SUBJECT: POPE PLACE AND GOLD MERIT ASH DISPOSAL SITES REMEDIAL ACTION PLAN IMPLEMENTATION

BID #: CP-0092-22 **OPEN DATE:** 6 JULY 2022

GENERAL GOVERNMENT AWARDS COMMITTEE

KIND AND BASIS OF CONTRACT: CONSTRUCTION CONTRACT – FROM AWARD EXECUTION THROUGH COMPLETION

AGENCY: PUBLIC WORKS – SOLID WASTE DIVISION

BASIS OF AWARD: ALL OR NONE TO THE LOWEST RESPONSIVE, RESPONSIBLE BIDDER

NUMBER OF BIDS INVITED: 38 **NUMBER RECEIVED:** 2 **OTHER:** 0

SUMMARY OF BIDS AND RECOMMENDED ACTIONS:
Request approval of Change Order #1 in the amount of $711,893.88 for Capps Land Management and Material, LLC (contract #71977-22) due to increased depths and lateral dimensions of excavation and the attainment of additional site access agreements, hazardous waste remediation, and related ancillary tasks as indicated in the attached Scope & Fee Summary. Total revised not-to-exceed award amount will be $5,992,518.88.

This award will be funded from account 32104.157002.565051.000575.0000000.00000.0000000, executed by formal Change Order #1 through the Office of General Counsel, and processed via change order to PO-645933-22.

SUBJECT: Change Order #1 – Contract #71977-22, Bid #CP-0092-22 – PO645933-22
Capps Land Management and Materials, LLC
Pope Place and Gold Merit Ash Disposal Sites (Remediation)

The referenced contract was originally awarded to Capps Land Management and Materials, LLC in the amount of $5,280,625.00. Change Order #1, in the amount of $711,893.88 is necessary for Capps Land Management and Materials, LLC to proceed and is detailed in the attached letter and supporting documentation.

Accordingly, this is to request approval for Change Order #1 to Contract #71977-22 in the amount of $711,893.88. The revised maximum indebtedness to the City will be $5,992,518.88.

Funding for this project will be encumbered as follows:

ACCOUNTS	TOTAL
32104.157002.565051.000575.00000000.00000.0000000	$711,893.88

Subject: Gold Merit and Pope Place (GMPP) Remediation Change Order 1 Package
Contract# 71977-22

Dear Mr. Foster:

Please find enclosed the change order packet for the Gold Merit and Pope Place (GMPP) ash disposal sites (the Site) remediation project, Contract # 71977-22, Florida Department of Environmental Protection (FDEP) facility ID ERIC-14576. The Site is in central Duval County immediately south of the Ribault River and east of New Kings Road and is currently under active construction and requires a change order for the contractor, Capps Land Management and Materials, LLC (Capps) to proceed with the overall intent of remedial and regulatory closure in this residential area.

In general, the main cost elements of this change order package reflect increased depths and lateral dimensions of excavation due to contamination encountered and the attainment of additional Site access agreements, hazardous waste remediation, and related ancillary tasks such as sampling, testing, clearing/grubbing, debris removal, surveying, etc....that are outside of the original scope of work of the Capps contract in nature and/or extent at the Site.

For organizational purposes, the change order packet is organized into nine (9) sections (Capps Change Order #1-9, aka COJ Change Order 1 Package) based on task and/or parcel ID number pertinent to the Site:

City of Jacksonville Change Order Form in word format.

Capps Change In Scope – Additional Work Justification - reviewed and approved by CDM Smith Inc.

Capps Change Order Summary Spreadsheet – reviewed and approved by CDM Smith Inc.

Capps Backup Files to substantiate the Change Order. This includes a build-up of all labor, equipment and materials, and contract rates (if applicable) for each of the 9 sections. Note a

reductive change order (negative cost or credit) of $24,000 was applied to Capps Change Order #1 relating to the grinding of stumps.

This results in a net increase of **$711,893.88** to the Capps contract. In alignment with the original contract, Capps will execute the work on a lump sum or unit cost basis as appropriate. The period of service of the Capps contract has also been extended to accommodate the additional scope.

If you have any questions, please contact Clint Noble via email at noblecc@cdmsmith.com or phone at (904) 527-6715.

Sincerely,

Clint C. Noble, P.G., PMP
Senior Project Manager
CDM Smith Inc.

Pope Place and Gold Merit Ash Disposal Site

Change In Scope / Additional Work Requested

Change Order # 1

Change order request number 1 is additional cost associated with the processing, handling, and hauling of stumps that are considered contaminated waste per section 6 of the RAP and Appendix B /ERP General Permit Application. The stumps could not be processed on-site due to unforeseen buried debris being intertwined in the stumps and had to be hauled off site to the Land Fill as contaminated material per the Remedial Action Plan section 6. Cost for This Change in Scope has been provided under this change order as requested by the COJ. General Conditions, Section 20.34 Changes, Section 20.22 Survey and Conditions at the Site.

Change Order # 2

Change order request number 2 is additional work associated with the removal of unforeseen buried asbestos debris found during the original scope of excavation, Section 900 of the detailed scope of work, Section 3 Summary of Remedial Alternatives Evaluation Selection, and Refinement, and Section 5.2 Soil/Ash Excavation and Disposal of the provided RAP. The nonfriable asbestos was removed as requested by CDM Smith and the COJ under a wet removal. The material was then hauled to the Trail Ridge Landfill and disposed of as directed by CDM and COJ. Capps Provided all labor, equipment, materials, sub-contractors, and testing for the change in scope. General Conditions, Section 20.34 Changes, Section 20.22 Survey and Conditions at the Site.

Change Order # 3

Change order request number 3 is requested pricing for additional area on parcel 7 to be remediated outside of original scope of work per the RAP Figure 3-1, Figure 5-1, Figure 6-1 Final Remedial Action Areas. Additional work includes clearing, excavation, and remediation of requested area on parcel 7 as requested by the COJ and CDM Smith, General Conditions, Section 20.34 Changes.

Change Order # 4

Change order request number 4 is testing requested to delineate unforeseen hazardous concentrations of lead in cells WC-36 and WC-09, Capps was requested to provide complete hazardous waste confirmation sampling at WC-36-4 that fell outside the guidelines set forth in the RAP section 6.4.1 and collect samples to prepare a report for the wetland area on Parcel 4 at the Pope Place and Gold Merit site. This extra work and testing were requested by COJ and CDM Smith, General Conditions, Section 20.34 Changes, Section 20.22 Survey and Conditions at the Site.

Change Order # 5

Change order request number 5 is additional cost associated with the processing, handling, hauling and disposal of buried concrete debris. This work included all labor, equipment, and hauling of the excavation, processing, and removal of unforeseen buried concrete debris. All buried concrete debris were processed and hauled to Trail Ridge Landfill as requested by the COJ and CDM Smith. RAP Section 6.4.1 Excavation, Appendix B ERP General Permit Application, Section 20.34 Changes, Section 20.22 Survey and Conditions at the Site.

Change Order # 6

Change order request number 6 is requested pricing per COJ for the treatment and removal of WC-36 lead impacted soils on Parcel 4. This pricing includes all labor, equipment, and material to treat in-place Lead Contaminated Soils that exceed the limits in Section 900 Detailed Scope of Work and the Provided RAP. General Conditions, Section 20.34 Changes, Section 20.22 Survey and Conditions at the Site. RAP section 6.4.1

Change Order # 7

Change order request number 7 is requested pricing for additional area to be remediated outside of original scope per the RAP and RFP. Additional work includes clearing, excavation, and remediation of requested area on parcel 3,4 as requested by the COJ and CDM Smith. RAP Figure 3-1, Figure 5-1, Figure 6-1 Final Remedial Action Areas, General Conditions, Section 20.34 Changes.

Change Order # 8

Change order request number 8 is requested pricing for additional area to be remediated outside of original scope per the RAP and RFP. Additional work includes clearing, excavation and remediation of requested area on parcel 13,14. Parcels 13 and 14 were originally outside the scope of work and have now been added after the COJ has received access agreements from the owners. See Section 3 Proposal CP-0092-22 Base Bid Schedule, RAP Figure 3-1, Figure 5-1, Figure 6-1 Final Remedial Action Areas, General Conditions, Section 20.34 Changes.

Change Order # 9

Change order request made to expand the remediation excavation depth and lateral limits to remove contamination more fully on residential Parcel #9. Upon excavation, additional ash contamination was discovered outside of the bounds shown in the CAR completed by CH2M in 2004, and as incorporated into CDM Smith RAP 2019 drawings and contract documents. Additionally, structures will be removed to access contaminated soil and the owner compensated for the demolition of said structures.

Jeff,

After conversations with Jason after our meeting Friday we/CAPPS feel that we have encountered subsurface conditions that are materially different from the original Bid documents. Due to the unknow condition of significant buried debris that has become intertwined and grown into the stumps, at this time CAPPS is unable to mulch clearing debris (Roots and Stumps) as planned at the time of bid. CAPPS would have taken all mulched stumps to Trail Ridge with no disposal fee. CAPPS did not anticipate paying disposal fees and other additional cost for clearing and grubbing debris (Roots and Stumps) to be disposed of at Trail Ridge Landfill as solid waste. Per 6.2.4.2 of the RAP "Grubbed materials are assumed to contain contaminated soils and/or ash and will be disposed of at the Trail Ridge Landfill" It is our opinion that this is an unforeseen condition. As previously communicated we are prepared to start hauling activities this week and will need your guidance to move forward. Please call myself or Jason at your earliest convenience to discuss.

Thanks,

April Capps

Subject: RE: Asbestos Wet Removal

Jason,

I have discussed this with COJ.

Wet removal of this material is question will not be objected given the following conditions below and attached:

1. NDN reports that the asbestos is non-friable (see attached report).
2. The waste needs to be manifested as Ash-Impacted Debris (mixed debris/C+DD) under profile 414552FL (see attached protocol) at $41.43 per ton. It should be hand written on the manifest that it contains a portion of non-friable ACM.
3. COJ has not printed and signed any of these manifests yet under this profile.

They will need to be obtained in advance under your account. It does not appear that Capps has set up an account to incur and pay these fees.

This brings up the subject of the change order regarding unforeseen, buried conditions,
and in part, where tipping fees are incurred. If you believe the removal of this ACM falls
into the description below, it can be included in your change order request.

Below is the COJ's statement on the interpretation of waste issues / cost accounting for
your Contract # 71977-22:

After review of the RAP and the RFP, here is the Solid Waste Division's interpretation of the materials encountered at the Gold Merit Pope Place remedial action project:

Buried debris such as concrete with or without re-bar, bricks, asphalt shingles, wood, glass, metal, plastics, etc. greater than 2-inches in diameter shall be considered as unforeseen conditions and subject to a change order only for the amount of any additional processing effort required to get the materials into suitable transport trucks and for the tipping fees associated with these materials. Transport would not be considered for a change order since any buried material volume within the area(s) to be excavated where the buried debris is located would be required to be transport to TRLF regardless of what type of material it was/is (either ash, ash materials, ash soils or buried debris, etc).

Surface debris handling, loading, transport and disposal shall be the responsibility of the vendor since the site was available for inspection and the surface debris was known to be present during the bidding process and was the responsibility of the vendor to be included in their bid price.

Tree root mats and root balls shall either be ground up on-site and mixed with ash, ash soils or ash materials or whole root balls less than 10-feet in diameter and transported to TRLF for disposal for no tipping fees. Transport shall not be considered suitable for a change order since they would be required to be hauled off site anyway regardless of whether they are ground or whole.

Concrete with no rebar from 2.0-inches to 6-inches in diameter can be hauled to TRLF for no tipping fee.

The following waste profiles shall be utilized at the site for manifesting the waste:

409433FL - Impacted Soil, municipal incinerator ash (for daily cover, no charge)
414550FL - Ash impacted Concrete Debris (concrete 6" or less & no rebar, for landfill use, no charge)
414551FL - Ash impacted Yard Trash (processed/able to be processed yard trash 2" or

less suitable for use as daily cover, no charge)
414552FL – Ash impacted Debris (mixed debris (yard trash and/or C&DD w/ash, etc.) for
disposal, $41.43/ton)

Subject: Asbestos Wet Removal

Clint, good afternoon. Next Wednesday Capps will be removing the asbestos tiles that

were found in Parcel 8. In our meeting Tuesday we discussed a wet removal and using manifest already provided. Jeff mentioned we needed to let them know what day. I just
wanted to follow up and make sure we didn't miss any documentation on our end or special instructions before we send it Wednesday.

RE: Letter Report for Limited Asbestos Bulk Sampling
Gold Merritt Pope Place Ash Remediation
Jacksonville, Duval County, Florida

Dear Mr. Freeman:

The NDN Companies (NDN) is pleased to present this letter report summarizing the results of the limited asbestos bulk sample that were performed on materials collected from unearthed suspect material. According to Capps Land Management (client), the suspect material was discovered during excavation activities.

SCOPE OF WORK

Asbestos Bulk Sampling

On February 6, 2023, NDN's Asbestos Hazard Emergency Response Act (AHERA)-certified asbestos inspector collected bulk samples of non-friable gray transite tiles with associated black mastic and roof paper. NDN collected a total of two samples containing three homogeneous areas (HA) of suspect asbestos-containing materials for laboratory analysis in accordance with Environmental Protection Agency's (EPA) 40 Code of Federal Regulations (CFR) 61 Subpart M National *Emission Standards for Hazardous Air Pollutants (NESHAP)*. Site photographs are included in Appendix A.

Bulk asbestos samples were collected and placed in a uniquely labeled container and sent to EMSL Analytical, Incorporated (EMSL), who maintains accreditation by the National Institute of Science and Technology (NIST) through the National Voluntary Laboratory Accreditation Program (NVLAP). The samples were analyzed by Polarized Light Microscopy (PLM) with dispersion staining according to EPA Method 600/R-93/116 with a positive stop.

Results

The EPA defines an ACM as a material containing asbestos fibers with a concentration greater than 1%. PLM analytical results for sample number GMPP1-A indicated that asbestos fibers were detected in the samples. Sample number GMPP1-B was not analyzed due to positive stop. Laboratory analysis reports and chain-of-custody (COC) documents are included in Appendix B.

Regulatory Review

Due to the presence of asbestos please follow federal, state, and local regulations including but not limited to the following:

- The EPA's Asbestos NESHAP (40 CRF 61 Subpart M)
- Occupational Safety and Health Administration's (OSHA) Asbestos Standard for the Construction Industry (29 CFR 1926.1101)
- Florida Administration Code and Florida Administrative Register Rule Chapter 62-257 Asbestos Program

3740 St Johns Bluff Road South, Suite 10, Jacksonville, FL 32224 • 904-800 2671 • TheNDNCompanies.com

Conclusion

On February 6,2023, NDN conducted limited asbestos bulk sampling at the site. Two samples were collected and submitted to EMSL for PLM analysis. Based on PLM analytical results, asbestos fibers were detected. Professional Certifications are included in Appendix C.

NDN appreciates the opportunity to provide our asbestos services for this project. If you have any questions or need additional information, please contact us at (904) 800-2671.

Sincerely,

Emily Kuda, ASP
Project Manager

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method") but augmented with procedures outlined in the 1993 ("final") version of the method. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample. Estimation of uncertainty is available on request.

Samples analyzed by EMSL Analytical, Inc. Orlando, FL NVLAP Lab Code 101151-0

RE: Cost Proposal for Additional Sampling Parcel 4
Gold Merritt Pope Place Ash Remediation
Jacksonville, Duval County, Florida

Dear Mr. Freeman:

The NDN Companies (NDN) is pleased to submit this proposed cost estimate to provide the services necessary to delineate hazardous concentrations of lead in cells WC-36 and WC-09, complete hazardous waste confirmation sampling at WC-36-4, and collect samples and prepare a report for the wetland area on Parcel 4 at the Pope Place and Gold Merit site. These services are in addition to the scope of the executed agreement. The proposed scope of work and cost estimate for these services are detailed below:

SCOPE OF WORK

Hazardous Waste Delineation
NDN will collect a total of 20 soil samples in cells WC-36 and WC-09 to delineate the hazardous lead concentrations in each cell. The samples will be analyzed for total lead and lead with TCLP. NDN estimates the sampling to take 2 days with one Geologist and includes soil logging and preparation of maps to illustrate findings.

Hazardous Lead Delineation - **$8,480.50 total**

Hazardous Waste Excavation and Sampling
NDN will collect the samples necessary to confirm the extent of the hazardous lead concentrations at the WC-36 location. This will include at least 4 sidewall samples and one stockpile sample for TCLP Lead. The stockpile sample will be collected after the amendment is added to confirm classification as non-hazardous. The base of the excavation will be scanned with the XRF analyzer for confirmation. NDN will provide the personnel and documentation to support the excavation that was not included in the original agreement.

Additional Confirmation Sampling for Hazardous Waste Excavation - **$4,449.32 total**

Wetland Samples Parcel 4
NDN will collect 40 samples from cells 1,2, 4 and 5 in the wetland portion of Parcel 4. The samples will be collected from 5 locations at 0-1 ft and 1-2 ft depth intervals in each cell. Each sample will be analyzed for RCRA 8 Metals with TCLP. An addendum to the Waste Characterization Plan will

be prepared documenting the laboratory results, methodology, and soil lithology. The report will include the generation of maps and tables to illustrate the results of the investigation.

Parcel 4 Wetland Samples/Report - **$13,650.50**

The above proposed costs will be billed as unit price based on completion. If this cost estimate, which incorporates the attached General Terms and Conditions by reference, meets with your approval, please sign, and return the enclosed agreement or issue your purchase order accepting this proposal as your authorization to proceed. If you have any questions, please feel free to contact me at (904) 662-1050.

Sincerely,

The NDN Companies

Geoff Reichold, P.G. Principal

the NDN COMPANIES

AGREEMENT AND AUTHORIZATION TO PROCEED

Cost Proposal for Additional Deliverables Gold
Merritt Pope Place Ash Remediation
Jacksonville, Duval County, Florida

Reporting, Invoicing, and Payment Schedule

The NDN Companies, (hereinafter referred to as NDN), will invoice for work completed as a lump sum. NDN reserves the right to charge late invoices at a rate of 1-1/2% per month beyond 30 days. This cost estimate and pricing will be valid for 90 days from today.

Authorization to Proceed

If you are in agreement with the proposed scope of work, payment schedule, and incorporated General Terms and Conditions, please sign below indicating your acceptance and return a signed copy of this Agreement to our office. Upon receipt of authorization to proceed, NDN will begin work.

This document constitutes a legal contract under the laws of the State of Florida. The undersigned parties have reviewed this document and agree to the scope of work to be provided and the terms of the contract.

DATE: March 1, 2023

The NDN Companies

Geoff Reichold, P.G.
Principal

Capps Land Management

Mr. Jason Freeman, or
Authorized Representative

GENERAL TERMS AND CONDITIONS

SECTION 1: RESPONSIBILITIES

1.1 The NDN Companies, hereafter referred to as the "Consultant", has the responsibility for providing the services described under the "Scope of Work" section of the proposal, hereafter referred to as "Agreement", to that entity authorizing the Consultant to perform such work, heretofore referred to as the "Client". The work is to be performed according to accepted industry standards of care and is to be completed in a timely manner.

1.2 The Client or a duly authorized representative is responsible for providing the Consultant with a clear understanding of the project nature and scope. The Client shall supply the Consultant with sufficient and adequate information, including, but not limited to, maps, site plans, reports, surveys and designs, to allow the consultant to properly complete the specified services. The Client shall also communicate changes in the nature and scope of the project as soon as possible during performance of the work so that the changes can be incorporated into the work product.

SECTION 2: STANDARD OF CARE

2.1 Services performed by the Consultant under this Agreement are expected by the Client to be conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the Consultant's profession practicing contemporaneously under similar conditions in the locality of the project. No other warranty, expressed or implied, is made.

2.2 The Client recognizes that site conditions may change from those observed at the site at the time work is performed. Data, interpretations, and recommendations by the Consultant will be based solely on information available to the Consultant at the time of service. The Consultant is responsible for those data, interpretations, and recommendations, but will not be responsible for other parties' interpretations or use of the information provided.

SECTION 3: SITE ACCESS AND SITE CONDITIONS

3.1 The Client will grant or obtain free access to the site for all equipment and personnel necessary for the Consultant to perform the work set forth in this Agreement. The Client will notify any and all possessors of the project site that Client has granted Consultant free access to the site. The Consultant will take reasonable precautions to minimize damage to the site, but it understood by Client that, in the normal course of work, some damage may occur, and the correction of such damage is not part of this Agreement unless so specified in the Proposal.

3.2 The Client is responsible for the accuracy of locations for all subterranean structures and utilities. The Consultant will take reasonable precautions to avoid known subterranean structures, and the Client waives any claim against Consultant, and agrees to defend, indemnify, and hold Consultant harmless from any claim or liability for injury or loss, including costs of defense, arising from damage done to subterranean structures and utilities not identified or accurately located. In addition, Client agrees to compensate Consultant for any time spent or expenses incurred by Consultant in defense of any such claim with compensation to be based upon Consultant's prevailing fee structure and expense reimbursement policy.

SECTION 4: BILLING AND PAYMENT

4.1 Consultant will submit invoices to Client monthly or upon completion of services. Invoices will show charges for different personnel and expense classifications or will indicate a lump sum charge for services rendered.

4.2 Payment is due 30 days after presentation of invoice and is past due 31 days from invoice date. Client agrees to pay a finance charge of one and one-half percent (1.5%) per month, or the maximum rate allowed by law, on past due accounts.

4.3 If the Consultant incurs any expenses to collect overdue billings on invoices, the sums paid by the Consultant for reasonable attorney's fees, court costs, Consultant's time, Consultant's expenses, and interest will be due and owing by the Client.

SECTION 5: OWNERSHIP OF DOCUMENTS

5.1 All reports, boring logs, field data, field notes, laboratory test data, calculations, estimates, and other documents prepared by the Consultant, as instruments of service, shall remain the property of the Consultant.

5.2 Client agrees that all reports and other work furnished to the Client or his agents, which are not paid for, will be returned upon demand and will not be used by the Client for any purpose.

5.3 The Consultant will retain all pertinent records relating to the services performed for a period of five years following submission of the report, during which period the records will be made available to the Client at all reasonable times.

SECTION 6: DISCOVERY OF UNANTICIPATED HAZARDOUS MATERIALS

6.1 Client warrants that a reasonable effort has been made to inform Consultant of known or suspected hazardous materials on or near the project site.

6.2 Under the terms of this Agreement, the term "hazardous materials" includes, but is not limited to, hazardous materials (40 CFR 172.01), hazardous wastes (40 CFR 261.2), hazardous substances (40 CFR 300.6), petroleum products, polychlorinated biphenyls, mold and asbestos.

6.3 Hazardous materials may exist at a site where there is no reason to believe they could or should be present. Consultant and Client agree that the discovery of unanticipated hazardous materials constitutes a changed condition that may mandate a renegotiation of the scope of work. Consultant and Client agree that the discovery of unanticipated hazardous materials may make it necessary for Consultant to take immediate measures to protect health and safety. Client agrees to compensate Consultant for any equipment decontamination or other costs incident to the discovery of unanticipated hazardous materials.

6.4 Consultant agrees to notify Client when unanticipated hazardous materials or suspected hazardous materials are encountered. Client agrees to make any disclosures required by law to the appropriate governing agencies. Client also agrees to hold Consultant harmless for any and all consequences of disclosures made by Consultant which are required by governing law. In the event the project site is not owned by Client, Client recognizes that it is the Client's responsibility to inform the property owner of the discovery of unanticipated hazardous materials.

6.5 Notwithstanding any other provision of the Agreement, Client waives any claim against Consultant, and to the maximum extent permitted by law, agrees to defend, indemnify, and save Consultant harmless from any claim, liability, and/or defense costs for injury or loss arising from Consultant's discovery of unanticipated hazardous materials including any costs created by delay of the project and any cost associated with possible reduction of the property's value. Client will be responsible for ultimate disposal of any samples secured by the Consultant which are found to be contaminated.

SECTION 7: RISK ALLOCATION

7.1 Client agrees that the Consultant's liability for any damage on account of any error, omission, or other professional negligence will be limited to a sum not to exceed $50,000 or Consultant's fee, whichever is greater. If Client prefers to have higher limits on professional liability, Consultant agrees to increase the limits up to a maximum of $1,000,000 upon Client's written request at the time of accepting our proposal provided that Client agrees to pay an additional consideration of four percent of the total fee for the project or $500.00, whichever is greater. The additional charge for the higher liability limits is because of the greater risk assumed and is not strictly a charge for additional professional liability insurance.

SECTION 8: INSURANCE

8.1 The Consultant represents and warrants that it and its agents, staff and Consultants employed by it, is and are protected by worker's compensation insurance and that Consultant has such coverage under public liability and property damage insurance policies which the Consultant deems to be adequate. Certificates for all such policies of insurance shall be provided to Client upon request in writing. Within the limits and conditions of such insurance, Consultant agrees to indemnify and save Client harmless from and against loss, damage, or liability arising from negligent acts by Consultant, its agents, staff, and consultants employed by it. The Consultant shall not be responsible for any loss, damage, or liability beyond the amounts, limits, and conditions of such insurance or the limits described in Section 7, whichever is less. The Client agrees to defend, indemnify, and save consultant harmless for loss, damage, or liability arising from acts by Client, Client's agent, staff, or other consultants employed by Client.

SECTION 9: DISPUTE RESOLUTION

9.1 All claims, disputes, and other matters in controversy between Consultant and Client arising out of or in any way related to this Agreement will be submitted to "alternative dispute resolution" (ADR) such as mediation and/or arbitration, before and as a condition precedent to other remedies provided by law.

9.2 If a dispute at law arises related to the services provided under this Agreement and that dispute requires litigation instead of ADR as provided above, then:

(a) the claim will be brought and tried in judicial jurisdiction of the court of the county where the principal place of business is located and the Client waives the right to remove the action to any other county or jurisdiction; and
(b) The prevailing party will be entitled to recovery of all reasonable costs incurred, including staff time, court costs, attorney's fees, and other claim related expenses.

SECTION 10: TERMINATION

10.1 This agreement may be terminated by either party upon seven days' notice in the event of substantial failure by the other party to perform in accordance with the terms hereof. Such termination shall not be effective if that substantial failure has been remedied before expiration of the period specified in the written notice. In the event of termination, Consultant shall be paid for services performed to the termination notice plus reasonable termination expenses.

10.2 In the event of termination, or suspension of more than three months, prior to completion of all reports contemplated by this Agreement, Consultant may complete such analyses and records as necessary to complete the project files and may also complete a report on the service performed to the date of notice of termination or suspension. The expense of termination of suspension shall include all direct costs incurred by Consultant in completing such analyses, records and reports.

SECTION 11: ASSIGNS

11.1 Neither the Client nor the Consultant may delegate, assign, sublet or transfer his duties or interest in this Agreement without the written consent of the other party.

SECTION 12: GOVERNING LAW AND SURVIVAL

12.1 The laws of the State of Florida will govern the validity of these terms, their interpretation and performance.

12.2 If any of the provisions contained in this Agreement are held illegal, invalid, or unenforceable, the enforceability of the remaining provisions will not be impaired. Limitations of liability and indemnities will survive termination of this Agreement for any cause.

Subject: Haz Waste Stabilization Plan - Gold Merit Pope Place Site

Jason,

It has been determined that a portion of WC-36 grid has been classified as hazardous waste based upon further testing done by NDN via lead TCLP (see attached Map). This plan equates to less than 40 cubic yards to be excavated and mixed onsite. Also attached is the procedure we developed with COJ to address it by treating it onsite, conducting verification analytical, and then disposing at TRL as nonhazardous. We will need to notify DEP of this activity. This process has been established and implemented successfully at other ash sites around the City.

This likely triggers the need for a change order (or to add to the existing one in progress you are working on). We would like Capps/NDN to implement the attached plan.

We can discuss further on the call today,

Regards,

Amanda,

Please see attached for our additional costs related to the Haz waste Delineation, Haz Waste Excavation
and Wetland sampling on parcel 4.
These costs are all associated with additional work that CDM requested that was not in our original
scope of work.

Please let me know if you have any questions.

Thanks,

Subject: Free Flow 200

Jason,

The Free Flow 200 powder we will need for the Haz lead can be ordered here Treatment Products - Free
Flow Technologies, Ltd.

The plan says you will need 4% by weight. There is about 23 cubic yards of it so using 2,100 lbs per cubic
yard, you'd need about 2,000 pounds of it.

I sent them a request for information yesterday and haven't received a reply. If you need anything from
us just let me know.

GMPP Soil Remediation Project
Contractor Waste Management / Hauling Plan
1/24/23

The City of Jacksonville (City) has 4 waste profiles setup and approved for GMPP. They are as follows:

1. 409433FL – Impacted Soil, municipal incinerator ash (for daily cover, no charge)
2. 414550FL – Ash impacted Concrete Debris (concrete 6" or less & no rebar, for landfill use, no charge)
3. 414551FL – Ash impacted Yard Trash (processed/able to be processed yard trash 2" or less suitable for use as daily cover, no charge)
4. 414552FL – Ash impacted Debris (mixed debris (yard trash and/or C&DD w/ash, etc.) for disposal, $41.43/ton)

Ash Materials Waste Manifest Procedure to Trail Ridge Landfill (TRLF)

The ash materials have been previously classified in-place by Capps and the four ash disposal areas have been given a specific waste profile number. In general, after the generated ash materials have been tested for TCLP (1 per 500 cubic yards) and accepted by TRLF for disposal, the remediation contractor (RC, Capps) or the remediation oversight consultant (ROC, NDN) will submit a request to the City for the anticipated number of waste manifests for the amount of materials that have been stockpiled and tested that has passed or tested in place and passed that will require transport and disposal at TRLF. The City will need the trucking company name and address to print out the manifests. The City will need at least 3 business days lead time to prepare and sign the manifests.

The City signs the waste manifests as the generator in Section 16 of the waste manifest. The City does not date the signature for section 16. The RC or the ROC collects the City signed manifests after notification by the City that the manifests are ready.

After the materials have been tested for TCLP (1 per 500 cubic yards) and accepted by TRLF for disposal, during loading, the RC or the ROC will place the number of containers (1) in the "No." portion of section 12 and use DT for dump truck for the "type" portion, circle "cu yds" in section 14 and enter the approximate cubic yards in section 13 of the waste manifest. Tonnage will be provided on the scale ticket by the scale-house. The transporter then prints their name and signs section 17 of the waste manifest form including the month, day and year. The RC or the ROC will then collect generator number #1 copy (goldenrod) and give the rest of the waste manifest to the hauler.

When the hauler reaches the scale-house, the hauler hands the remaining waste manifest forms (white, green, canary, pink) to the scale house personnel. Once the inbound weight is established, the hauler leaves the scale house, the hauler proceeds to the "y" fork in the access road at the maintenance facility and turns right or north and proceeds around the expansion area to the yard waste processing area located along the west permitter road that is located just north of the current disposal cell.

After dumping the materials in the staging area, the hauler then proceeds back to the scale house to get weighed again to calculate the tonnage of the ash materials brought into the landfill. After weighing out, the scale house personnel will sign the waste disposal manifest in section 19 and return the canary and pink copies to the hauler who keeps the pink copy for their records and returns the canary copy to the RC

or the ROC for their records. The scale house keeps the white and green copies with the white copy going to Waste Management, the green copy going to the City. The scale house personnel will also at this time provide a copy of the scale ticket which will include the tonnage and the appropriate manifest number. Prior to leaving the yard waste processing area, the hauler must stop and dry decontaminate the interior of the dump bed using a broom and/or shovel.

To avoid having to go through the scale house on the way out, the hauler can elect to set up a tare weight for each of the trucks they intend to use. Tare weights are typically done using three runs over the scales at different dates and times to account for the fluctuations in fuel and other weighted items located the trucks.

Subject: GMPP Sampling Parcel 13 & 14

Jason,

Per our discussion today, please see attached field sampling plan for your use in finalizing change
orders. Please include costs to complete this and plan on NDN doing this soon after you have the NTP
from us and the City executed access agreements.

We would like a deliverable from NDN covering:

* Brief Memo describing work on NDN letter head / signed.
o Tabulated Data
o Site Map with GPS boring locations and XRF results.
o Soil Boring logs

Assume an additional 10 contingency soil borings (not shown on map) based on site observations with
the intent to delineate the edge of ash contamination proceeding east to west across the rear of Parcels
13 and 14.

Parcel 13-14

o PROPOSED LOCATION FOR VISUAL AND XRF SCREENING FOR ASH

Sampling Plan
Goal-determine how far into the parcels excavation needs to take place and so volumes to be excavated can be estimated
Additional borings should be performed if ash appears more widespread on either parcel include contingent locations if needed
Perform property line borings first and step in to parcels accordingly
Visually record ash and perform XRF screening in borings at 0-0 5 ft bls, 0 5-2 ft bls, and 2 foot intervals to water

RE: Cost Proposal for Ash Delineation on Parcels 13 &14
Gold Merritt Pope Place Ash Remediation
Jacksonville, Duval County, Florida

Dear Mr. Freeman:

The NDN Companies (NDN) is pleased to submit this proposed cost estimate to provide the services necessary to delineate the extent of ash on parcels 13 and 14 at the Pope Place and Gold Merit site. These services are in addition to the scope of the executed agreement. The proposed scope of work and cost estimate for these services are detailed below:

Soil Borings and XRF Screening for Ash
NDN will advance up to 30 hand augers to groundwater on Parcels 13 and 14 with the intent to identify the extent of ash on the parcels. The soil will be visually inspected for the presence of ash and samples will be collected from 0-0.5 ft bgs, 0.5-2 ft bgs, and in 2-foot intervals until groundwater or residual is encountered. The sample will be scanned with an XRF analyzer for the presence of lead. The findings at each location will be recorded in soil boring logs and a field book.

Soil Borings and XRF Screening for Ash - **$,4,183.00 total**

Report Preparation
NDN will prepare a letter report summarizing the methodology and findings of the investigation. This will include tabulated data, maps, pictures, and soil boring logs.

Waste Characterization - **$2,075.00 total**

The above proposed costs will be billed as unit price based on completion. If this cost estimate, which incorporates the attached General Terms and Conditions by reference, meets with your approval, please sign, and return the enclosed agreement or issue your purchase order accepting this proposal as your authorization to proceed. If you have any questions, please feel free to contact me at (904) 662-1050.

AGREEMENT AND AUTHORIZATION TO PROCEED

Cost Proposal for Additional Deliverables Gold
Merritt Pope Place Ash Remediation
Jacksonville, Duval County, Florida

Reporting, Invoicing, and Payment Schedule

The NDN Companies, (hereinafter referred to as NDN), will invoice for work completed as a lump sum. NDN reserves the right to charge late invoices at a rate of 1-1/2% per month beyond 30 days. This cost estimate and pricing will be valid for 90 days from today.

Authorization to Proceed

If you are in agreement with the proposed scope of work, payment schedule, and incorporated General Terms and Conditions, please sign below indicating your acceptance and return a signed copy of this Agreement to our office. Upon receipt of authorization to proceed, NDN will begin work.

This document constitutes a legal contract under the laws of the State of Florida. The undersigned parties have reviewed this document and agree to the scope of work to be provided and the terms of the contract.

Mr. Jason Freeman, or
Authorized Representative

GENERAL TERMS AND CONDITIONS

SECTION 1: RESPONSIBILITIES

1.1 The NDN Companies, hereafter referred to as the "Consultant", has the responsibility for providing the services described under the "Scope of Work" section of the proposal, hereafter referred to as "Agreement", to that entity authorizing the Consultant to perform such work, heretofore referred to as the "Client". The work is to be performed according to accepted industry standards of care and is to be completed in a timely manner.

1.2 The Client or a duly authorized representative is responsible for providing the Consultant with a clear understanding of the project nature and scope. The Client shall supply the Consultant with sufficient and adequate information, including, but not limited to, maps, site plans, reports, surveys and designs, to allow the consultant to properly complete the specified services. The Client shall also communicate changes in the nature and scope of the project as soon as possible during performance of the work so that the changes can be incorporated into the work product.

SECTION 2: STANDARD OF CARE

2.1 Services performed by the Consultant under this Agreement are expected by the Client to be conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the Consultant's profession practicing contemporaneously under similar conditions in the locality of the project. No other warranty, expressed or implied, is made.

2.2 The Client recognizes that site conditions may change from those observed at the site at the time work is performed. Data, interpretations, and recommendations by the Consultant will be based solely on information available to the Consultant at the time of service. The Consultant is responsible for those data, interpretations, and recommendations, but will not be responsible for other parties' interpretations or use of the information provided.

SECTION 3: SITE ACCESS AND SITE CONDITIONS

3.1 The Client will grant or obtain free access to the site for all equipment and personnel necessary for the Consultant to perform the work set forth in this Agreement. The Client will notify any and all possessors of the project site that Client has granted Consultant free access to the site. The Consultant will take reasonable precautions to minimize damage to the site, but it understood by Client that, in the normal course of work, some damage may occur, and the correction of such damage is not part of this Agreement unless so specified in the Proposal.

3.2 The Client is responsible for the accuracy of locations for all subterranean structures and utilities. The Consultant will take reasonable precautions to avoid known subterranean structures, and the Client waives any claim against Consultant, and agrees to defend, indemnify, and hold Consultant harmless from any claim or liability for injury or loss, including costs of defense, arising from damage done to subterranean structures and utilities not identified or accurately located. In addition, Client agrees to compensate Consultant for any time spent or expenses incurred by Consultant in defense of any such claim with compensation to be based upon Consultant's prevailing fee structure and expense reimbursement policy.

SECTION 4: BILLING AND PAYMENT

4.1 Consultant will submit invoices to Client monthly or upon completion of services. Invoices will show charges for different personnel and expense classifications or will indicate a lump sum charge for services rendered.

4.2 Payment is due 30 days after presentation of invoice and is past due 31 days from invoice date. Client agrees to pay a finance charge of one and one-half percent (1.5%) per month, or the maximum rate allowed by law, on past due accounts.

4.3 If the Consultant incurs any expenses to collect overdue billings on invoices, the sums paid by the Consultant for reasonable attorney's fees, court costs, Consultant's time, Consultant's expenses, and interest will be due and owing by the Client.

SECTION 5: OWNERSHIP OF DOCUMENTS

5.1 All reports, boring logs, field data, field notes, laboratory test data, calculations, estimates, and other documents prepared by the Consultant, as instruments of service, shall remain the property of the Consultant.

5.2 Client agrees that all reports and other work furnished to the Client or his agents, which are not paid for, will be returned upon demand and will not be used by the Client for any purpose.

5.3 The Consultant will retain all pertinent records relating to the services performed for a period of five years following submission of the report, during which period the records will be made available to the Client at all reasonable times.

SECTION 6: DISCOVERY OF UNANTICIPATED HAZARDOUS MATERIALS

6.1 Client warrants that a reasonable effort has been made to inform Consultant of known or suspected hazardous materials on or near the project site.

6.2 Under the terms of this Agreement, the term "hazardous materials" includes, but is not limited to, hazardous materials (40 CFR 172.01), hazardous wastes (40 CFR 261.2), hazardous substances (40 CFR 300.6), petroleum products, polychlorinated biphenyls, mold and asbestos.

6.3 Hazardous materials may exist at a site where there is no reason to believe they could or should be present. Consultant and Client agree that the discovery of unanticipated hazardous materials constitutes a changed condition that may mandate a renegotiation of the scope of work. Consultant and Client agree that the discovery of unanticipated hazardous materials may make it necessary for Consultant to take immediate measures to protect health and safety. Client agrees to compensate Consultant for any equipment decontamination or other costs incident to the discovery of unanticipated hazardous materials.

6.4 Consultant agrees to notify Client when unanticipated hazardous materials or suspected hazardous materials are encountered. Client agrees to make any disclosures required by law to the appropriate governing agencies. Client also agrees to hold Consultant harmless for any and all consequences of disclosures made by Consultant which are required by governing law. In the event the project site is not owned by Client, Client recognizes that it is the Client's responsibility to inform the property owner of the discovery of unanticipated hazardous materials.

6.5 Notwithstanding any other provision of the Agreement, Client waives any claim against Consultant, and to the maximum extent permitted by law, agrees to defend, indemnify, and save Consultant harmless from any claim, liability, and/or defense costs for injury or loss arising from Consultant's discovery of unanticipated hazardous materials including any costs created by delay of the project and any cost associated with possible reduction of the property's value. Client will be responsible for ultimate disposal of any samples secured by the Consultant which are found to be contaminated.

SECTION 7: RISK ALLOCATION

7.1 Client agrees that the Consultant's liability for any damage on account of any error, omission, or other professional negligence will be limited to a sum not to exceed $50,000 or Consultant's fee, whichever is greater. If Client prefers to have higher limits on professional liability, Consultant agrees to increase the limits up to a maximum of $1,000,000 upon Client's written request at the time of accepting our proposal provided that Client agrees to pay an additional consideration of four percent of the total fee for the project or $500.00, whichever is greater. The additional charge for the higher liability limits is because of the greater risk assumed and is not strictly a charge for additional professional liability insurance.

SECTION 8: INSURANCE

8.1 The Consultant represents and warrants that it and its agents, staff and Consultants employed by it, is and are protected by worker's compensation insurance and that Consultant has such coverage under public liability and property damage insurance policies which the Consultant deems to be adequate. Certificates for all such policies of insurance shall be provided to Client upon request in writing. Within the limits and conditions of such insurance, Consultant agrees to indemnify and save Client harmless from and against loss, damage, or liability arising from negligent acts by Consultant, its agents, staff, and consultants employed by it. The Consultant shall not be responsible for any loss, damage, or liability beyond the amounts, limits, and conditions of such insurance or the limits described in Section 7, whichever is less. The Client agrees to defend, indemnify, and save consultant harmless for loss, damage, or liability arising from acts by Client, Client's agent, staff, or other consultants employed by Client.

SECTION 9: DISPUTE RESOLUTION

9.1 All claims, disputes, and other matters in controversy between Consultant and Client arising out of or in any way related to this Agreement will be submitted to "alternative dispute resolution" (ADR) such as mediation and/or arbitration, before and as a condition precedent to other remedies provided by law.

9.2 If a dispute at law arises related to the services provided under this Agreement and that dispute requires litigation instead of ADR as provided above, then:

(a) the claim will be brought and tried in judicial jurisdiction of the court of the county where the principal place of business is located and the Client waives the right to remove the action to any other county or jurisdiction; and
(b) The prevailing party will be entitled to recovery of all reasonable costs incurred, including staff time, court costs, attorney's fees, and other claim related expenses.

SECTION 10: TERMINATION

10.1 This agreement may be terminated by either party upon seven days' notice in the event of substantial failure by the other party to perform in accordance with the terms hereof. Such termination shall not be effective if that substantial failure has been remedied before expiration of the period specified in the written notice. In the event of termination, Consultant shall be paid for services performed to the termination notice plus reasonable termination expenses.

10.2 In the event of termination, or suspension of more than three months, prior to completion of all reports contemplated by this Agreement, Consultant may complete such analyses and records as necessary to complete the project files and may also complete a report on the service performed to the date of notice of termination or suspension. The expense of termination of suspension shall include all direct costs incurred by Consultant in completing such analyses, records and reports.

SECTION 11: ASSIGNS

11.1 Neither the Client nor the Consultant may delegate, assign, sublet or transfer his duties or interest in this Agreement without the written consent of the other party.

SECTION 12: GOVERNING LAW AND SURVIVAL

12.1 The laws of the State of Florida will govern the validity of these terms, their interpretation and performance.

12.2 If any of the provisions contained in this Agreement are held illegal, invalid, or unenforceable, the enforceability of the remaining provisions will not be impaired. Limitations of liability and indemnities will survive termination of this Agreement for any cause.
