

Aerial sightings of manatees

1. Differences in the seasonal distribution of manatee were not found to be significantly different between years 1994-2006. The following maps show manatee distribution from Spring 2005 to Summer 2006 as a representative sample.

Seasons were classified as follows:

Winter – December – February

Spring – March – May

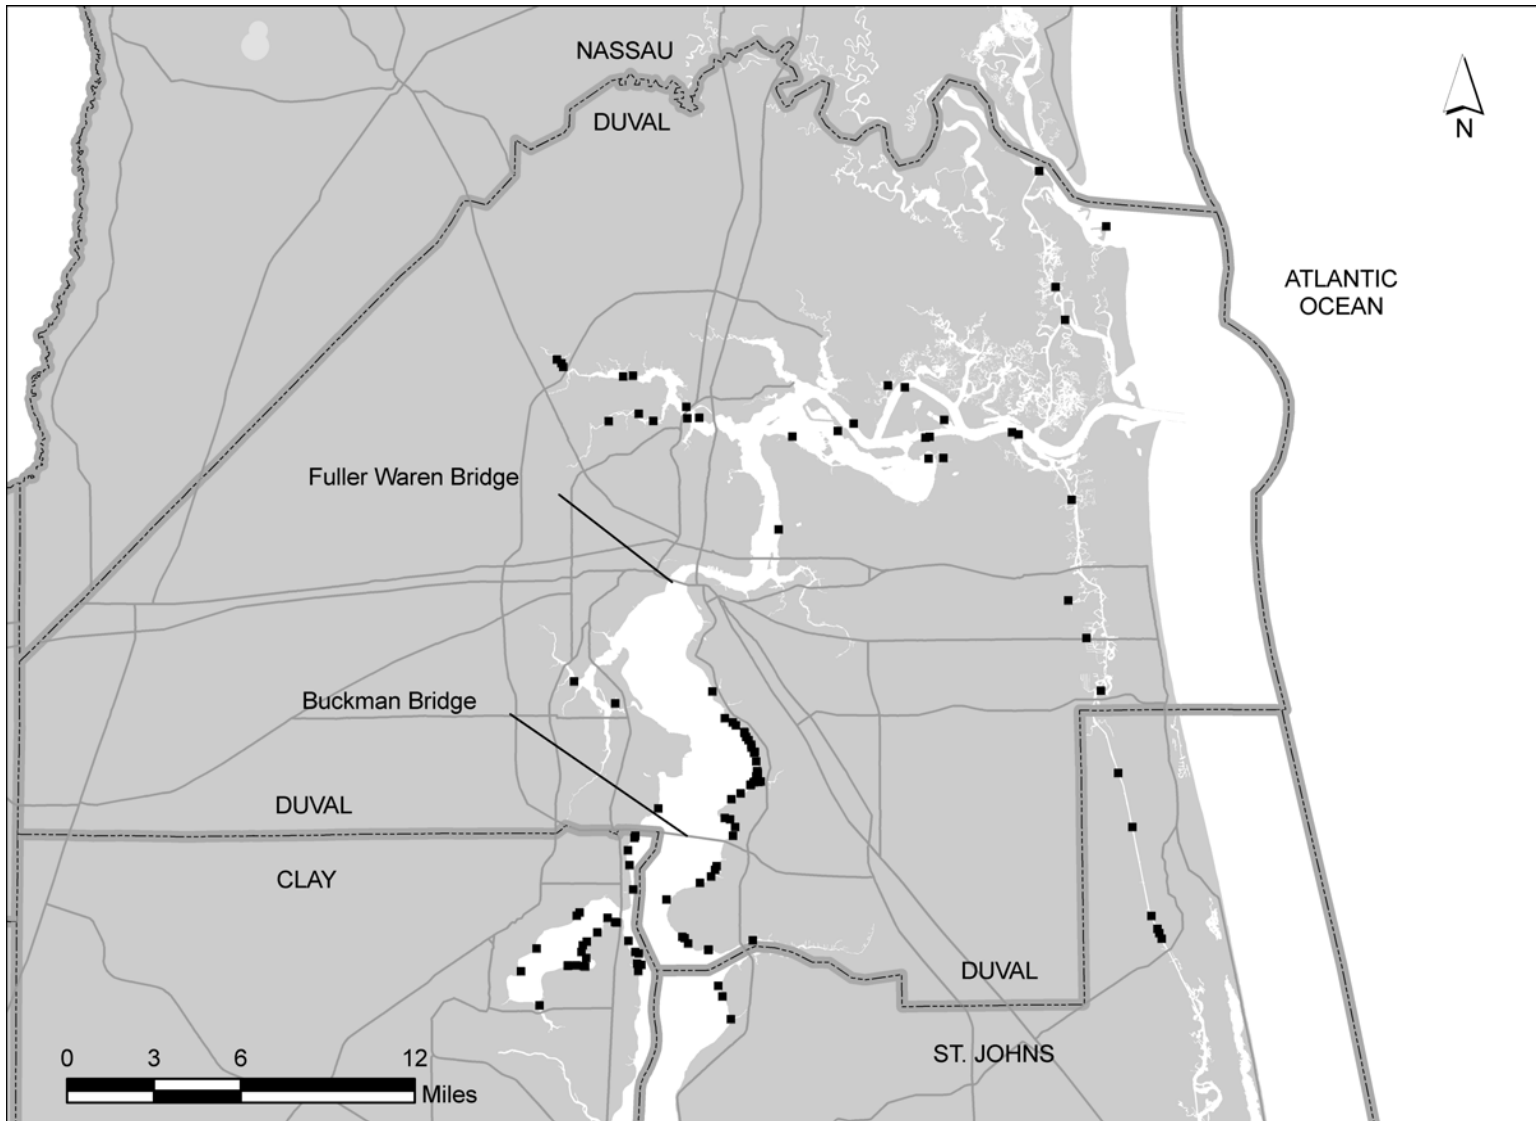

Summer – June- August

Fall – September – November

2. Public reported sightings to the manatee hotline at Jacksonville University for the years 1994-1999 and 2000-2005.
