purchase only.
16. EXPORTING - Buyer acknowledges that this order and the performance thereof are subject to compliance with any and all applicable United States laws, regulations, or orders. Buyer agrees to comply with all such laws, regulations, and orders, including, if applicable, all requirements of the International Traffic in Arms Regulations and/or the Export Administration Act, as may be amended. Buyer further agrees that if the export laws are applicable, it will not disclose or re-export any technical data received under this order to any countries for which the United States government requires an export license or other supporting documentation at the time of export or transfer, unless Buyer has obtained prior written authorization from the United States Office of Export Control or other authority responsible for such matters.
17. CANCELLATION; CHANGES FOR SERVICES- Buyer may cancel or make changes to a statement of work up to five (5) business days prior to commencement of the work. All changes and cancellations after such date are subject to Graybar's prior written approval in Graybar's sole and absolute discretion. Buyer shall pay to Graybar amounts necessary to cover cancellation, restocking fees and other charges applicable to the cancelled goods or services including those incurred or committed to by Graybar.

Signed:_____

This equipment and associated installation charges may be financed for a low monthly payment through Graybar Financial Services (subject to credit approval). For more information call 1-800-241-7408 to speak with a leasing specialist.

Prices are subject to change at any time prior to shipment unless agreed to otherwise in writing signed by an authorized Seller representative. Orders related to this quotation must be received, accepted and released by Seller within 48 hours of issuance of the quotation and are subject to availability. Many of Seller's manufacturing partners have advised that until further notice they reserve the right to amend the delivery date, price, scope and quantity of supply and/or other terms and conditions set out in their offer or quotation and Seller equally reserves the right to pass through any such changes from its manufacturing partners to the Buyer. Delivery dates are estimated only. Seller shall not be liable for failure to meet such dates resulting from product shortages or manufacturing delays. Be advised that Seller considers any changes imposed by its manufacturing partners and other vendors outside of Seller's reasonable control and therefore subject to Force Majeure provisions or similar common law doctrines such as "frustration" or "impossibility".
Seller's Standard Terms and Conditions of Sale are incorporated by reference into this quotation. A copy of the most current version of Seller's Standard Terms and Conditions of Sale is available at https://www.rexelusainc.com/terms/terms.html

Proposal

We Appreciate Your Request and Take Pleasure in Responding As Follows

GRAYBAR ELECTRIC COMPANY, INC.
TERMS AND CONDITIONS OF SALE

1. ACCEPTANCE OF ORDER, TERMINATION - Acceptance of any order is subject to credit approval and acceptance of order by Graybar Electric Company, Inc. ("Graybar") and, when applicable, Graybar's suppliers. If credit of the buyer of the goods or services ("Buyer") becomes unsatisfactory to Graybar, Graybar reserves the right to terminate upon notice to Buyer and without liability to Graybar.
2. PRICES AND SHIPMENTS - Unless otherwise quoted, prices for goods shall be those in effect at time of shipment, which shall be made F.O.B. shipping point, prepaid and bill. Unless otherwise indicated in the applicable quotation or statement of work, prices for services shall be those in effect at the time of completion. The contract price for goods and or services shall be increased by the amount of any applicable tariff, excise, fee, assessment, levy, charge or duty of any kind whatsoever, imposed, assessed or collected by any governmental body, whether or not reflected in the costs charged to Graybar, and Graybar may increase its cost for goods and or services appropriately to take into account such increases in Graybar's costs.
3. RETURN OF GOODS - Credit may be allowed for goods returned with prior approval. A deduction may be made from credits issued to cover cost of handling. Returns will not be accepted for services or any material which has been modified at the request of or by Buyer. In addition, no custom orders may be returned.
4. TAXES - Prices shown do not include sales or other taxes imposed on the sale of goods or services. Taxes now or hereafter imposed upon sales, shipments or services will be added to the purchase price. Buyer agrees to reimburse Graybar for any such tax or provide Graybar with acceptable tax exemption certificate.
5. DELAY IN DELIVERY - Graybar is not to be accountable for delays in delivery of goods or services occasioned by acts of God, failure of its suppliers to ship or deliver on time, or other circumstances beyond Graybar's reasonable control, including, but not limited to, sourcing, shipment or delivery issues caused by, related to or resulting from COVID-19 or other similar national or global health situations. Factory shipment or delivery dates are best estimates, and in no case shall Graybar be liable for any consequential or special damages arising from any delay in provision of services, shipment or delivery.
6. LIMITED WARRANTIES - Graybar warrants that all goods sold are free of any security interest and will make available to Buyer all transferable warranties (including without limitation warranties with respect to intellectual property infringement) made to Graybar by the manufacturer of the goods. Buyer acknowledges that the performance of any service which alters the manufacturer provided goods as indicated in the statement of work may void the manufacturer's warranty. Graybar shall use the same care and skill a similarly situated provider of like services would exercise following commonly accepted industry practices in the performance of its duties under this agreement. GRAYBAR MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES, AND SPECIFICALLY DISCLAIMS ALL IMPLIED WARRANTIES INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PURPOSE. UNLESS OTHERWISE AGREED IN WRITING BY AN AUTHORIZED REPRESENTATIVE OF GRAYBAR, PRODUCTS SOLD HEREUNDER ARE NOT INTENDED FOR USE IN OR IN CONNECTION WITH (1) ANY SAFETY APPLICATION OR THE CONTAINMENT AREA OF A NUCLEAR FACILITY, OR (2) IN A HEALTHCARE APPLICATION, WHERE THE GOODS HAVE POTENTIAL FOR DIRECT PATIENT CONTACT OR WHERE A SIX (6) FOOT CLEARANCE FROM A PATIENT CANNOT BE MAINTAINED AT ALL TIMES.
7. LIMITATION OF LIABILITY - Buyer's remedies under this agreement are subject to any limitations contained in manufacturer's terms and conditions to Graybar, a copy of which will be furnished upon written request. Furthermore, Graybar's liability shall be limited to either repair or replacement of the goods, re-performance of the services, or refund of the purchase price, all at Graybar's option, and IN NO CASE SHALL GRAYBAR BE LIABLE FOR INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES. In addition, claims for shortages, other than loss in transit, must be made in writing not more than five (5) days after receipt of shipment. Unless otherwise agreed in the applicable statement of work, acceptance of services will occur not more than five (5) days after completion of performance.
8. WAIVER - The failure of Graybar to insist upon the performance of any of the terms or conditions of this agreement or to exercise any right hereunder shall not be deemed to be a waiver of such terms, conditions, or rights in the future, nor shall it be deemed to be a waiver of any other term, condition, or right under this agreement.
9. MODIFICATION OF TERMS AND CONDITIONS - These terms and conditions, and any associated statement of work, supersede all other communications, negotiations, and prior oral or written statements regarding the subject matter of these terms and conditions. No change, modification, rescission, discharge, abandonment, or waiver of these terms and conditions shall be binding upon Graybar unless made in writing and signed on its behalf by a duly authorized representative of Graybar. No conditions, usage of trade, course of dealing or performance, understanding or agreement, purporting to modify, vary, explain, or supplement these terms and conditions shall be binding unless hereafter made in writing and signed by the party to be bound. Any proposed modifications or additional terms are specifically rejected and deemed a material alteration hereof. If this document shall be deemed an acceptance of a prior offer by Buyer, such acceptance is expressly conditional upon Buyer's assent to any additional or different terms set forth herein.
10. REELS - When Graybar ships returnable reels, a reel deposit may be included in the invoice. The Buyer should contact the nearest Graybar service location to return reels.
11. CERTIFICATION - Graybar hereby certifies that these goods were produced in compliance with all applicable requirements of Sections 6, 7, and 12 of the Fair Labor Standards Act, as amended, and of regulations and orders of the United States Department of Labor issued under Section 14 thereof. This agreement is subject to Executive Order 11246, as amended, the Rehabilitation Act of 1973, as amended, the Vietnam Veterans' Readjustment Assistance Act of 1974, as amended, E.O. 13496, 29 CFR Part 471, Appendix A to Subpart A, and the corresponding regulations, to the extent required by law. 41 CFR 60-1.4, 60-741.5, and 60-250.5 are incorporated herein by reference, to the extent legally required.
12. FOREIGN CORRUPT PRACTICES ACT - Buyer shall comply with applicable laws and regulations relating to anti-corruption, including, without limitation, (i) the United States Foreign Corrupt Practices Act (FCPA) (15 U.S.C. §§78dd-1, et. seq.) irrespective of the place of performance, and (ii) laws and regulations implementing the Organization for Economic Cooperation and Development's Convention on Combating Bribery of Foreign Public Officials in International Business Transactions, the U.N. Convention Against Corruption, and the Inter-American Convention Against Corruption in Buyer's country or any country where performance of this agreement or delivery of goods will occur.
13. ASSIGNMENT - Buyer shall not assign its rights or delegate its duties hereunder or any interest herein without the prior written consent of Graybar, and any such assignment, without such consent, shall be void.
14. GENERAL PROVISIONS - All typographical or clerical errors made by Graybar in any quotation, acknowledgment or publication are subject to correction. This agreement shall be governed by the laws of the State of Missouri applicable to contracts to be formed and fully performed within the State of Missouri, without giving effect to the choice or conflicts of law provisions thereof. All suits arising from or concerning this agreement shall be filed in the Circuit Court of St. Louis County, Missouri, or the United States District Court for the Eastern District of Missouri, and no other place unless otherwise determined in Graybar's sole discretion. Buyer hereby irrevocably consents to the jurisdiction of such court or courts and agrees to appear in any such action upon written notice thereof.
15. PAYMENT TERMS - Payment terms shall be as stated on Graybar's invoice or as otherwise mutually agreed. As a condition of the sales agreement, a monthly service charge of the lesser of 1-1/2% or the maximum permitted by law may be added to all accounts not paid by net due date. Visa, MasterCard, American Express, and Discover credit cards are accepted at point of purchase only.
16. EXPORTING - Buyer acknowledges that this order and the performance thereof are subject to compliance with any and all applicable United States laws, regulations, or orders. Buyer agrees to comply with all such laws, regulations, and orders, including, if applicable, all requirements of the International Traffic in Arms Regulations and/or the Export Administration Act, as may be amended. Buyer further agrees that if the export laws are applicable, it will not disclose or re-export any technical data received under this order to any countries for which the United States government requires an export license or other supporting documentation at the time of export or transfer, unless Buyer has obtained prior written authorization from the United States Office of Export Control or other authority responsible for such matters.
17. CANCELLATION, CHANGES FOR SERVICES - Buyer may cancel or make changes to a statement of work up to five (5) business days prior to commencement of the work. All changes and cancellations after such date are subject to Graybar's prior written approval in Graybar's sole and absolute discretion. Buyer shall pay to Graybar amounts necessary to cover cancellation, restocking fees and other charges applicable to the cancelled goods or services including those incurred or committed to by Graybar.

Signed:_____

This equipment and associated installation charges may be financed for a low monthly payment through Graybar Financial Services (subject to credit approval). For more information call 1-800-241-7408 to speak with a leasing specialist.

TERMS and CONDITIONS OF SALE: Critical Components, Inc. Terms and Conditions of Sale shall apply to all sales made by Critical Components, Inc. stemming from this quotation. Any additional or different terms contained in Buyer's purchase orders, invoices, confirmations or other documents generated by the Buyer are hereby specifically and unequivocally rejected and shall not be binding on Critical Components, Inc. unless Critical Components, Inc. specifically agrees in writing to accept such additional or different terms. CCI reserves the right to request progress payment terms based upon the monetary value of the order and/or for credit reasons. Terms are subject to credit approval. It is agreed that all invoices will be paid within thirty (30) days unless otherwise agreed to in writing. Any invoice not paid within thirty (30) days shall be considered past due and be subject to a finance charge of 1.5% per month (18% per annum), or the maximum rate permitted by applicable state law, whichever is lesser. If any legal action is instituted to collect past due amounts, CCI shall be entitled to recover, in addition to all said past due amounts, any damages, legal interest, collection costs and a reasonable attorney's fee.

Returns are subject to the manufacturer's specific product return policies and procedures (RMAs/CMAs). All products returned are subject to a minimum 33% restocking fee by Critical Components, Inc. (restocking fees are subject to change at any time in CCI's sole discretion). If these terms are accepted, it is agreed that the Individual / Company will provide Critical Components, Inc. with any additional documents needed to perfect a security interest in all goods, inventory, and/or equipment purchased from Critical Components, Inc. (eg. Signed Credit Application and signed Purchase Order). Freight (if included) is to job site, (no lift-gate truck). Off-loading, rigging and installation of equipment is by others (unless noted otherwise on quotation). Please provide two (2) weeks notice for product startup (if applicable).

Subject: REC-1A permit drawings released 5/12/2023 - **(Revised)**

Mr. LeBlanc

Here is our price and a brief description of work related to the proposed change order.

1. Anuvision has updated their quote to reflect changes shown on the E-drawings dated 5/12/2023.

2. (8) New duct-detectors have been included to be installed by the HVAC contractor. Wiring and programing has been included.

3. The updated Area of Rescue shown on pages E104, & E105 was included in our base bid, no cost change has been included.

4. Site page E010 reflects (2) pumps that will be supplied and installed by others. Regency has included (2) 480v exterior SPDs with (2) NF/30/3/600v N3R Disconnects. Branch circuiting has been updated.

5. Per the owner's request to use CAT Generators in lieu of Cummins Generators is not included in this quote.

6. There was a substantial adder for the Level E - 200 MPH rating enclosure and the engineers accepted the Level D – 150MPH rating based on the sound rating staying the same. No cost impact for the level D enclosure. Reference RFI -94.

7. 3000-gallon subbase tanks were proposed in lieu of the 1000-gallon subbase tanks per the updated permit drawings dated 5/12/2023. RFI-54 stated a 1000-gallon subbase tank is sufficient for Bi-fuel. The Bi-fuel option was not taken, and Perry McCall stated to leave the 1000-gallon subbase tank as stated in the RFI. If the 3000-gallon tanks are needed, additional cost will be required.

8. Concrete pads are excluded from our scope of work.

CR-02

Item 2

9. Per page E100 we have included (16) new ACUs circuits, they added (2) new FTUs but deleted (4) FTUs for a combined deduct of (2) FTU circuits which has been credited, (2) new HU branch circuits have been included with the install of (2) EPOs that will be provided for the boilers by others.

10. (2) new Humidifier circuits and disconnects have been added per page E101.

11. Breaker changes have been included as shown.

12. Page E010 keynote #7, coordinate with utility company and include all work for new service as shown. Include Utility costs in aid of construction cost and fee's. Based on the onsite meeting held June 14, 2023, JEA will provide the primary transformers, cabling, pad for transformer, meters, and JEA labor at no cost. We originally included a $200,000 allowance in this change order to cover this cost. JEA doesn't require concrete encasement; this would be an additional cost and currently not included.

Should we be given a written direction to proceed, Perry McCall's addition cost will be Forty-Eight Thousand Dollars and Zero Cents ~~$48,000.00~~ $45,247

These prices are valid for fourteen (14) days from the date of this change order proposal.

Should you have any questions, please feel free to call.
Sincerely,
REGENCY ELECTRIC COMPANY, INC.

Sean Conley,
Sean Conley
Senior Project Manager

Proposal

We appreciate your request and take pleasure in responding as follows

Item	ItemType	Quantity	Supplier	Catalog Nbr	Description	Price	Unit	Ext.Price

GRAYBAR ELECTRIC COMPANY, INC.

TERMS AND CONDITIONS OF SALE

1.,,ACCEPTANCE OF ORDER; TERMINATION - Acceptance of any order issubject to credit approval and acceptance of order by Graybar ElectricCompany, Inc. ("Graybar") and, when applicable, Graybar's suppliers. Ifcredit of the buyer of the goods or services ("Buyer") becomesunsatisfactory to Graybar, Graybar reserves the right to terminate uponnotice to Buyer and without liability to Graybar.

2.,,PRICES AND SHIPMENTS - Unless otherwise quoted, prices for goodsshall be those in effect at time of shipment, which shall be made F.O.B.shipping point, prepaid and bill. Unless otherwise indicated in theapplicable quotation or statement of work, prices for services shall bethose in effect at the time of completion. The contract price for goodsand or services shall be increased by the amount of any applicablelariff, excise, fee, assessment, levy, charge or duty of any kindwhatsoever, imposed, assessed or collected by any governmental body,whether or not reflected in the costs charged to Graybar, and Graybarmay increase its cost for goods and or services appropriately to takeinto account such increases in Graybar's costs.

3.,,RETURN OF GOODS - Credit may be allowed for goods returned withprior approval. A deduction may be made from credits issued to covercost of handling. Returns will not be accepted for services or anymaterial which has been modified at the request of or by Buyer. Inaddition, no custom orders may be returned.

4.,,TAXES - Prices shown do not include sales or other taxes imposed onthe sale of goods or services. Taxes now or hereafter imposed uponsales, shipments or services will be added to the purchase price. Buyeragrees to reimburse Graybar for any such tax or provide Graybar withacceptable tax exemption certificate.

5.,,DELAY IN DELIVERY - Graybar is not to be accountable for delays indelivery of goods or services occasioned by acts of God, failure of itssuppliers to ship or deliver on time, or other circumstances beyondGraybar's reasonable control, including, but not limited to, sourcing,shipment or delivery issues caused by, related to or resulting fromCOVID-19 or other similar national or global health situations. Factoryshipment or delivery dates are best estimates, and in no case shallGraybar be liable for any consequential or special damages arising fromany delay in provision of services, shipment or delivery.

6.,,LIMITED WARRANTIES - Graybar warrants that all goods sold are freeof any security interest and will make available to Buyer alltransferable warranties (including without limitation warranties withrespect to intellectual property infringement) made to Graybar by themanufacturer of the goods. Buyer acknowledges that the performance ofany service which alters the manufacturer provided goods as indicated inthe statement of work may void the manufacturer's warranty. Graybarshall use the same care and skill a similarly situated provider of likeservices would exercise following commonly accepted industry practicesin the performance of its duties under this agreement. GRAYBAR MAKES NOOTHER EXPRESS OR IMPLIED WARRANTIES, AND SPECIFICALLY DISCLAIMS ALLIMPLIED WARRANTIES INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIESOF MERCHANTABILITY AND FITNESS FOR PURPOSE. UNLESS OTHERWISE AGREED INWRITING BY AN AUTHORIZED REPRESENTATIVE OF GRAYBAR, PRODUCTS SOLDHEREUNDER ARE NOT INTENDED FOR USE IN OR IN CONNECTION WITH (1) ANYSAFETY APPLICATION OR THE CONTAINMENT AREA OF A NUCLEAR FACILITY, OR (2)IN A HEALTHCARE APPLICATION, WHERE THE GOODS HAVE POTENTIAL FOR DIRECTPATIENT CONTACT OR WHERE A SIX (6) FOOT CLEARANCE FROM A PATIENT CANNOTBE MAINTAINED AT ALL TIMES.

7.,,LIMITATION OF LIABILITY - Buyer's remedies under this agreement aresubject to any limitations contained in manufacturer's terms andconditions to Graybar, a copy of which will be furnished upon writtenrequest. Furthermore, Graybar's liability shall be limited to eitherrepair or replacement of the goods, re-performance of the services, orrefund of the purchase price, all at Graybar's option, and IN NO CASESHALL GRAYBAR BE LIABLE FOR INCIDENTAL, SPECIAL, OR CONSEQUENTIALDAMAGES. In addition, claims for shortages, other than loss in transit,must be made in writing not more than five (5) days after receipt ofshipment. Unless otherwise agreed in the applicable statement of work,acceptance of services will occur not more than five (5) days aftercompletion of performance.

8.,,WAIVER - The failure of Graybar to insist upon the performance ofany of the terms or conditions of this agreement or to exercise anyright hereunder shall not be deemed to be a waiver of such terms,conditions, or rights in the future, nor shall it be deemed to be awaiver of any other term, condition, or right under this agreement.

9.,,MODIFICATION OF TERMS AND CONDITIONS - These terms and conditions,and any associated statement of work, supersede all othercommunications, negotiations, and prior oral or written statementsregarding the subject matter of these terms and conditions. No change,modification, rescission, discharge, abandonment, or waiver of theseterms and conditions shall be binding upon Graybar unless made inwriting and signed on its behalf by a duly authorized representative ofGraybar. No conditions, usage of trade, course of dealing orperformance, understanding or agreement, purporting to modify, vary,explain, or supplement these terms and conditions shall be bindingunless hereafter made in writing and signed by the party to be bound.Any proposed modifications or additional terms are specifically rejectedand deemed a material alteration hereof. If this document shall bedeemed an acceptance of a prior offer by Buyer, such acceptance isexpressly conditional upon Buyer's assent to any additional or differentterms set forth herein.

10.,,REELS - When Graybar ships returnable reels, a reel deposit may beincluded in the invoice. The Buyer should contact the nearest Graybarservice location to return reels.

11.,,CERTIFICATION - Graybar hereby certifies that these goods wereproduced in compliance with all applicable requirements of Sections 6,7, and 12 of the Fair Labor Standards Act, as amended, and alregulations and orders of the United States Department of Labor issuedunder Section 14 thereof. This agreement is subject to Executive Order11246, as amended, the Rehabilitation Act of 1973, as amended, theVietnam Veterans' Readjustment Assistance Act of 1974, as amended, E.O.13496, 29 CFR Part 471, Appendix A to Subpart A, and the correspondingregulations, to the extent required by law. 41 CFR 60-1.4, 60-741.5, and60-250.5 are incorporated herein by reference, to the extent legallyrequired.

12.,,FOREIGN CORRUPT PRACTICES ACT - Buyer shall comply with applicablelaws and regulations relating to anti-corruption, including, withoutlimitation, (i) the United States Foreign Corrupt Practices Act (FCPA)(15 U.S.C. §§78dd-1, et. seq.) irrespective of the place of performance,and (ii) laws and regulations implementing the Organization for EconomicCooperation and Development's Convention on Combating Bribery of ForeignPublic Officials in International Business Transactions, the U.N.Convention Against Corruption, and the Inter-American Convention AgainstCorruption in Buyer's country or any country where performance of thisagreement or delivery of goods will occur.

13.,,ASSIGNMENT - Buyer shall not assign its rights or delegate itsduties hereunder or any interest herein without the prior writtenconsent of Graybar, and any such assignment, without such consent, shallbe void.

14.,,GENERAL PROVISIONS - All typographical or clerical errors made byGraybar in any quotation, acknowledgment or publication are subject tocorrection. This agreement shall be governed by the laws of the State ofMissouri applicable to contracts to be formed and fully performed withinthe State of Missouri, without giving effect to the choice or conflictsof law provisions thereof. All suits arising from or concerning thisagreement shall be filed in the Circuit Court of St. Louis County,Missouri, or the United States District Court for the Eastern Districtof Missouri, and no other place unless otherwise determined in Graybar'ssole discretion. Buyer hereby irrevocably consents to the jurisdictionof such court or courts and agrees to appear in any such action uponwritten notice thereof.

15.,,PAYMENT TERMS - Payment terms shall be as stated on Graybar'sinvoice or as otherwise mutually agreed. As a condition of the salesagreement, a monthly service charge of the lesser of 1-1/2% or themaximum permitted by law may be added to all accounts not paid by netdue date. Visa, MasterCard, American Express, and Discover credit cardsare accepted at point of purchase only.

16.,,EXPORTING - Buyer acknowledges that this order and the performancethereof are subject to compliance with any and all applicable UnitedStates laws, regulations, or orders. Buyer agrees to comply with allsuch laws, regulations, and orders, including, if applicable, allrequirements of the International Traffic in Arms Regulations and/or theExport Administration Act, as may be amended. Buyer further agrees thatif the export laws are applicable, it will not disclose or re-export anytechnical data received under this order to any countries for which theUnited States government requires an export license or other supportingdocumentation at the time of export or transfer, unless Buyer hasobtained prior written authorization from the United States Office ofExport Control or other authority responsible for such matters.

17.,, CANCELLATION; CHANGES FOR SERVICES- Buyer may cancel or makechanges to a statement of work up to five (5) business days prior tocommencement of the work. All changes and cancellations after such dateare subject to Graybar's prior written approval in Graybar's sole andabsolute discretion. Buyer shall pay to Graybar amounts necessary tocover cancellation, restocking fees and other charges applicable to thecancelled goods or services including those incurred or committed to byGraybar.

Subject to the standard terms and conditions set forth in this document. Unless otherwise noted,freight terms are F.O.B. shipping point prepaid and bill. Unless noted the estimated ship date will be determined at the time of order placement.

Prices are subject to change at any time prior to shipment unless agreed to otherwise in writing signed by an authorized Seller representative. Orders related to this quotation must be received, accepted and released by Seller within 48 hours of issuance of the quotation and are subject to availability. Many of Seller's manufacturing partners have advised that until further notice they reserve the right to amend the delivery date, price, scope and quantity of supply and/or other terms and conditions set out in their offer or quotation and Seller equally reserves the right to pass through any such changes from its manufacturing partners to the Buyer. Delivery dates are estimated only. Seller shall not be liable for failure to meet such dates resulting from product shortages or manufacturing delays. Be advised that Seller considers any changes imposed by its manufacturing partners and other vendors outside of Seller's reasonable control and therefore subject to Force Majeure provisions or similar common law doctrines such as "frustration" or "impossibility".
Seller's Standard Terms and Conditions of Sale are incorporated by reference into this quotation. A copy of the most current version of Seller's Standard Terms and Conditions of Sale is available at https://www.rexelusainc.com/terms/terms.html

Medical Examiner's Office District IV

Subject: REC-21 Permit Response Drawings dated 8-15-2023 (REVISED)

Mr. LeBlanc

Here is our price and a brief description of work related to the proposed change order.

1. On page E010 there will now be one dual head EV charger in lieu of the two. This single charger will still require two circuits. (2) 40amp breakers have been added to the panel schedule, no credit for the 60amp breakers as they were never reflected in the panel schedules. The 60amp copper for these circuits has been credited.
2. Page E310 shows (10) new touchless devices and (2) new card readers.
3. Page E311 shows (10) new touchless devices and (1) new card reader.
4. Page E312 shows (3) new touchless devices and (1) new card reader.
5. Page E314 shows (1) new card reader.
6. The fire-alarm devices that have changed on these drawings have only been accounted for what is shown and not what is required by code. See RFI #38 for areas without coverage.
   a. Credited = Strobe Appliance Credit - 11
   b. Added = Horn/Strobe - 11 (replaced strobe only devices above)
   c. Added = Manual Pull Stations - 1
   d. Added = NAC Power Supply – 1
   e. Added = Batteries – 2
   f. Wire and installation has been included.
7. RFI #121 F.A. has been included per the response.
8. BIM updates have been included.

Should we be given a written direction to proceed, Perry McCall's addition cost will be Fifty-One Thousand One Dollar and Zero Cents **$51,001.00**

These prices are valid for fourteen (14) days from the date of this change order proposal.

Should you have any questions, please feel free to call.

Sincerely,
REGENCY ELECTRIC COMPANY, INC.
Thomas D. Smith

Phone: 703.309.5430

9/7/2023

Regency Electric Company, Inc.
4500 Salisbury Road, Suite 300
Jacksonville, Florida 32216

Attention: Sean Conley

Project: COJ Medical Examiners Office
P.O.# 52435
Change Order: #04

Auza Consulting Corp. proposes to provide additional BIM Services work for the subject change as indicated on the change documents and by the attached Scope listed in Exhibit A and per the project's contract documents, in addition to our contract in the amount of:

Dollars.....$1,650.00

This proposal is subject to the terms and conditions of the main agreement/contract for the above referenced project.

This proposal is based solely on the usual BIM Services cost to perform the work and does not include changes in the schedule that may result from implementing this change.

Very truly yours,

Roberto Auza

COJ Medical Examiner Office Change Order Quote #001

Scope of Work:

A3 Proposes to provide and install the following list of material as described in construction drawings marked by Regency Electric and Dated 8/15/2023. This change order quote only covers material listed below. Any other material is to be provided by others. A3 will provide controls and power supplies for (5) new doors of access. Wave readers, power supplies, cabling and termintions for 23 openings. The addition of new readers will require expansion of software licenses. Additional licenses are included.

This quote excludes the following: Conduit pathways, sleeves, backbox, AC power circuit at power supplies (2), and any electrified locks and cable harness that may be required.

Site Preparations/Client Responsibilities:

To ensure A3 Communications' implementations teams are able to perform all project-related tasks, you are required to prepare the affected site(s) as follows:

- *Designate one Project Manager who will:*
- *Act as the first point-of contact for all communication;*
- *Define overall installation date goals;*
- *Verify satisfaction of prerequisites; and*
- *Provide final acceptance approval.*
- *Designate individual site contacts who will:*
- *Coordinate installations;*
- *Promptly reply to all requests for information; and*
- *Provide timely access to all video surveillance facilities for all authorized A3 personnel and contractors;*
- *Ensure strict conformance to all local building, electrical and fire codes prior to equipment installation;*
- *Verify correct network provisioning, including premise wiring and end-to-end testing, prior to the scheduled installation date;*
- *Provide detailed drawings of site(s);*
- *Provide and install any network switches and PoE power;*
- *Install electrical, where needed, including conduit pathways;*
- *Provide appropriate installation/rack/wall space for all hardware to be installed;*
- *Provide IP address and naming convention information to be used for this project;*

Some products or services may be purchased from The Cook and Boardman group, which is an affiliated entity of A3 Communications. Material will be invoiced to customer when delivered onsite. Projects that are not completed within the first month of starting will be progressed billed for labor and materials each month. Payment terms on progress invoices are net 30 days.

Qty	Description
Item 2	- Provide all necessary security and user access passwords for existing and new equipment; - Proper door alignment and mechanical operation - as this is the responsibility of others and is assumed that all controlled doors are properly operational; - Provide cores for new door hardware; - Provide cylinders for new door hardware; - Provide VM server for the access control system; - Provide a lift; - Provide patch panel; - Provide patch cables; - Connection to the building FIRE ALARM for release of electrified locks on egress doors is the responsibility of the owner and their fire alarm service provider; - Provide the database of users that will need to be imported into the access control system; - Provide gate and gate controller; - Provide the desk unit for the video intercom system; - Provide a client station for printing badges on the access control system; - Provide badge templates to import into the access control system; - Provide all backbone and infrastructure cabling for the network appliances; - Provide mechanical locksets; - Provide Cat6 Cabling as required to support cameras and access control panels.

Exclusions and Clarifications:

Unless specifically noted otherwise, this Proposal excludes the following.

- *A3 Communications will not be responsible for the functionality or condition of, nor provide warranty for, existing equipment, cabling, and/or systems or new equipment, cabling, and/or systems provided and/or installed by others. Troubleshooting, repair, and/or replacement of said equipment, cabling, or systems is not included in this proposal;*
- *PLC equipment or programming of said equipment;*
- *Any conduit, raceways, or AC power (Pathways provided by "others" and or utilize "existing" pathways);*
- *Any card credentials or KEY-fobs;*
- *API integration to HR database;*
- *Badge printing station, badge production, and badge programming and/or access level (unless noted in Scope of Work);*
- *Removing doors/ frames/ mullions;*
- *Removing of existing electrified hardware;*
- *Any mechanical door hardware;*
- *Any electrified door hardware;*
- *Any automatic door operators;*
- *Any keyway or key cylinders for locking hardware (unless noted in the Bill of Materials);*
- *Wire from hinge to lock by others unless A3 Communications provides the lock;*
- *Wiring of door operators and any push plates;*
- *Integration between different systems;*
- *Any power supplies and/or transformers;*
- *Any electrical (High Voltage) work;*
- *Any center mullions;*
- *Any wire management (horizontal or vertical);*
- *Any new racks, cabinets, or shelving;*
- *Any lifts or lift rentals (unless noted in Scope of Work);*
- *Any gate equipment;*
- *Any fire alarm disconnect relay, fire alarm device or additional equipment/ devices required to meet applicable local codes;*
- *Any lightning protection;*
- *Any uninterruptible power supply;*
- *Any computers/ servers or associated equipment (unless noted in the Bill of Materials);*
- *Any network switches and/or routers (unless noted in the Bill of Materials);*
- *Any VPN network connection needed for communication to server;*
- *Any additional storage to the Video Management System server;*
- *Any programming other than standardized configurations (unless noted in the Scope of Work), including but not limited to customizations, 3rd party interfaces, maps, etc…;*
- *Any elevator traveling cable or equipment required for access control and/or CCTV;*
- *Any painting of conduit;*
- *Any paint, patch, and repair work to existing surfaces;*
- *Any signage; and*
- *Any trenching, backfill and/or compaction.*

Notes and Assumptions:

Some products or services may be purchased from The Cook and Boardman group, which is an affiliated entity of A3 Communications. Material will be invoiced to customer when delivered onsite. Projects that are not completed within the first month of starting will be progressed billed for labor and materials each month. Payment terms on progress invoices are net 30 days.

Qty	Description

Item 2

All changes affecting the design, quantity of material or additional labor shall be approved by the A3 Project Manager and Client prior to beginning work. Such changes may require the completion of a Change Order by the Client before any such change order work is performed.

- A3 will not be held responsible for any omissions or oversight due to miscommunications, misrepresentation or lack of information provided by customer in the formulation of this proposal;
- This project will be performed during Monday through Friday between the hours of 8:00am and 5:00pm, excluding holidays, unless otherwise agreed upon prior to the start of work (no overtime is included);
- A3 Communications will provide all labor, tools, and supervision required to complete this installation, except for what the customer will be responsible for, stated above;
- A3 must have unimpeded access to buildings it is working in during this project;
- Adequate lighting and electrical power will be available on site;
- If any existing equipment (including cabling) that is designated to be utilize in the new system is defective or near end of life the Customer is responsible for the replacement of said equipment;
- This quote only includes installation and connection of the card readers, door position switches, electric strikes, request-to-exits, and door releases where marked on the prints;
- This quote only includes installation of the cameras in the designed locations and configuration of video management system on the customer supplied server;
- A3 will provide the initial configuration and programming of the access control database for this Scope of Work, including uploading the initial client database for this site, panel and network card configuration, time schedules, access levels, holiday schedules, alarm messages and instructions. However, the Client is responsible for loading all personnel data for vendors and other contractor's card holder information;
- Change orders - Must have written approval from customer before any work can proceed;
- We are using existing pathways unless otherwise noted (no conduit or wire mold required);
- It is a plenum environment unless otherwise noted;
- All work on can be performed from a 6'-10' ladder (no extension ladder or lift required);

Lenel OnGuard Access Control

A3 proposese to replace existing ProWatch acess control with a new Lenel Onguard solution. This new solution consists of Security workstation, control motherboards, door controllers, relay controllers, software, battery backup, installation, testing, configuration and user training.

Access Control
20. Access control system will be an addition to the City's current Lenel OnGuard Pro Access Control System.
21. Card readers will meet current COJ reader spec. RP40 reader multiclass (HID CORP – 920PTNNEK00000)

1	64ADV-64RUP	64 Access Readers upgrade for all ADV systems (max of 256 readers).
3	LNL-1320-S3	Dual Reader Interface Module (Series 3 –Supports OSDP Readers) - 12/24 VDC, 2 Reader interface, W/M, 8 inputs, 6 (5A) form C relays , RoHS, CE, C-Tick and UL294 certified

Subject: REC-5 Replace Sumitomo 18F SM Bundle with a 24F SM Bundle

Mr. LeBlanc

Here is our price and a brief description of work related to the proposed change order.

1. The 18F fiber specified for pricing on the COJ Fiber expansion has been discontinued.
   a. Replace the 18F SM ABF bundle with the 24F SM ABF bundle fiber optic cable.
   b. Increase the LC connectors to account for the additional fiber optic terminations.

Should we be given written directions to proceed, Perry McCall's additional cost will be Two Thousand Four Hundred Seventy-Seven Dollars and Zero Cents. **$2,477.00**

These prices are valid for fourteen (14) days from the date of this change order proposal.

Should you have any questions, please feel free to call.

Sincerely,

REGENCY ELECTRIC COMPANY, INC.

Thomas D. Smith,

SUBMITTED TO: Regency Electric
ATTENTION: Thomas Smith
REGARDING: City of Jacksonville Medical Examiner Upgrade Sumitomo 18F SM Bundle to 24F SM Bundle Change Order #1 Proposal

Tietjen Technologies is pleased to provide this change order proposal for the upgrade from the Sumitomo 18F SM bundle to a 24F SM bundle. This change order is due to Sumitomo Electric eliminating the 18F SM bundle from their product line. The 18F SM bundle is no longer available in any stocking warehouse.

Change Order #1 Replace Sumitomo 18F SM Bundle with a 24F SM Bundle

A. Replace the 18F SM ABF bundle with the 24F SM ABF bundle fiber optic cable.
B. Increase the LC connectors to account for the additional fiber optic terminations.

Change Order #1 Upgrade the 18F SM ABF bundle to 24F SM ABF bundle - $2,154.00 Includes material, labor and applicable taxes.

TERMS

- THIS QUOTATION IS BASED ON ACCEPTANCE WITHIN (30) DAYS OF THE DATE OF THIS DOCUMENT AND PRICING IS SUBJECT TO CHANGE.
- WORK WILL BE SCHEDULED UPON RECEIPT OF SIGNED PROPOSAL.
- TIETJEN TECHNOLOGIES INC. SHALL HAVE THE RIGHT TO STOP WORK FOR NONPAYMENT WITHIN THE TERMS UPON (10) DAYS WRITTEN NOTIFICATION.
- BILLINGS ARE RENDERED BASED ON WORK COMPLETED. PAYMENT IS DUE NET (30) DAYS.
- ALL LABOR AND MATERIALS SUPPLIED BY TTI SHALL BE WARRANTED FOR THE PERIOD OF ONE (1) YEAR.
- 1.5% CHARGED ON ALL INVOICES OVER 30 DAYS PAST DUE.
- 3% PROCESSING FEE WILL BE ADDED FOR CREDIT CARD PAYMENTS.
- IN THE EVENT OF SUIT FOR COLLECTION, REASONABLE ATTORNEY'S FEES WILL BE ADDED TO THE COST OF THE INVOICE.

Please contact my office with any questions on the proposal.

Respectfully submitted,
Ernie Brewbaker, RCDD

RFI Transmittal

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville - Morgue 44464.01	DATE SENT:	6/26/2023
SUBJECT:	Electric - 18-Strand Fiber Discontinuation	RFI ID:	070
TYPE:	RFI	TRANSMITTAL ID:	00399
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION: The 18-strand single mode fiber cable called for in note "T" on sheet E704 has been discontinued per the City's preferred low voltage vendor, Tietjen Technologies, and replaced with 24-strand single mode fiber cable. Please advise if the 24-strand single mode fiber cable will be an acceptable replacement.

SUGGESTION:

ANSWER:

Response (Answered) from: Eric Eng (Eng Engineering, Inc.)
Remarks:
24-strand fiber is acceptable.

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

REQUEST FOR INFORMATION

Regency Electric's RFI For Reference

Date: June 13, 2023

To: Perry-McCall
From: Regency Electric
Project: Medical Examiner's Office

Subject: RFI #11, COJ Site Fiber

Regency Electric Company, Inc., is requesting clarification on the following information:

1. The outdoor 18F-strand fiber has been discontinued. See attached discontinued notice. There is a 24F-strand fiber bundle available as a replacement option. Please advise if this option is acceptable for the site COJ Site Fiber.

2. SEE 2ND Portion below. This is the fiber that will be run to the H.H. located near the traffic H.H. from the 2" blown fiber located near the flagpole.

T. **There shall be 2-2", conduits ran from the MDF to property line. Conduit will terminate in a 24"x36" handhole. 2- 2" conduits shall proceed "west" towards I95 and terminate in a 24" x 36" handhole near the traffic signal box. Connect new Handhole to Traffic Engineering existing HH with 2-2" conduits. Inside the conduit will be placed a 2 Tube, ABF conduit with an 18 Strand, Single mode fiber cable. Fiber shall be terminated with LC connectors.**

Note T
Sheet E704

Any information you can provide will be greatly appreciated.

Sincerely,

REGENCY ELECTRIC COMPANY, INC.

PROJECT:	City of Jacksonville - Morgue 44464.01	DATE SENT:	7/18/2023
SUBJECT:	Overflow Roof Drains at Low Roofs	RFI ID:	082
TYPE:	RFI	TRANSMITTAL ID:	00518
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION:

1. Sheet A203A shows (3) single roof drains without overflow roof drains at the low roof from CL 1-5 and A-C. Sections on A350 and A352 show no parapet for potential overflow off the roof edge. Sheet P200 shows overflow roof drains in this area. Please advise if the overflow roof drains are required.

2. Sheet A203B shows (2) single roof drains without overflow roof drains at the low roof from CL 11.8-14 and A-C. Sections on A351 and A352 show no parapet for potential overflow off the roof edge although this roof is wider than the area in #1 above. Sheet P200 shows overflow roof drains in this area. Please advise if the overflow roof drains are required.

SUGGESTION.

ANSWER:

Response (Answered) from: Lisa Chang (Gresham Smith)

Remarks:

Overflow drains are required as shown on Plumbing. Please see attached updated architecture sheets.

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

RFI Transmittal

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville – Medical Examiner's Office 44464.01	DATE SENT:	10/4/2023
SUBJECT:	Existing Storm & Wall Footing at Future Lots	RFI ID:	0144
TYPE:	RFI	TRANSMITTAL ID:	01136
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION: Please see the attached mark-up to C300 with photos. There is an existing RCP that appears to run from MH-02 to the existing storm manhole in Castlewood. The top of the existing pipe is at EL 20.56, and the bottom of footing for the security wall is at ~20.16. Please advise on how we are to proceed.

SUGGESTION:

ANSWER:

Response (Answered) from: Joseph Lesso (GAI Consultants)
Remarks:
This drainage pipe cannot be removed/replaced, since it is a continuation of the drainage easement on our site. GAI has coordinated with the structural engineer to mkae sure they have a solution for the wall in this area. They proposed stepping the footing down below the pipe, localized to this location. Please forward this RFI to the structural engineer for a more detailed response.

Response (Answered) from: Kim Murphy (GMHILL Design Build)
Remarks:
See attached RFI #144 SKETCH GMH 10-4-2023.

Additional information about security wall can be found in RFI #049.

Let us know if you have any comments or questions.

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

PROJECT:	City of Jacksonville - Morgue 44464.01	DATE SENT:	9/11/2023
SUBJECT:	Existing Site Utilities Not Shown	RFI ID:	0120
TYPE:	RFI	TRANSMITTAL ID:	00937
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION:

There are several existing site utilities and structures that are not shown on the contract documents and will conflict with the new construction. Please see the attached mark-up to C300 and photos, and please advise on the following:

1. There is an existing curb inlet structure that appears to have previously served the property and is currently full of dirt/debris so that existing inverts and pipe directions cannot be seen. Please confirm if this structure is to be demolished or if not, please advise on how to proceed.

2. There is an existing sanitary pipe exposed in the drainage swale along N. Davis that will conflict with the DP-23 tie-in to the existing storm pipe. Please advise on how to proceed.

3. There is an existing, ~2" diameter, galvanized pipe crossing the drainage swale along N. Davis, and we do not know what type of pipe and what service this is for. Please advise on how to proceed.

4. There are portions of an existing 6" backflow preventer assembly on site, with one closed valve at the first above grade elbow. We are unsure if this pipe is currently in service and have not located an upstream valve. Please advise on how to proceed.

5. There is an existing curb and concrete pier at N. Davis in the area of the new site entrance for the project. Please confirm if these items are to be demolished, or if not please advise on how to proceed.

6. There is an existing brick inlet structure in the area of the new generator yard (no photo in the attachment). Please confirm if this structure is to be demolished, or if not please advise on how to proceed.

SUGGESTION:

ANSWER:

Response (Answered) from: Joseph Lesso (GAI Consultants)

Remarks:

Please see attached PDF for responses to each conflict.

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville – Medical Examiner's Office 44464.01	DATE SENT:	9/27/2023
SUBJECT:	Underground Pile and Foundation Structures	RFI ID:	0127
TYPE:	RFI	TRANSMITTAL ID:	01066
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION:

See attached photos of large concrete footing and concrete piles located underground on site during site clearing operations.
(1) The large concrete footing seems to be for an old sign that may have been located here. Please confirm it is acceptable to proceed with removing the concrete footing as it will interfere with underground utilities near the mechanical yard.
(2) 30+ concrete pile have been located within or in close proximity to the building footprint. Upon investigation, the tops of the piles are at elevation 21.36 down to 19.40. PMC is investigating what, if any utilities the piles may interfere with. PMC question(s) would be: Is it acceptable to remove only the portion(s) of pile(s) as needed to facilitate the installation of the underground utilities and leave the remaining piles in the ground, whether within the building pad or not?

SUGGESTION:

ANSWER:

Response (Answered) from: Joseph Lesso (GAI Consultants)
Remarks:
(1) It is acceptable to remove the concrete footing.
(2) GAI has no issue with removing only the portion of piles as needed and leaving the remaining piles in the ground from a civil standpoint. Ensure that none of the piles left to remain conflict with the project design. Please also confirm with the structural engineer if this is acceptable for them.

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

Jeff,

We are working on getting some surveying completed early next week and then we can provide the specific locations of footing conflicts, if any. We'll proceed with covering the piles and fill material where we do not have concerns of conflicts, and if we locate any conflicts we will remove the top portions of the piles as needed to meet the 2' separation under footings per GM Hill, and the 1' separation from utilities per GAI.

Thanks,

John Kauffman
Director

Subject: RE: MEO RFI-127 Existing Underground Foundations

John;

I spoke with Rodney Mank of Meskel and Associates yesterday and he is OK with the direction I gave. We would like to know the number of pile, if any, that will conflict with the building foundations as noted below. That is the piles with tops less than 2 feet below the bottom of the footings. Is this something you can provide?

Thank you

Item 3

Jeff,

Were you able to confirm with Meskel & Associates that the below direction is acceptable? The official RFI should be making it's way through Newforma, but once we have geotech confirmation via email, we would like to start import fill where we can.

Thanks,

John Kauffman
Director

Subject: RE: MEO RFI-127 Existing Underground Foundations

John;

I would like to consult with the project geotechnical engineer, Meskel and Associates, to confirm, but, my thought is the existing piles can remain in place except where they conflict with the building foundations, and in direct conflict with site and drainage structures. Conflict with building foundations would be defined as a pile that terminates within 2 feet of the bottom of the foundation. Piles in conflict should be cut off a minimum of 2' below building foundations. The bottom of the F10.5 footing is at 22.5', so the top of the piles would need to be below 20.5. So, there might be a few piles that are affected. From the site map with the pile locations, it doesn't look like there are any piles under the elevator.

We can discuss in the morning if you like. I'm available in morning except for a meeting at 11:00.

Thank you

Subject: MEO RFI-127 Existing Underground Foundations

Kim & Jeff,

I left a message with your office for each of you today regarding this urgent RFI that we will be submitting tomorrow. Please see the attached sketch and photos that will accompany the RFI. We have discovered two rows (so far) of what appears to be existing piles from the old hotel on the property. With the depth of these existing structures, it does not appear that we will have any direct conflicts with the building foundations, conduits, or underground pressure piping, but likely will have some conflicts with underground gravity piping in some locations. We are ready to begin import fill, so the urgent item for now is to confirm if it is acceptable to leave the existing foundations in place where there are no direct conflicts, and only remove them where there are direct conflicts. Based on the depth, we are thinking the only direct conflicts will be sanitary and storm piping/structures. We have already discussed with COJ and GAI, and both are ok with leaving the structures in place except where conflicting with new construction. Do you have any concerns with this approach?

Please let us know once you can as we are on hold for import fill pending this confirmation.

Thanks,

John Kauffman

RFI Transmittal

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville – Medical Examiner's Office 44464.01	DATE SENT:	10/3/2023
SUBJECT:	Existing Curb Inlet at Future Lots	RFI ID:	0136
TYPE:	RFI	TRANSMITTAL ID:	01114
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION:

There is an existing curb inlet that appears to be shown as existing to remain on C300 in the future lots area, see attached C300 mark-up with clouding. The pipe from this curb inlet to the existing storm manhole will conflict with the new site perimeter wall footing, the inlet type will be incorrect in the final condition since the old roadway and curb is being removed for the project. The existing structure is brick similar to others on site. Please advise on how we are to proceed.

One potential solution would be to demolish this existing curb inlet and pipe up to the edge of the site wall footing, and cap the existing pipe to the manhole (demolition of the pipe to the manhole would require sawcutting/patching in the Castlewood ROW), if acceptable since the future lots will be unpaved and have IN-21 added to the new storm system.

SUGGESTION:

ANSWER:

Response (Answered) from: Joseph Lesso (GAI Consultants)

Remarks:

GAI has no issue with the proposed solution. Please ensure positive drainage from these future lots to IN-21. The lowest existing grade on these future lots is the corner in which IN-21 is located, so the drainage should make its way there with little to no grading adjustment.

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

Subject: REC-11 Primex Clocks (REJ)- 275313- Clock System Submittal

Mr. LeBlanc

Here is our price and a brief description of work related to the proposed change order.

Regency had included (11) INOVA POE Clocks per the Electrical drawings provided. Page E002. Regency is submitting this C/O after receiving "275313-01 - Clock System Submittal (REJ)" noted to include a Primex brand clock. We have not received a requested model type currently. I'm attaching the submittals for model Primex C1005X155 pending this Change Order approval.

E002

NOTES FOR CLOCK SYSTEM:

1. THE NETWORK CABLING FROM THE CLOCK OUTLET TO AND INCLUDING THE PATCH PANEL IN THE IDF IS BEING PROVIDED BY THE STRUCTURED CABLING CONTRACTOR AND IS NOT PART OF THIS CONTRACT.
2. DESIGN SELECTION, INOVA SOLUTIONS, ONTA12-BK 12" ROUND BLACK NETWORK CLOCK.
3. THE NETWORK CONTRACTOR WILL PROVIDE ALL REQUIRED PATCH CABLES.
4. THE NETWORK CONTRACTOR WILL PROVIDE AND INSTALL THE CLOCK.

Should we be given written directions to proceed, Perry McCall's additional cost will be Three-Thousand Six-Hundred Sixteen Dollars and Zero Cents. **$3,616.00**

These prices are valid for fourteen (14) days from the date of this change order proposal.

Should you have any questions, please feel free to call.

Sincerely,

REGENCY ELECTRIC COMPANY, INC.

Traditional Series Analog Clocks

Item 3

OneVue SYNC

POE / IP Clocks

It's never been easier to synchronize the time throughout your facility. OneVue Clocks are delivered preconfigured, ready to quickly access your existing network. Simply take the clocks out of the box, connect to PoE power (Power over Ethernet), and hang them on the wall. The clocks will immediately access your network and synchronize perfectly to keep your organization running on time, even through power outages or Daylight Saving Time shifts.

Traditional Series Analog Clocks

Easy-to-read dials and durable thermoplastic frames and lenses make our Traditional Series Analog Clocks ideal for almost any setting. Available in a variety of colors, sizes, and dial options including custom dials to showcase your facility name or logo.

POE TRADITIONAL SERIES ANALOG CLOCKS

Remarks:
See attached shop drawing comment sheet.

Response (Rejected) from: Lisa Chang (Gresham Smith)
Remarks:
COJ would like an Analog clock to tie into the POE system. Please see description below from Micheal Young.

"The backend is POE. The courthouse has 300 POE analog front bezel clocks with backend POE electronics. The Cecil Field 911 facility has digital front bezels. The manufacturer is Primex. Please pick the type of clocks from this company"

GS ok with Slim metal series.

Inova Solutions

1. Product Name

- Inova OnTime® IP PoE Analog Clock Systems
  - ONTA12-BK (single-sided)
  - ONTA12DS-BK (double-sided)

2. Manufacturer

Inova Solutions, Inc.
110 Avon Street
Charlottesville, VA 22902

Phone: 800-637-1077
Fax: 434-817-8002

Email: info@inovasolutions.com
Web: www.inovasolutions.com

3. Product Description

Basic Use

Inova Solutions' OnTime IP PoE clocks provide accurate, highly visible, synchronized time throughout facilities or campus environments in order to promote smooth, efficient workflows. Schools and universities depend on accurate timekeeping to efficiently transition students from one class to the next. In healthcare facilities, synchronized time is critical to daily operations, whether checking on patients or delivering medications. Synchronized time in manufacturing environments promotes schedule adherence and efficiency of manufacturing processes.

Inova OnTime clocks are built on Power over Ethernet (PoE) technology, getting time, data and energy-efficient power directly from the network—making them easy to install and simple to maintain. PoE clocks do not require a master clock, electrical outlets or batteries. Inova OnTime clocks plug directly into standard Ethernet jacks and allow for a centralized UPS (Uninterrupted Power Supply) backup to keep them up and running in the event of a power failure.

Wall-mounted; double-sided

Ceiling-mounted; double-sided

Features

- Power supplied over standard Cat-5 cabling using the IEEE 802.3af and IEEE 802.3at (PoE+) Power over Ethernet standard
- Low power consumption—4 watts
- No master clock or serial connection required
- 12-hour circular clock face visible from over 100 feet (30 m)
- Highly accurate to within ±1 second
- Time set automatically by SNTP (Simple Network Time Protocol)
- Automatic adjustment for Daylight Saving Time
- Compatible with DHCP or static IP addressable 10/100BaseT Ethernet
- UL 60950-1, CAN/C22.2 ETL Listed, CE Marked, RoHS compliant
- Optional cloud-based management system available

Benefits

- Accuracy (within ±1 second)
- Continual synchronization
- Easy installation
- Easy maintenance and management
- Energy efficiency
- Reliability
- Two-year warranty
- Inova OnTime IP POE clocks are assembled in the USA

4. Technical Data

Applicable Standards

American National Safety Institute (ANSI)/Underwriters Laboratories (UL)

Re: Medical Examiner's Office Record Room 2003-Change Order
4368 N. Davis Street
Jacksonville, Fl. 32209

W. W. Gay Fire & Integrated Systems, Inc., a Division of Sciens Building Solutions, is pleased to provide pricing for the above referenced project.

Proposal based on: Email Floor plan image and contract documents.

- *Contractor to provide revised job schedule for review, and W.W. Gay Fire & Integrated System's approval prior to proceeding with the work. Price is subject to schedule approval.*
- *Our proposal which includes scope of work, clarifications. inclusions and exclusions must be included in contract.*

Scope of Work:

Installation of a preaction sprinkler system on the second-floor Record Room 2003 supplied by preaction valve and fire alarm panel located on the first floor.

Inclusions

- Point of connection: connect to existing cross main on first floor preaction system to supply second floor Record Room 2003 in lieu of a wet pipe system.
- Provide new fire alarm and detection system supplied by existing preaction panel on first floor.
- 3D BIM modeling design coordination.
- Sprinkler heads to be installed center of tile throughout the project where ceilings are installed.
- All material will be listed per UL Fire Protection Equipment Directory rated for 175 psi working pressure (U.N.O).
- Piping: per NFPA 13 requirements and specifications schedule 10 & 40 black steel for all preaction system.

2500 NE Terrace, Gainesville, FL 32609 • Phone 352-380-0317 • Fax 352-378-1454

https://sciensbuildingsolutions.com/

- Sprinkler heads: quick response, standard coverage brass with chrome finish in lay-in tiles. Sprinkler heads will be upright in all unfinished areas, concealed in areas with a finished gyp board ceiling area as per contract drawings.
- Shop drawings, and material submittal data.
- As-builts and final test reports.
- Labor, material, tools, fabrication, supervision, and testing.
- Daily normal floor cleaning to keep from damaging product.
- Taxes and inspections by AHJ.
- One year warranty from date of substantial completion. This warranty is made with the stipulation that the owner has performed maintenance and inspections required by NFPA 25.

Exclusions:

- VESDA air sampling system.
- Cutting, patching, paint / paint preparation, electric power wiring of air compressor.
- Removal, relocation or rearrangement of other trade or owner equipment, furniture, or product.
- Phasing for any portion of the project.
- Multiple project mobilizations, project phasing.
- Composite cleaning.
- After hours/ premium labor and fire watch.
- Fees for AutoCAD drawing files
- Textura Construction Payment system.
- Removal, relocation, or replacement of existing main, cross main, branch lines and installed drop piping to accommodate other trades without an approved change order prior to starting work.
- Hose valves, hose valve station, hose valve cabinets, extinguishers, extinguisher cabinets or access panels.
- Fire protection system engineering documents signed and sealed by Eng Engineering; fire protection engineer of record.

Clarifications:

- This proposal assumes that the water supply available is adequate for the system design. If it is deemed insufficient during the design process, we will notify the owner and propose a means and cost to rectify the deficiency.
- Quote is based on provided criteria and given detail information (hazard classifications density & pipe sizes) by engineer of record. Any change to that will require to revise submitted quote.

https://sciensbuildingsolutions.com/

- Bid is based on working Monday-Friday, eight hours per day. Shift work or night/weekend work is not included unless specifically indicated in this proposal.
- Quote is not including BIM coordination because of existing building and fire suppression system.
- Failure to receive all pertinent and applicable CAD files to begin fire protection shop drawings & hydraulic calculations will incur additional labor and cost to reproduce these items. It is expected that the CAD files received will give the designer an acceptable starting point to begin detailed shop drawings for the applicable fire protection system(s). This would include but is not limited to CAD files containing all of the building's architectural, mechanical, structural, and electrical features for coordination. These files should include floor plans with correct room layouts and partitions with room names and occupancies shown, reflected ceiling plans for finished areas with ACT, structural details to identify locations for bracing and support of sprinkler piping, locations of all equipment that could interfere with installation of the sprinkler system(s), and underground site utilities plan identifying the size and material type of the underground main supplying the fire suppression system(s) to provide accurate hydraulic calculations.
- Corrosion of automatic fire sprinkler systems is a naturally occurring phenomenon. Factors contributing to corrosion include trapped air, water quality, type of piping material, environment, and maintenance procedures. In certain situations, accelerated corrosion can occur due to one or more of these factors. WW Gay Fire Protection, Inc. cannot warrant that the systems proposed will not experience accelerated corrosion due to any of the fore mentioned factors.
- As per NFPA requirements, the owner is required to notify the installing contractor if conditions exist that would lead to (MIC) Microbiological Influenced Corrosion.
- This scope shall be incorporated into, and part of any contractual agreement upon award of the above referenced project.
- This bid is based on standard AIA contract conditions. Monthly progress billings will be submitted for the duration of the project.

Global Supply Chain Disruption Clause:

If, during the performance of this contract the price of equipment and materials significantly increase, the price listed below shall be equitably adjusted by an amount reasonably necessary to cover any such significant price increases. As used herein, a significant price increase shall mean any increase in costs incurred on the project from the date of the contract signing thru delivery of material to job site. Such price increases shall be documented through quotes, invoices, or receipts.

COVID-19 Clause:

The contract price and scope of work does not factor in possible schedule delays or extra costs associated with COVID-19 pandemic, as the scope of this potential impact is currently unknown. It is

John,

Gresham's vote is for the Records room to be an extension of the Data Room 2025 system.

@Edward Eng – Eng team – Please advise if it is acceptable to share the preaction system between the Data Room and Records Room. Otherwise we will proceed with a single system currently specified.

Thank you,

Hogan Vinoski

Subject: [EXTERNAL] MEO Records Room Preaction

Ed/Steve/Hogan,

What was the final direction from COJ on the Records Room preaction fire sprinkler system? I understand that COJ would like to change the Records Room to a preaction fire sprinkler system, but I wasn't sure if they wanted to add an independent system, or if it would be an extension of the Data Room 2025 preaction fire sprinkler system. We are already very tight on space in the fire riser room, so if we are to add a separate preaction system, we would need another location for the second preaction valve/cabinet.

Thanks,

John Kauffman

Medical Examiner's Office District IV

Subject: REC- 27 JEA Manhole

Mr. LeBlanc

Here is our price and a brief description of work related to the proposed change order.

1. The JEA manhole was unknown during the bidding process. It was discovered when we met JEA onsite in June / July 2023.
2. Equipment rental of excavator and plate compactor.
3. Material purchase for dewatering.
4. Crane rental to set the 28,000 lb. manhole.
5. Labor for 1 week / 2 days for 3 guys.

Should we be given written directions to proceed, Perry McCall cost will be an additional Seventeen Thousand Five Hundred Eighty Seven Dollars & Zero Cents **$17,587.00**.

These prices are valid for fourteen (14) days from the date of this change order proposal.

Should you have any questions, please feel free to call.

Sincerely,

REGENCY ELECTRIC COMPANY, INC.

Sean Conley,
Sean Conley
Senior Project Manager

John Kauffman

Subject: FW: MEO RFI-155 Raised Access Floor at Gallery

From: Shane Biery <shane.biery@spectracf.com>
Sent: Thursday, November 16, 2023 14:45
To: John Kauffman <jkauffman@perry-mccall.com>
Cc: Jason LeBlanc <jleblanc@perry-mccall.com>; Jarrett Flythe <jflythe@perry-mccall.com>
Subject: Re: MEO RFI-155 Raised Access Floor at Gallery

John,

There is no change in pricing for the material going in 'Stairwell 1085A' and 'Stairwell 1068C'.

There will be a credit for the elimination of the LVT where the RAF is to have a factory applied finish. We originally had 925SF figured for LVT-5, but with the changes made, we now only have 250SF figured.

The savings for the 675SF that has been eliminated will be $5,379.75.

If your team will send a deductive CO for this amount, we will get it signed and sent back over. Let me know if you have any questions about this or if you need anything else from me on this item. Thank you!

Below is the line from our proposal for reference.

Item Description	Color	Qty	UOM	Unit Price	Extended
Supply and Install LVT-5 -Mannington Uninterrupted Wood 'Silver Oak' -Herringbone patten	TBS/To Be Selected	925.00	SF	$7.97	$7.3

RFI Transmittal

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville – Medical Examiner's Office 44464.01	DATE SENT	10/30/2023
SUBJECT:	Raised Access Floor at Gallery	RFI ID:	0155
TYPE:	RFI	TRANSMITTAL ID:	01344
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION:

Sheets A702 and S302 show the Gallery 1068, 1068A, 1068B to be constructed with cold formed metal framing and slab on deck. Sheet M300 shows (4) ACVs and associated ductwork under this gallery platform. The ACVs will require maintenance access, and the size of the duct relative to the height of the platform will require installation of the duct prior to the platform and will prevent access to the duct in the future.

1. Would it be acceptable to change this elevated platform at the Gallery, including the ramps and steps to a raised access floor system at no additional cost? Please see the attached product data for a Tate bolted stringer system with Concore 1250 panels as an example.

2. If it is acceptable to change to a raised access floor system, please provide a revised flooring selection in lieu of the LVT-5 plank flooring shown on I002. Below are links to some examples of available factory applied resilient flooring that can be provided with the 2x2 RAF panels and still allow access at each panel - we can also look for other options if there is a particular finish to match that would be available in a 2x2 format.

SUGGESTION:

ANSWER:

Response (Answered) from: Kim Murphy (GMHILL Design Build)
Remarks:
GMH Response to RFI 155 questions 1 and 2:
No structural objections to substitution. Architect to verify.
System must meet or exceed loading requirements per structural drawings.
Provide complete system submittal for review.
Coordinate with delegated light gauge designer.

Response (Answered) from: Mary Couch (Gresham Smith)
Remarks:
Please refer to review responses by both GM Hill Engineering and

RFI Transmittal

Item 6

DATE: 10/30/2023
ID: 01344

Gresham Smith for raised access flooring system.

1. Would it be acceptable to change this elevated platform at the Gallery, including the ramps and steps to a raised access floor system at no additional cost? Please see the attached product data for a Tate bolted stringer system with Concore 1250 panels as an example.

GS Response: The proposed Tate bolted stringer system with Concore 1250 panels raised access flooring is acceptable as reviewed with MEO on 10/20/23 conference call with Gresham Smith per Tim Crutchfield and Dr. Pietak with follow-up clarification questions as responded to by Perry-McCall.

2. *If it is acceptable to change to a raised access floor system, please provide a revised flooring selection in lieu of the LVT-5 plank flooring shown on I002. Below are links to some examples of available factory applied resilient flooring that can be provided with the 2x2 RAF panels and still allow access at each panel - we can also look for other options if there is a particular finish to match that would be available in a 2x2 format.*
https://www.forbo.com/flooring/en-us/products/esd-cleanroom-flooring/colorex-sd/colorex-sd/b7iexw
https://flexcofloors.com/delane-esd-vinyl/

GS Response: At Gallery 1068 and Family Viewing 1068A utilize Flexco Delane ESD solid vinyl floor tile, Color: Lt Beige/Tan 47. At Ramp 1068B utilize specified LVT-5 (Mannington Uninterrupted Wood, Silvered Oak (UN202)) (to be field applied per PMC/RAF manufacturer response on 10/25/23 email). Contractor to verify with RAF manufacturer the thickness of LVT-5 will be acceptable to integrate with the RAF system at ramp and provide smooth transition between flooring types at ramp to Family Viewing. For Stair 1085A and Stair 1068C to Gallery utilize Flexco Distinct Designs, Evolving Styles series, Color: French Gray with Black CE-103, hammered finish at stair treads (and integrated nosing as applicable with RAF system). Contractor to verify Flexco product types and integration of RAF stair tread, riser, nosing type with flooring noted for coordinations and transitions between flooring types/rooms. Stair landings 1085A and 1068C to receive Flexco Distinct Designs, Evolving Styles series, Color: French Gray with Black CE-103, smooth finish at stair landings. Contractor to confirm Flexco preferred tile sizes at Stairs for RAF system manufacturer for application.

Perry McCall to review all flooring type/color/series modifications with COJ/MEO for final approval as requested by COJ for all finish materials at raised access flooring areas.

Thank you,

Mary Couch

Gresham Smith

Response (Answered) from: Eric Eng (Eng Engineering, Inc.)
Remarks:
Topic discussed in meeting 10-26-23. Mechanical engineer prefers raised floors to access HVAC equipment. Final approval on raised floors to be made by Architectural.

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

Bolted Stringer Understructure for ConCore® and All Steel Access Floor Panels-24". Type 1A Pedestal

PEDESTAL SPECIFICATIONS

Pedestal Assembly

- Assembly up to 36" FFH shall provide an 6,000 lb. axial load without permanent deformation.
- Assembly shall provide a 2" total adjustment with a floor height of 7" or greater.
- Standard finished floor heights from 6" to 36". For other finished floor heights please contact the Tate Technical Hotline @ 800-231-7788. For seismic conditions, refer to seismic submittal details.
- Overturning moment of 1,000 in./lbs. when Tate recommended pedestal adhesive is utilized.
- All pedestal components and fasteners are completely electro-zinc free.
- Zinc electroplating shall be prohibited on all pedestal components and fasteners.

Pedestal Head

- Standard head is 11 ga. die formed galvanized steel pedestal head and resistance welded stud with adjustment nut. Heavy duty head for CC2000 and CC2500 panels is 8 ga. fillet welded for field and tack welded perimeter head. Head and installed stringers shall provide perimeter support for panel.
- Stringers shall be attached with 1/4" - 20 flat-head screws.
- Pedestal head shall be tapped for engagement of stringer screws with (4) ¼" diameter holes for mechanical fastening applications.
- Steel stud shall be 3/4" - 10 UNC.
- Nut shall be 3/4" - 10 UNC with corrosion resistant coating.
- Stud shall provide an anti rotation feature when engaged with the pedestal base assembly (7" FFH or higher).

Pedestal Base

- Base to be at least 16" square and galvanized steel with (4) ¼" diameter holes for mechanical fastening applications.
- Pedestal tube shall be 7/8" x 17 ga. wall square galvanized tubing.

Stringers

- Heavy duty roll formed steel stringer will withstand 450 lb. mid-span load.
- ConCore 2500 panels require the 4' x .054" stringer. All other panels except the ConCore 3000 use the .048" stringer
- Galvannealed stringer construction to prevent corrosion.
- Stringer shall be 1-1/4" deep x 3/4" wide.
- Stringer grid pattern shall be 2'/2', 2'4', or 4'/4' basketweave.

Perimeter

- Perimeter pedestal shall provide support for panels around columns, at walls, curbs and fascia.

Bare Painted Panel Options

- ☐ Bare Painted Finish to accept carpet tile application
- ☐ Bare Painted Finish to accept PosiTile application

CORNER DETAIL

Bare Panel

Laminated Panel With Integral Trim

System Performance Criteria

System performance criteria are the most important to consider because they represent the performance in a typical installation. Panel only criteria such as concentrated load is often used to specify floor systems however, the test is not representative of an actual installation because it is performed with the panel resting on blocks, not actual understructure.

System Performance Criteria (Tested on Actual Understructure)*

System Type		SYSTEM WEIGHT	STATIC LOADS			ROLLING LOADS		IMPACT LOADS
Panel	Understructure		Design Loads	Ultimate Loads	Safety Factor	10 Passes	10,000 Passes	
ConCore CC1250-24"	Posilock	8.5 lbs / ft² 41 kg / m²	1250 lbs 567 kg	Min. 2500lbs Min. 1134kg	Min. 2	1125 lbs 510 kg	875 lbs 397 kg	150 lbs 68 kg
	Bolted Stringer	10.0 lbs / ft² 49 kg / m²	1250 lbs 567 kg	Min. 2500lbs Min. 1134kg	Min. 2	1000 lbs 454 kg	800 lbs 363 kg	150 lbs 68 kg

1. All load tests are performed using the CISCA Recommended Test Procedures for Access Floors with the exception of Design Load. Design Load capacities are verified using the CISCA Concentrated Load procedure (with loads applied through a 1" dia. indentor at the weakest point) but with the panels supported by actual understructure rather than steel blocks. (Tests on panels supported by blocks are not representative of panel or system performance in actual installations.)

2. Safety factor is Ultimate load divided by Design load.

Subject: REC-20A - (RFI-101 -Additional Communication Site Conduits)

Mr. LeBlanc

Here is our price and a brief description of work related to the proposed change order.

1. We have added the additional site conduit per the marked up drawing sheet G100 which is attached. Regency has included the new conduit as schedule-40 with no concrete encasement. The Sch-80 PVC which was included in our base contract has been credited in this change order and replaced with Sch-40 with no concrete encasement.
2. There will be (2) additional 24"x36" handholes which have been included as the same handhole types we included in our base and submitted with 26_0533 submittal.
3. We have included the new North bound PVC as 2" with pull string from room #1063 and added 2-2" runs going East out of room #1113.
4. (1) of the East bound 4" PVC conduits has been included with 3-cell Maxcell and pull-string in the other.
5. No additional cables or wires have been included in this change order.

Should we be given a written direction to proceed, Perry McCall's addition cost will be Thirty Thousand Two Hundred Fifty Dollars and Zero Cents **$30,250.00**

These prices are valid for fourteen (14) days from the date of this change order proposal.

Should you have any questions, please feel free to call.

Sincerely,

REGENCY ELECTRIC COMPANY, INC.

Item 7

Attention: Sean Conley

Project: COJ Medical Examiners Office
P.O.# 52435
Change Order: #02

Auza Consulting Corp. proposes to provide additional BIM Services work for the subject change as indicated on the change documents and by the attached Scope listed in Exhibit A and per the project's contract documents RFI-101 Site Telecom Conduits Not Shown on E010, listed in Exhibit B, for addition to our contract in the amount of:

Dollars.....$1,300.00

This proposal is subject to the terms and conditions of the main agreement/contract for the above referenced project.

This proposal is based solely on the usual BIM Services cost to perform the work and does not include changes in the schedule that may result from implementing this change.

Very truly yours,

Roberto Auza

Qualifications & Clarifications

4 Sheets E310 to E327 appear to cover the technology, security, and AV scope in Addendum 04. There were also Technology sheets TA-000 to TA-112 in the Permit Set that were not re-issued in subsequent Addenda. The TA sheets are excluded.

5 Generators are included as Cummins 1250kW Tier 2 with a prime rating of 1131kW (1700A continuous). To change the generators to Caterpillar in lieu of Cummins, add $30,570.

6 The generator bi-fuel system will be field installed by Coastline Power Solutions and is not available directly from the generator manufacturer and will not have an EPA certificate. Warranties are included for the generator and for the bi-fuel components, but a single warranty for the complete generator system is not available with the bi-fuel system. A credit can be provided to delete the bi-fuel option, with a remaining generator run time of ~50 hours on diesel only.

7 Concrete encasement is included for the main site telecommunications conduits where they are open-trenched. Concrete encasement is excluded for all bored telecommunications raceways and all other underground electrical raceways such as power ductbanks and site lighting and low voltage. $13,800 BUDGET

8 POE lighting is included with (1) Cat-6A cable per fixture. Redundant or dual-cabling is excluded. Additional tray is included where required to fit the project cabling (such as the first floor areas closest to the data room), however additional trays for future are excluded.

9 POE lighting switches are included from Presidio as 90W UPOE+ Cisco Catalyst 9000 48-port switches per email direction provided by COJ 05/11/2023. Switch counts have been reduced to (22) based on the 48-ports in lieu of the 24-port switches shown on the MHT switch schedules.

10 IT equipment is included from Presidio per the Estimate ID YH138895880DR per email direction provided by COJ 05/11/2023, which is understood to supersede E704 Equipment List Items #27-45, #51-54.

11 Manufacturer's standard warranties, typically one year or as detailed below, plus a 5-year service agreement direct with the electrical contractor, are included in lieu of 5-year bumper to bumper warranties. The value of the service agreement is included in the estimate at ($345,000), with the understanding that the cost and scope for the service agreement will be credited to the Owner and the service agreement will be made directly between the Owner and the electrical contractor.
Generator (Excludes Bi-Fuel): 5 year
Light Fixtures: 5 year
POE Nodes: 5 year
Switchboards: 3 years
SPDs: 10 years
Lenel Access Control: 3 years
Axis Cameras: 5 years
DITEK Surge Suppression: 10 years
Aiphone: 2 years
Beldon Mohawk: 25 year limited application

12 UPS's are included as (2) 100kVA with 30-minute battery run time. The E704 Equipment List Item #24 for (8) 100kVA UPS's is excluded.

13 The security system does not include video storage servers, these are understood to be included in the COJ IT provided network equipment and server selections. Any additional security system switches and servers are excluded.

14 The fire alarm system is included with Class B wiring per sheet E501, and not Class A per specification 28 4621.11.

Sitework

1 Estimate includes unsuitables excavation & haul off of 3,771 CY.

2 Unsuitable or contaminated soil identification, unforeseen subsurface conditions (including but not limited to rock, extensive concrete/asphalt etc.), over-excavation, removal, demucking, disposal, remediation, or replacement with suitable fill above 3,771 CY, or above and beyond what may be outlined in the Geotech Report is excluded.

3 C200 does not show grades from the typical back of curb to the site wall at the East side of the property. We have included the grade sloping immediately from back of curb at a 4:1 to meet the existing grade, for an even grade (at existing elevation) on both sides of the security wall.

John,

This looks good, but a couple of corrections.

CR-10

Item 7

1. Conduits leaving rooms 1063 and 1113 can terminate in the same HH at the property line.
2. 18 strand Single-mode fiber. I think the Manufacturer has stopped making the 18 strands and only makes 24 strands now.
3. The conduits for the future Radio tower need to stay. (If you would like to save some money these 2 conduits can be changed to 2" instead of 4")

Thanks,
MarkT

Mark,

Does the attached capture what you are expecting? I used the architectural sheet since it shows all the roadway locations/names the clearest. Also, I got the RFI response confirming no concrete encasement, but I should have also asked in the RFI to confirm schedule 40 PVC conduit – is that acceptable, or is schedule 80 required?

Thanks,

John Kauffman

John,

Per our conversation, we will follow what is in the GMP.

1. The conduits leaving room 1063 will be the 4"

Item 7

2. The conduits leaving room 1113 will be the 2"
3. The conduits for future use I will discuss with COJ about removing them.

Thanks,
MarkT

Cc: Edward Eng <ejeng@engengineering.com>; Daryl Weinstein <DWeinstein@coj.net>; Jason LeBlanc <jleblanc@perry-mccall.com>
Subject: MEO Site Telecom Conduit Sizes

Mark,

Can you clarify which, if any, of the site telecom conduits should be 4"? The RFI-101 response indicates (2) 4" to the north property line, (2) 4" to the east property line, and (2) 4" to the south property line (with 2-2" extending to the traffic signal box from the south property line). We received the attached riser diagram through Tietjen that shows (2) 2" for all locations in lieu of any 4".

Thanks,

John Kauffman

PURPOSE:	Answered	VIA:	Info Exchange

QUESTION:

1. We understand that the Owner is requesting an additional 2" conduit to be run from Data Room 1063 to the "back of the property" for future radio tower connection. Please confirm the conduit size and provide the locations for the stub-ups at Data Room 1063 and at the future radio tower location.

2. We understand that the Owner would like to add a 2" conduit from the tenant data room to the property line. Please confirm that this conduit should stub-up in IT Room 1113 and extend to the same handhole on Davis Street shown on E010 for the conduits from Data/Comm 1063. If not, please provide the locations for the stub-up inside the building at at the property line.

3. Sheet E704, Cabling item T calls for 2-2" conduits from Data Room 1063 to the property line and extending to the existing Traffic Engineering handhole. We understand that the extension to the property line is at the handhole indicated on E010 at Davis Street. Would it be acceptable to route these 2-2" conduits from Data Room 1063 to a handhole at the property line along Golfair to reduce to the total run from the MDF to the Traffic Engineering handhole, see below Google Earth mark-up?

COJ Medical Examiner Infrastructure Specifications for EF Conduits

I. Conduits

A. There shall be 2-4" conduits running from the EF (Entrance Facility) room 1063 to the East property line as well as the South property line. Conduit will terminate in a 24" x 36" bottomless handhole (HH). 1 Conduit running to the East & South property line will have a 3 Cell Maxcell installed.

B. There shall be 2- 2" conduits running from IT Room 1113 to the East Property line. Conduits will terminate in a 24" x 36" bottomless HH.

C. There shall be 2-2" conduits running from the HH on the south property line and connect the new Handhole within 5' of the existing Traffic Engineering HH. The Traffic Engineering HH and the new COJ HH will be connected with 2-2" conduits.

D. There shall be 2- 4" conduits from Data/Comm Room 1063 to the North Property line. Conduits will terminate in a 24" x 36" bottomless HH.

RFI Transmittal

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville – Medical Examiner's Office 44464.01	DATE SENT:	10/5/2023
SUBJECT:	Site Electrical & Telecom Ductbank Concrete Encasement	RFI ID:	0141
TYPE:	RFI	TRANSMITTAL ID:	01149
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION: Plans and specifications appear to show direct buried conduit for site electrical and telecom ductbanks. Please confirm that site electrical and telecom conduit ductbanks are not required to be concrete encased.

SUGGESTION:

ANSWER:

Response (Answered) from: Eric Eng (Eng Engineering, Inc.)

Remarks:

PVC conduits buried a minimum of 2 ft. below bottom of limestone underlayment do not require concrete encasement.

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

Date: 11/27/2023
Job: 23-002--Medical Examiners Office

Description: Omit Materials Testing & Commissioning Agent by Owner

We are pleased to offer the following:

Omit Materials Testing budget and Commissioning Agent budget for scopes to be provided by the Owner. Note the Materials Testing subcontract would have been for a JSEB, however the Owner's material testing consultant (AE Engineering) is a JSEB also.

The total amount to provide this work is.....$ -125,638.00

(Please refer to attached sheet for details.)

THIS CHANGE INDIVIDUALLY MAY OR MAY NOT EFFECT THE COMPLETION DATE AND MAY OR MAY NOT COST ADDITIONAL JOBSITE AND HOME OFFICE OVERHEAD/EXTENDED GENERAL CONDITIONS. CUMULATIVE CHANGES TEND TO EFFECT COMPLETION DATES AND OVERHEAD COSTS WHICH CAN NOT BE DETERMINED ON AN INDIVIDUAL BASIS. THEREFORE, WE CAN NOT DETERMINE THE IMPACT OF THIS PROPOSAL AT THIS TIME. BE AWARE THAT CUMULATIVE CHANGES WILL BE ANALYZED LATER WHEN IT BECOMES APPARENT THEY ARE/OR HAVE EFFECTED THE SCHEDULED & COST. THERESORE, WE RESERVE THE RIGHT FOR COMPENSATION OF ADDITIONAL CONTRACT TIME EXTENSION AND EXTENDED FIELD/HOME OFFICE OVERHEAD GENERAL CONDITIONS COST.

THIS PROPOSAL MAY BE WITHDRAWN IF NOT ACCEPTED WITHIN SEVEN (7) DAYS OF THE DATE OF THIS CHANGE REQUEST.

RFI Transmittal

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville – Medical Examiner's Office 44464.01	DATE SENT:	11/17/2023
SUBJECT:	Existing Trees & Wall at FDOT Fence	RFI ID:	0142
TYPE:	RFI	TRANSMITTAL ID:	01500
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION:

Sheet L-1.02 shows a group of existing trees to remain along the plan North edge of the property near the generator yard area along the FDOT fence. From L-1.02 it appears that these trees are outside of the property. Sheet C100 shows the site perimeter wall along the edge of the property line at the generator yard area. Please see the attached plan mark-ups with photos included. These trees are on the MEO side of the FDOT fence and they are in conflict with the new wall location - the stakes shown in the photos are for the centerline of the wall.

Please advise on how we are to proceed.

SUGGESTION:

ANSWER:

Response (Answered) from: Joseph Lesso (GAI Consultants)
Remarks:

GAI recommends to remove the trees and keep the wall in its current proposed location. The updated tree mitigation plan with a separate fee table for FDOT trees has been added. The FDOT fee information reflected on the plans was provided by FDOT. FDOT indicated that the fees must be paid before the trees can be removed. Below are the details provided by FDOT for paying these fees:

Check must be mailed to Jacksonville Office with ATTN to Jason Quijano. Payments can be made by check to the Florida Department of Transportation. Please include the permit number in the memo area of payment and mail to:

RFI Transmittal

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville – Medical Examiner's Office 44464.01	DATE SENT:	11/27/2023
SUBJECT:	Existing Trees at Site Water BFPs & Sidewalk	RFI ID:	0165
TYPE:	RFI	TRANSMITTAL ID:	01538
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION: Sheet C400 shows the new JEA water crossing at Davis Street for the fire, domestic, and irrigation backflow preventers and meters to be behind the curb to the plan west of the plan west entry drive from Davis Street. A new sidewalk is also shown in this area along the plan west edge of the site tying into the Davis Street sidewalk. Sheet L-1.01 shows two existing to remain trees in this area, tree #01 and #10. The new sidewalk is a direct conflict with these existing tress, and in the on-site meeting on 11/1/23, COJ's arborist, Early Piety of Specialty Tree Surgeons, indicated that any excavation behind the curb for the water install in this area would cause considerable damage to the existing trees and if the trees are to remain the water piping, backflow preventers, and meters would need to be relocated to the opposite side of the drive. Please advise on how to proceed. If the trees are to be removed, please provide the revised tree mitigation plan and calculations. If the pipe and sidewalk are to be relocated, please provide the revised drawings and JEA acceptance/easement revisions. Please note that we are proceeding with the water main tap and Davis Street crossing as scheduled for 11/10/2023 with JEA unless directed to stop this work.

Item 9

RFI Transmittal

DATE: 11/27/2023
ID: 01538

SUGGESTION:

ANSWER:

Response (Answered) from: Joseph Lesso (GAI Consultants)

Remarks:

The trees are to be removed, as they are in conflict with the sidewalk and utilities. Please see the revised Landscape and Irrigation plans for updated mitigation plans and calculations.

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

PROJECT:	City of Jacksonville - Morgue 44464.01	DATE SENT:	5/8/2023
SUBJECT:	Mechanical - Gasifier/Vaporizer selection detail	RFI ID:	017
TYPE:	RFI	TRANSMITTAL ID:	00121
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION: **M010** Please provide equipment selection and details for the gasifier/vaporizer.
If concrete pads, electrical or any other connections are required, please include on the appropriate discipline sheets.

SUGGESTION:

ANSWER:

Response (Answered) from: Eric Eng (Eng Engineering, Inc.)
Remarks:
The vaporizer is not necessary. The tanks create +50 psig of pressure at 32 degrees F.

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

QFL68853.23	QFL68853.23C

1.2 Potential Change Impact:

(Mark with "X" applicable items)

[X] Cost [ ] Schedule [ ] Installation [ ] Freight [ ] Storage [ ] Engineering Time

1.3 Origin of Change: RFI

(Submittal, Email, Addendum, Meeting)

2.0 DETAIL CHANGES BELOW

Original Quote – QFL68853.23

Custom Cooler # 1036: $331,420.96
Custom Cooler # 1037: $322,994.11
Custom Cooler # 1038: $333,695.66
Custom Cooler # 1045: $254,537.35
Custom Freezer # 1018: $102,246.69

Cooler & Freezer Subtotal: $1,344,894.77

Revised Quote – QFL68853.23C

Custom Cooler # 1036: $353,627.82
Custom Cooler # 1037: $358,854.74
Custom Cooler # 1038: $368,541.68
Custom Cooler # 1045: $251,463.21
Custom Freezer # 1018: $97,046.69

Cooler & Freezer Subtotal: $1,429,534.14

Additional Equipment Amount to be Added via Change Order: $84,639.37

The additional amounts for cooler #'s 1036, 1037, & 1038 are in part due to:

Adding an additional humidifcation system, including carbon filter system. The use of the refrigeration system to dehumidy is no longer acceptable per DOE (2020 Law). Scientific exemption is no longer valid for these projects.

RFI Transmittal

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville - Morgue 44464.01	DATE SENT:	8/10/2023
SUBJECT:	Cold Storage Clarifications	RFI ID:	099
TYPE:	RFI	TRANSMITTAL ID:	00673
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION:

1. The cold storage manufacturer has requested the following information in order to complete their design for each of the five cold storage rooms (1018, 1036, 1037, 1038, and 1045):

1a. Please confirm that the ambient air temperatures shown on M002 are correct and will not change for all rooms and corridors that border any of the five cold storage rooms. Please note, this refers to rooms 1014, 1016, 1020, 1076A, 1044, 1046, corridors 1078, 1079, 1080, 1083, 1085, and dock 1117; which includes unconditioned spaces at the BSL3 dock and electric room.

1b. Please provide the design ambient air temperature for the above ceiling space at each cold storage room.

1c. What is the intended humidity level in each of the five cold storage rooms?

1d. Sheet M003 does not show any pressurization for the five cold storage rooms. Please confirm that these rooms should be neutral with no pressurization.

1e. Approximately how many pounds of bodies will be stored in each of the cold storage rooms at any given time?

1f. Approximately how many times per day will the doors to each of the cold storage rooms be opened?

1g. How long shoudl the door remain open for each of the cold storage rooms once it is opened?

1h. Amendment 1 shows a hand wave device or card reader on both interior and exterior of cold storage rooms 1036, 1037, 1038 with auto sliding doors. The Freezer and BSL3 Cooler appear to be shown with manual swing doors and no card readers or hand waves. Please confirm that the Freezer and BSL3 Cooler should have manually operated swing doors with no access controls or auto operators.

1i. Please advise if the lights within each of the cold storage rooms should be controlled via switch, motion sensor, tied to the door hand waves, or some other means of lighting control.

Item 11

RFI Transmittal

DATE: 8/10/2023
ID: 00673

1j. The cold storage manufacturer has advised that all light fixtures within the cold storage rooms, supplied by Mopec, are line voltage. Please confirm that MHT will provide controls for these fixtures if needed with relays controlled by the POE system.

2. The cold storage manufacturer has advised that dehumidification cannot be achieved as indicate din spec 13 2126, 2.6A due to Department of Energy regulations from 2020 that do not allow the refrigerant evaporators to be used for dehumidification. Please confirm that this dehumidification and filtration function is not required. If it is required, please advise if a separate dehumidification system with charcoal filters for odor control can be designed for the units.

3. The current design indicates 100% redundancy of the refrigeration system for the four coolers, but not for the freezer, which is shown with a single evaporator. Please advise if the freezer will require 100% refrigeration redundancy, and if so please provide the revised design documents indicating this redundancy.

SUGGESTION:

ANSWER:

Response (Answered) from: Eric Eng (Eng Engineering, Inc.)
Remarks:

1. Cold Storage Space Conditions
    a. All the space/zone temperatures shown on Dwg M-002 remain unchanged.
    b. The temperature above the cooler is assumed to be 86F.
    c. The relative humidity of the storage areas should range from 40% to 60% RH.
    d. The pressure in the storage areas will be neutral.
    e. Each storage room will hold 10,000 lbs. of cadavers.
        i. 10 racks of 5 shelves with 200# bodies
    f. Expect 30 openings per day for each room under peak loads.
    g. Expect the door to be open for 30 seconds.
    h. Provide manual doors.
    i. The lights will be controlled by a motion sensor.
    j. PMC to coordinate with MHT on fixture controls.
2. Dehumidification
    a. No dehumidification is required.
3. Freezer Redundancy
    a. Yes, provide a redundant freezer compressor.

Tim clarified 45 bodies max per main cooler and 32 bodies in BSL3.

RFI Transmittal

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville – Medical Examiner's Office 44464.01	DATE SENT:	10/2/2023
SUBJECT:	Cooler Body Rack & Tray Clarifications	RFI ID:	105.1
TYPE:	RFI	TRANSMITTAL ID:	01096
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION:

Please advise on the following clarifications based on the RFI-105 Cooler Body Rack & Tray Quantities Response dated 09/05/2023.

1. The RFI-105 response references "Nortech T2636" body trays for the CRCK22 storage racks and says the cut sheet for the trays are attached, but we did not receive the cut sheets for the trays. If this was referring to Mortech T3626 body trays, it appears that these are stainless steel body trays. Later the RFI-105 response indicates that the trays are preferred to be plastic, but cut sheets are not provided. Please provide the product selection and cut sheets for the correct trays to be provided with the CRK22 racks.

2. The revised layouts for the three main coolers shows (24) gurney carts and trays per cooler. Please confirm if all of these carts/trays are to be provided as part of this project or if they are just shown graphically for maximum capacity of the coolers. If they are to be provided for the project, will these gurney carts and trays be typically stored in the coolers when they are not in use? If so, it appears that access to each tray within the coolers will require removing several carts each time, which may not be preferable.

3. The RFI-105 response included a cut-sheet for a Mopec HL215 C-Arm X-Ray Cart as the typical gurney cart. We understand that with the Lodox X-Rays in this facility the C-Arm style x-ray would not typically be required. Please confirm that this style of cart is intended for the typical cart within the coolers. If not, please provide a cut sheet for the selected gurney carts and trays.

4. Sheet Q001, Q101, and Exhibit A show CDVR11 in each of the Autopsy rooms as a Mopec DC100 Hydraulic Chassis Autopsy Cart with a stainless steel tray. Please confirm that these are to remain in scope for the Autopsy rooms, and only the cooler carts/trays are to be revised to the Mopec HL215 C-Arm X-Ray Cart with Plastic Tray indicated in the RFI-105 response. Or if not, please provide the revised selections for the Autopsy Room carts/trays.

SUGGESTION:

ANSWER:

Response (Answered) from: Walter Lawrence (Ross & Baruzzini | Mitchell Planning)

Item 11

RFI Transmittal

DATE: 10/2/2023
ID: 01096

Remarks:

1. The RFI-105 response references "Nortech T2636" body trays for the CRCK22 storage racks and says the cut sheet for the trays are attached, but we did not receive the cut sheets for the trays. If this was referring to Mortech T3626 body trays, it appears that these are stainless steel body trays. Later the RFI-105 response indicates that the trays are preferred to be plastic, but cut sheets are not provided. Please provide the product selection and cut sheets for the correct trays to be provided with the CRK22 racks.

Item 1 Response: Refer to Question 3 response-Per Tim Crutchfield, COJ the table tops should be able to be placed on the cantilever racks or a cart. This is MEO current setup. The table top is gray, plastic DA850.

2. The revised layouts for the three main coolers shows (24) gurney carts and trays per cooler. Please confirm if all of these carts/trays are to be provided as part of this project or if they are just shown graphically for maximum capacity of the coolers. If they are to be provided for the project, will these gurney carts and trays be typically stored in the coolers when they are not in use? If so, it appears that access to each tray within the coolers will require removing several carts each time, which may not be preferable.

Item 2. Response: Per Tim Crutchfield in coordination with the MEO requested revised gurney cart with tray layouts. All the gurney carts with trays are requested to be as shown on the updated plan provided to the Contractor which allows for maximum capacity, gurneys are moved around within the facility and would most likely not all be stored at the refrigerators at once to allow for movement of the trays and access within the refrigerators. MEO has additional storage areas available for unused carts.

3. The RFI-105 response included a cut-sheet for a Mopec HL215 C-Arm X-Ray Cart as the typical gurney cart. We understand that with the Lodox X-Rays in this facility the C-Arm style x-ray would not typically be required. Please confirm that this style of cart is intended for the typical cart within the coolers. If not, please provide a cut sheet for the selected gurney carts and trays.

Item 3. Response: Per Tim Crutchfield, COJ - After speaking with Dr. Pietak, please change to Mopec DA000 autopsy cart chassis with DA850 Grey Plastic x-ray. Website is https://www.mopec.com/product/autopsy-cart-chassis-da000-2/.

4. Sheet Q001, Q101, and Exhibit A show CDVR11 in each of the Autopsy rooms as a Mopec DC100 Hydraulic Chassis Autopsy Cart with a stainless steel tray. Please confirm that these are to remain in scope for the Autopsy rooms, and only the cooler carts/trays are to be revised to the Mopec HL215 C-Arm X-Ray Cart with Plastic Tray indicated in the RFI-105

Item 11

RFI Transmittal

DATE: 10/2/2023
ID: 01096

response. Or if not, please provide the revised selections for the Autopsy Room carts/trays.

Item 4 Response - The Autopsy rooms autopsy carts with stainless steel tray CDVR11 (Mopec DC100 Hydraulic Chassis Autopsy Cart with stainless steel tray) shall remain as specified in the scope for the Autopsy rooms per Tim Crutchfield, MEO.

Thank you,

Mary Couch
Gresham Smith

By responding to this RFI, we do not agree to any additional costs or time. Any additional costs or time shall be submitted in accordance with the Requirements of the Contract Documents.

Gresham Smith

Item 11 RFI Transmittal

Gresham Smith | 225 Water Street Suite 2200 Jacksonville FL 32202 United States

PROJECT:	City of Jacksonville - Morgue 44464.01	DATE SENT:	9/5/2023
SUBJECT:	Cooler Body Rack & Tray Quantities	RFI ID:	0105
TYPE:	RFI	TRANSMITTAL ID:	00888
PURPOSE:	Answered	VIA:	Info Exchange

QUESTION:

Sheet Q101 in the Permit Set showed (5) CRCK01 Body Racks in each of the four coolers including BSL3. In Amendment 01, Sheet Q101 now shows what appears to be (10) Body Racks with trays in each of the three main coolers, and (8) in the BSL3 cooler. There is an equipment tag CRCK22 which does not appear to be included on the Q001 equipment schedule - we are guessing the CRCK22 tag is for the trays and is obscuring the CRCK01 body racks on the drawing. In the RFI-099 review meeting on 08/10/2023, we understood from the MEO that they are only expecting (5) CRCK01 body racks in each of the three main coolers, and (4) body racks in the BSL3 cooler.

1. Please clarify the CRCK22 tag.
2. Please provide the quantity of body racks required for each cooler, including BSL3.
3. Please provide the quantity of trays required for each cooler, including BSL3.

SUGGESTION:

ANSWER:

Response (Answered) from: Walter Lawrence (Ross & Baruzzini | Mitchell Planning)
Remarks:
The originally planned CRCK01 body tray racks (cantilevered storage systems) were changed to CRCK22 body tray racks. The CRCK22 racks are drawn showing the Nortech T2636 standard body trays placed on each of the racks. Cutsheets for the CRCK22 storage racks and Nortech T2636 trays are attached here.

Response (Answered) from: Mary Couch (Gresham Smith)
Remarks:
The originally planned CRCK01 body tray racks (cantilevered storage systems) were changed to the CRCK22 racks. The CRCK22 racks are drawn showing the Nortech 7005-5SS 5-tier cantilever storage system. Cut sheets for the storage systems and gurneys with trays are attached within RFI response.

The Q101 sheet drawing issued with Amendment 01 for each refrigerator room including BLSL3 refrigerator showed an additional row of CRCK22 body racks in the middle of the room/trays beyond what was requested by the Owner (MEO). Lower row of racks/trays on Q101 plan and

Item 11

RFI Transmittal

DATE: 9/5/2023
ID: 00888

equipment schedule Q001 will be revised accordingly as part of Amendment 02 forthcoming to show gurney cart and body tray on each gurney, revised rack system layouts/quantities and additional body rack at BSL3 refrigerator room.

Please refer to attached updated sketch for racks, trays and gurneys layouts as discussed with Gresham Smith and Tim Crutchfield, Director of Operations on 8/31/23.
Gurney cart with tray cut sheets as selected by Tim Crutchfield are attached within RFI response.
Each gurney cart shall receive one body tray each. Two (2) Bariatric gurney carts with tilt tray shall also be provided at Refrigerator Room 1036. Five (5) Body trays for each cantilevered rack system shall also be provided and are preferred to be plastic type tray in lieu of stainless steel tray per Tim Crutchfield.

All final equipment shall be reviewed and approved by Owner prior to ordering.

Thank you,

Mary Couch
Gresham Smith

CADAVER HANDLING & STORAGE SYSTEMS

The cantilever storage system with casters is designed to support up to 300 lbs./136 kg. per level in a free-standing position. Casters allow mobility for transport or cleaning purposes. Manufactured from stainless steel or powder coated steel, these racks are designed for heavy-duty use with the following features and materials.

STANDARD DESIGN FEATURES

Powder Coated Steel Units/Overall Height

Model No.
7005-3PC 3 Tier ..... 44.56 in./113 cm.
7005-4PC 4 Tier ..... 61.06 in./156 cm
7005-5PC 5 Tier ..... 77.56 in./197 cm.

Stainless Steel Units/Overall Height

Model No.
7005-3SS 3 Tier ..... 44.56 in./113 cm
7005-4SS 4 Tier ..... 61.06 in./156 cm.
7005-5SS 5 Tier ..... 77 56 in./197 cm.

Vertical and horizontal columns are (Tubular steel)

Length: ..... 2 in./5 cm.
Width: ..... 3 in./7 cm.
Thickness: ..... 0.12 in./1 cm.

- Cantilever arms are .120 thick steel and are welded to the vertical columns
- Each tier will support in excess of 300 lbs./136 kg
- Finish is rust and corrosion resistant powder coated or stainless steel
- Units are equipped with heavy-duty 6 in./15 cm. diameter casters, front two with brake mechanism
- Cadaver lift accessible
- Adjustable Series 7005-A (Optional)
- The unit ships knocked down and requires assembly
