All Equipment, Products, or Services under this Contract will be priced as stated in Vendor's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location.

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. SHIPPING AND SHIPPING COSTS. All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. If the damage is not readily apparent at the time of delivery, Vendor must permit the Equipment and Products to be returned within a reasonable time at no cost to Sourcewell or its Participating Entities. Participating Entities reserve the right to inspect the Equipment and Products at a reasonable time after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery.

Vendor must arrange for and pay for the return shipment on Equipment and Products that arrive in a defective or inoperable condition.

Sourcewell may declare the Vendor in breach of this Contract if the Vendor intentionally delivers substandard or inferior Equipment or Products. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Vendor as soon as possible and the Vendor will replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity.

B. SALES TAX. Each Participating Entity is responsible for supplying the Vendor with valid tax-exemption certification(s). When ordering, a Participating Entity must indicate if it is a tax-exempt entity.

C. HOT LIST PRICING. At any time during this Contract, Vendor may offer a specific selection of Equipment, Products, or Services at discounts greater than those listed in the Contract. When Vendor determines it will offer Hot List Pricing, it must be submitted electronically to Sourcewell in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcewell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

4. PRODUCT AND PRICING CHANGE REQUESTS

Vendor may request Equipment, Product, or Service changes, additions, or deletions at any time. - Provide sufficient detail to justify the requested change;
- Individually list all Equipment, Products, or Services affected by the requested change, along with the requested change (e.g., addition, deletion, price change); and

Industry Longevity Strategy
United Rentals has executed a long term strategy focused on improving the profitability of our core equipment rental business through revenue growth, margin expansion and operational efficiencies. In particular, we have focused on customer segmentation, customer service differentiation, rate management, fleet management, including size, breadth and diversity of fleet, and operational efficiency which includes investments in technology. This has resulted in over a decade of financial improvement.
In 2020, we expect to continue our disciplined focus on increasing our profitability and return on invested capital. In particular, our strategy calls for:

• A consistently superior standard of service to customers, often provided through a single point of contact; our strong cultures is focused on customers.
• The further optimization of our customer mix and fleet mix, with a dual objective: to enhance our performance in serving our current customer base, and to focus on the accounts and customer types that are best suited to our strategy for profitable growth. We believe these efforts will lead to even better service of our target accounts, primarily large construction and industrial customers, as well as select local contractors. Our fleet team's analyses are aligned with these objectives to identify trends in equipment categories and define action plans that can generate improved returns;

		In 2018, we made notable progress in continuing to build a sustainable future for the benefit of our employees, customers, communities and our planet. At the same time, the size of our company increased substantially, giving us a larger platform for corporate responsibility. Collaboration is also implied in our core values of safety first, a passion for people, visible leadership, customer-driven, absolute integrity, community minded focus, continuous innovation and sustainability; • Best-in-class training is one of the most important ways to maximize engagement and retention, and we offer a wide array of training solutions (classroom, hands-on and eLearning) and coaching to our employees. Approximately 1,000 of our employees are also instructors or certified evaluators for these programs; • The implementation of "Lean" management techniques, including kaizen processes focused on continuous improvement. We will continue to implement this program across our branch network, with the objectives of: reducing the cycle time associated with renting our equipment to customers; improving invoice accuracy and service quality; reducing the elapsed time for equipment pickup and delivery; and improving the effectiveness and efficiency of our repair and maintenance operations; and • The continued expansion of our trench safety, power and HVAC, and pump solutions footprint, as well as our tools offering, and the cross-selling of these services throughout our network. We continue to offer specialty rental branches that include HVAC, Trench Safety, Fluid Management, complete portable toilet rental and Tool solutions and invest in fleet to further position United Rentals as a single source provider of total jobsite solutions through our extensive product and service resources and technology offerings.

Line Item	Question	Response *
23	Sales force.	Effectively servicing large national accounts such as Sourcewell requires a team approach. Brad Laws is the Government Accounts Senior Manager and is the quarterback of the state and local government team. Under him are three Government Accounts Managers that will work with the field sales team of 4,400 industry experts. This sales team is supported by branch operations and field personnel across an extensive network of approximately 1,180 branch locations to effectively implement, manage and service an industrial client of Sourcewell's scope. Implementing and rolling out a national contract with Sourcewell requires a concerted effort from many levels of United Rentals' organization beyond the government accounts group. Strategic Account Managers (SAM), Outside & Inside Sales Representatives (OSR & ISR), Branch & Service Managers, Delivery Drivers and Field Service Technicians will continue to maintain current relationships while implementing a new contract in areas where we are already doing business. These levels will be heavily engaged in areas where we do not currently have relationships with Sourcewell's members for contract implementation and service. Current partnerships will be built upon and modeled after.

24	Dealer network or other distribution methods.	Sourcewell benefits from United Rentals owning all of our fleet. The following operating efficiencies help distribute our equipment to your members quickly: • Equipment Sharing Among Branches. Each branch within a region can access equipment located elsewhere in the region. This fleet sharing increases equipment utilization because equipment that is idle at one branch can be marketed and rented through other branches. Additionally, fleet sharing allows us to be more disciplined with our capital spend. • Customer Care Center. We have a Customer Care Center ("CCC") with locations in Tampa, Florida and Charlotte, North Carolina that handles all telephone calls to our customer service telephone line, 1-800-UR-RENTS. The CCC handles many of the 1-800-UR-RENTS telephone calls without having to route them to individual branches, and allows us to provide a more uniform quality experience to customers, manage fleet sharing more effectively and free up branch employee time.
25	Service force.	Our branches across the US and Canada are wholly owned by United Rentals and never franchised. They are staffed with a knowledgeable team of Branch Managers, Service Technicians, and Drivers to fulfill Sourcewell's equipment needs. In addition to our field service teams, we have a Government Sales Support Team staffed with dedicated Government account experts to handle any customer requests. Backing them up is the company's extensive customer service team that is available for customer request 24/7/365. Branch Managers: United Rentals' has numerous branch managers to oversee operations at each of our local branches, such as bookings, dispatches and requests for on-site assistance. They can collaborate with other branches in our network, and with our centralized customer service facilities, to ensure fleet availability for Sourcewell. They are also able to train our local personnel so that we service your account in a way that supports Sourcewell's existing and future operations. Maintenance/Service Technicians: United Rentals' has approximately 5300 technicians company-wide that are factory-trained and participate in periodic preventive maintenance refresher courses and manufacturer training. They inspect and service each piece of rental equipment to ensure its safety and operating condition before returning it to the rental-ready fleet.

26	Describe in detail the process and procedure of your customer service program, if applicable. Include your response-time capabilities and commitments, as well as any incentives that help your providers meet your stated service goals or promises.	Customers are given information to reach any of our sales reps, Government Team, or customer service center to place an order or answer any questions. United Rentals tracks our service levels through our Quarterly Scorecard reported to Sourcewell. United Rentals is offering Sourcewell, a quarterly SLA (Service Level Agreement) for the Sourcewell facilities, which will be reported quarterly, and reviewed on a regular basis with Sourcewell management. This SLA reporting will help with improving service levels, availability, and reliability of equipment. This will help with the on-going continuous improvement program. On-Time Delivery Goal • On-time deliveries to the designated location at the promised delivery time Fulfilment Goals • 100% of orders fulfilled in accordance with issued purchase order requirements. This is fleet that is 100% of orders that are fulfilled by United Rentals. Quality Expectation at Delivery • 100% of orders delivered without defects at time of delivery Quality Expectations during Rental Period • 90% of orders/rental periods without a defect Repair Replacement Response time • 100% of service responses within 2 hour window for repair/replacement solutions when equipment fails Repairs: On-time service • 100% of equipment repairs/replacements within 4 hours of promised time Repair failures: 2 day window • Target 0% of repair occurrences requiring additional service. Escalation • Number of occurrences by segment & location where issues are not resolved at the local branch level and are escalated to the National Account Manager/VP Sales
27	Identify your ability and willingness to provide your products and services to Sourcewell participating entities in the United States.	Sourcewell's participating entities will have access to a network of approximately 1,038 rental locations in the United States (including territories). United Rentals maintains a robust fleet and has the proven experience to mobilize this fleet to service the needs of our customer. We have held the Sourcewell contract for the last 10 years and have a proven track record of servicing Sourcewell and its participating entities through our vast sales and service network led by our dedicated government team.

28	Identify your ability and willingness to provide your products and services to Sourcewell participating entities in Canada.	Sourcewell's participating entities will have access to a network of approximately 148 rental locations in Canada. Our current contract includes a Canadian pricing structure, and we look forward to working with Sourcewell to grow the customer base and recognition throughout Canada. On our Government Team we have several members led by Mark Dunlop that are dedicated to servicing the Canadian government and municipal accounts.
29	Identify any geographic areas of the United States or Canada that you will NOT be fully serving through the proposed contract.	The only two geographic areas we are unable to service are Hawaii and the Northwest Territories in Canada. United Rentals' is currently exploring the opportunity to expand into Hawaii. Upon opening a branch. The current pricing proposal includes HI.
30	Identify any Sourcewell participating entity sectors (i.e., government, education, not-for-profit) that you will NOT be fully serving through the proposed contract. Explain in detail. For example, does your company have only a regional presence, or do other cooperative purchasing contracts limit your ability to promote another contract?	We are able to continue to service all participating entities as we have for nearly 10 years.
31	Define any specific contract requirements or restrictions that would apply to our participating entities in Hawaii and Alaska and in US Territories.	With over 1,180 branches throughout North America, United Rentals currently services all of the US except Hawaii with limited access in certain markets. We are currently exploring the opportunity to expand into Hawaii.

Table 7: Marketing Plan

Line Item	Question	Response *
32	Describe your marketing strategy for promoting this contract opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	United Rentals takes a three pronged approach to our marketing and sales plans: internal training, external sales and education, and customer faced marketing. You will find a comprehensive marketing plan attached in the documents section.
33	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	We engage with customers through an omni-channel digital marketing strategy, allowing customers to interact with us through a variety of different platforms including our website, local Google listings, our mobile application and our social media tools. We use data to help personalize journeys for our customers, ensuring we are compliant along the way. This in conjunction with our proprietary digital management tools provides a comprehensive digital experience for our customers.
34	In your view, what is Sourcewell's role in promoting contracts arising out of this RFP? How will you integrate a Sourcewell-awarded contract into your sales process?	We believe Sourcewell is responsible for working with us to promote our contract. We plan to work with Sourcewell to make sure both organizations can articulate and promote the value proposition of the other. Sourcewell has a great reputation of promoting their contracts through their websites, tradeshows, marketing collateral, newsletters, and more. United Rentals already has a proven track record of selling a Sourcewell contract, but our sales process is also laid out in the provided marketing plan.
35	Are your products or services available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	We understand that government entities have their internal purchasing systems for processing purchase orders, placing orders, and approving payment for the services. To simplify the ordering process for our government accounts we work collaboratively with them to create punch-out catalogs specific to each Participating Entities' equipment needs within their internal purchasing systems. This provides them with the flexibility of working within one system. All orders can also be placed through our Government Sales and Service Center. This team is available 24/7/365 taking in orders through a single source email, phone, fax, or online. The service center will have all of the contract details for each of the various co-op partners' accounts. Additionally, orders can be placed locally through any of our branches.

Table 8: Value-Added Attributes

Line Item	Question	Response *
36	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	The technology and pace that business operates at is accelerating quickly. Yet, the way safety training is performed and tracked is quite stagnate. United Rentals invested in building the United Academy platform to replace primitive safety training and record keeping methods and to make sure that safety programs could match the pace of the projects they support. Often times, when you discover that a worker or a crew is untrained, the time involved in taking action strains a project timeline. United Academy leverages technology to avoid training related lost time, and respond quickly when you must. Quality training when you need it. Training is led by a team of certified trainers with years of experience in educating and protecting commercial, industrial and municipal workers and sites. Equipment familiarization and proper training are two very different concepts. Equipment familiarization is provided at no cost upon delivery of each piece of equipment. Proper certified training is per person cost through United Academy. We are providing all Participating Entities discounted United Academy Training. We can also help you determine when each is needed. Learner comprehension and learning preferences have evolved. United Academy gives you options: classroom instruction and blended learning. Schedule classroom training and certification or access blended e-learning 24/7. Ease of tracking training and certifications. Easy, real-time tracking and verification of training and certifications anytime, anywhere. Robust Library of Courses United Academy™ houses a robust library of courses and we continue to add to that library on a regular basis. Select from a robust library of courses including operator certification, train the trainer, OSHA required training, Confined Space Entry, and Competent Person Trenching and Excavation. Several courses are available in English, French, and Spanish. Skilled Trainers Safety training is not new to United Rentals. Over the years we have built one of the largest and most professional training teams in the industry with over dedicated, full time safety trainers supporting United Academy across the USA and Canada. In addition, we have hundreds of certified trainers and evaluators located in many of our 1,000 branches. Our full-time trainers have years of experience educating workers on safety and many have been working in our industry for years in various capacities. Classes in Multiple Formats To meet our customers' demand for various learning styles, we offer select classes in multiple formats, including: • Online courses • Traditional classroom courses • Blended learning courses This award-winning technology is a powerful alternative to traditional classroom training. Online Training Profile
Sourcewell can save time and money by storing and maintaining training and certifications in United Academy. Records for each course taken through the Academy are stored in our online database and a training profile is created for every account holder. Users can also store additional records for training taken outside of United Academy so that they can build a comprehensive training transcript. Company administrators can set which email addresses receive alerts.

37	Describe any technological advances that your proposed products or services offer.	United Rentals is the industry leader in every major measurable category within the industry, and reports those results to prove as much. No other organization invests the time, money, and effort to differentiate the level of service provided. United Rentals is truly driven around major industrial clients, and Sourcewell is an ideal fit for the level of service that we provide. Service programs and innovative techniques, combined with the most robust fleet in the industry provide the highest level of equipment quality. Cutting edge technology like Total Control and GPS utilization management provide Sourcewell with a level of service and reliability that is best in the industry and constantly evolving. Overall costs of rental and overall Total Cost of Rental Operation (TCRO) value provided are unmatched because of the unique proactive measures afforded by the Managed Services Strategy, Total Control, and Key Performance Indicators (KPIs). No other strategy can produce effective and measurable savings. Unlike other vendors who continually outsource delivery services to unqualified towing services or third-party freight providers, United Rentals' fleet of delivery vehicles is rated exemplary by the Department of Transportation and provides Sourcewell with access to trained, professional delivery personnel that are familiar with every United Rentals product and understand Sourcewell's safety requirements. These delivery vehicles are tracked and managed using GPS Services to ensure accurate, timely deliveries to Sourcewell. Service levels are unmatched and are aided by United Rentals' internal maintenance facilities' technology to ensure every piece of equipment is thoroughly inspected and service prior to delivery to Sourcewell. Manufacturer recommended preventive maintenance programs are implemented allowing for proactive control and inspection on a periodic basis, ensuring Sourcewell's rented equipment performs at the highest level. Lastly, United Rentals' dynamic fleet allows for unmatched flexibility with regards to overall equipment availability and service. Some of the key skill sets include: • Total Control • EDI Capability • Ability to manage Sourcewell owned fleet as well as re-rent • Single line of sight to all rental items
38	Describe any "green" initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	Sustainability is a major, ongoing focus of United Rentals as part of our commitment to Corporate Responsibility. Our company has implemented Sustainable Growth Initiatives in the areas of facilities, fleet and logistics. We believe that these initiatives will result in the reduction of our total cost of operation and will safeguard the environment, while helping our customers reduce their own carbon footprints.
39	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the equipment or products included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	We have the ability to track the energy use and GHG emissions of our own facilities, as well as our vehicles transporting equipment and tools to and from jobsites. However, it's far more complex to document the impact of our products once they leave our control and are in the hands of our customers. Through the use of telematics technology, we're beginning to gain insights into how our customers use our products. In the coming years, our goal is to have real-time input on fuel consumption, emissions, safety, and the performance of our tools and equipment on jobsites, and use this data to help our customers utilize our products more efficiently, with a lighter carbon footprint.

40	Describe any Women or Minority Business Entity (WMBE), Small Business Entity (SBE), or veteran owned business certifications that your company or hub partners have obtained. Upload documentation of certification (as applicable) in the document upload section of your response.	None

Examples of safety initiatives include the company's Injury and Illness Prevention Program, branch safety meetings, driver safety programs and the United Academy® training and certification management portal for customers and employees. In 2019, we had a total recordable incident rate (TRIR) of 0.79, toward a goal of zero. Total Control® is our proprietary software suite that provides customers with a single, transformative solution for equipment productivity. Total Control helps customers manage their equipment fleets in real time through greater visibility and accountability, with the goal of improving the utilization of resources. By reducing downtime and avoiding on-site productivity gaps, Total Control can help a customer cut annual equipment rental costs by up to a third. While United Rentals has always responded to disasters near our locations, in 2018 we began to take a more structured approach to our response. We've trained a first-responder team comprising more than 800 company volunteers across North America, whose first objective in any emergency is to help our employees who have been affected.

How will Sourcewell participating entities in these regions be provided service for warranty repair?	For Rentals. All branches in the United States and Canada have in-house technicians available to service and maintain our equipment. Therefore, all regions we provide service to will also have access to certified technicians. For New and Used Equipment Sales. 46	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranties issues typically passed on to the original equipment manufacturer?	United is not the original equipment manufacturer ("OEM") on any of the equipment it rents or sells. United is certified to perform warranty service by many OEMs. Upon acceptance of a warranty claim by the OEM and upon the OEM authorizing United to perform service, United is able to perform warranty service on many OEM's equipment.. We strive to lead our industry in service performance, particularly when it comes to equipment maintenance and readiness for rental. United Rentals invests in our service personnel to ensure that they are up to speed on manufacturer's service requirement with internal or manufacturer sponsored training. We have also invested heavily in resources designed to make our company more efficient in maintaining our equipment to the highest standards. All 1180+ United Rentals locations use the same systems in order to ensure that Preventive Maintenance, ANSI inspections and manufacturer's service bulletins are being completed with integrity per our company procedure. United Rentals is responsible for the costs associated with inspecting and servicing our owned equipment. If requested, United Rentals can also provide inspections and services on equipment owned by our customers at mutually agreed upon rates. Some of the specific procedures are: • Preventive maintenance: PM's are governed by the stricter of two regulatory programs: Either 1) Per manufacturer's recommendation of service requirement or; 2) Perform an inspection inside of 90 days and / or service of the equipment with 250 operating hours. The "Rental Flow" process also tracks pending PM's due for service personnel to monitor. These PM's are performed at our locations as well as at customer locations by qualified field service technicians. • ANSI inspections on aerial equipment, booms and scissors, are required by law. United Rentals has a NO-EXCEPTIONS policy related to ASNI inspections; if a unit does not receive this inspection within a year from its last date, it is taken out of rental service. • Manufacturer's service bulletins are handled as United Rentals is notified, either in our shops or in the field.
47	What are your proposed exchange and return programs and policies?	For Rentals. If a piece of equipment is not operating properly, United Rentals will deploy one of its factory-trained technicians to perform the repair and/or supply the necessary parts. United Rentals promptly responds to repair and maintenance service calls – typically within two to four hours. In the event the equipment cannot be repaired on site, United Rentals will replace the equipment as quickly as it can. For New and Used Equipment Sales. Exchange and return programs/policies are determined by the OEM.

48	Describe any service contract options for the items included in your proposal.	For Rentals. Please note that service is provided at no cost to customer, unless such service is due to customer's fault. Please refer to service labor pricing included in our pricing spreadsheet. All branches have in-house technicians available to service and maintain our equipment. For Customer-owned equipment. If the customer has owned equipment, they can chose to utilize our Customer Equipment Solutions team to manage and perform the equipment service needs. We have a dedicated team and dedicated service technicians that solely work on customer owned equipment and do not work on our rental fleet. For New and Used Equipment Sales. In addition, any Sourcewell participating entity may purchase a United Guard Service Contract with the purchase of equipment as mentioned above.

Table 10: Payment Terms and Financing Options

Line Item	Question	Response *
49	What are your payment terms (e.g., net 10, net 30)?	Our pricing terms are Due Upon Receipt.
50	Do you provide leasing or financing options, especially those options that schools and governmental entities may need to use in order to make certain acquisitions?	We cannot offer leasing or financing options through United Rentals, however we have experience working with Sourcewell awarded lending and other partners when the customer requests this option.
51	Briefly describe your proposed order process. Include enough detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template. For example, indicate whether your dealer network is included in your response and whether each dealer (or some other entity) will process the Sourcewell participating entities' purchase orders.	Our Government Sales and Service Center (GSSC) will process all orders. Providing a centralized location for all orders, allows consistency and a stronger account knowledge to support the decentralized system of orders submitted by the many end users. Additionally, the end users will have full account visibility through our UR Control System. Customers are able to use the GSSC team to submit orders through phone or email. Our system can be set up to require POs as well through customer request. All participating entities' accounts will be set up with Sourcewell pricing so each rental will at the negotiated rates regardless if the customer or internal order taker remembers to mention the contract. Customers can also go through their local sales representative or branch to place orders. The more time people and departments spend using UR Control®, the more ways they find that it helps their company be better at managing rentals. Before, during, and after the rental process, UR Control gives users access to the types of information used to make the best business decisions. Table 11: Pricing and Delivery

Provide detailed pricing information in the questions that follow below. Keep in mind that reasonable price and product adjustments can be made during the term of an awarded Contract as desribed in the RFP, the template Contract, and the Sourcewell Price and Product Change Request Form.

Line Item	Question	Response *
53	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	Please see our attached pricing spreadsheet. United Rentals is providing a national net pricing structure as you will see on the attached pricing spreadsheet. This is not a percentage discount program. All pricing is NOT TO EXCEED and our sales representatives will be encouraged to provide local market pricing if it happens to be lower than the contract price although this is not a common occurrence.
54	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	United Rentals is providing a national net pricing structure as you will see on the attached pricing spreadsheet. This is not a percentage discount program. All pricing is NOT TO EXCEED and our sales representatives will be encouraged to provide local market pricing if it happens to be lower than the contract price although this is not a common occurrence.
55	Describe any quantity or volume discounts or rebate programs that you offer.	This is a NOT TO EXCEED contract. Customers can negotiate volume pricing locally on a case by case basis.
56	Propose a method of facilitating "sourced" products or related services, which may be referred to as "open market" items or "nonstandard options". For example, you may supply such items "at cost" or "at cost plus a percentage," or you may supply a quote for each such request.	As with normal requests, United Rentals will field off-schedule requests through local territory representatives or our Government Customer Care Center. This will enable us to provide first-class service to Sourcewell members through our knowledgeable team. Our philosophy is that no request is unreasonable and will be investigated to the fullest. Our strategy will be to field requests and factor in rental patterns, demands for new technology or advances in equipment efficiencies, and enactment of new legislation, affecting equipment. If we see a spike in a certain category, we will ask Sourcewell to determine if the equipment can be added to our schedule. For Sourcewell members, we would like to propose a NOT TO EXCEED markup of 24% on the total invoice cost from a 3rd Party Rental Vendor.
57	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	Installation, set up costs for Specialty equipment rental Solutions United Rentals' proposal includes items for specialty equipment solutions such as installation, set up, mandatory training, or initial inspection, the costs of which will be negotiated at the time of the rental quote. Power and HVAC Services may include power and HVAC system start-up support, installation of low voltage cables, installation of temporary chilled water piping, on-site training for Customer's employees, 24/7 technical assistance and on-site support, and monitoring of selected installing trades. Trench Services may include the engineering, delivery and pickup of the trench/shoring system (the "System"). Scaffolding Services may include the installation and dismantling of scaffolding, including all parts and accessories Portable Restroom Services- Additional fees may be charged for tip-overs, relocation of the units on the same site and vandalism/graffiti. Fluid Solutions may include the design, installation, operation, ongoing maintenance, monitoring, and dismantling of the Fluid Solutions system ("Fluid Solutions Services"). Multiple shift for generators and other power equipment Rental charges accrue during Saturdays, Sundays and Holidays. Rental rates are for normal "one-shift" usage based on an eight (8) hours per day, 40 hours per week and 160 hours per four-week period. On power equipment, operations in excess of one shift will be as follows: one and one-half times the rental charge for double shift and two times the rental charge for triple shift. Refueling Service Charge Customer acknowledges that a "Refueling Service Charge" will be applied to all Equipment not returned with a full tank of fuel. The exact cost of the Refueling Service Charge may

vary depending on the rate being charged by the branch location on the date Customer returns the Equipment. Customer acknowledges that the Refueling Service Charge is not a retail sale of fuel. Customer may avoid the Refueling Service Charge if Customer returns the Equipment with a full tank of fuel.

Tire Repair
Repair or replacement of tires and tubes on Equipment is the responsibility of Customer and is not included in the rental rate.

Environmental Fee
Due to the hazardous nature of some of our waste products, United Rentals charges an Environmental Service Charge on rental invoices for equipment which contains an internal combustion engine, hydraulic oils or similar components. The Charge is 1.84% of the rental charge, with a maximum charge of $99 per invoice. This charge is not a tax or government mandated fee. We are offering to waive this fee for this new contract in order to provide the participating entities additional new savings.

Additional Fees
Some government entities have special fees, such as the SMM fee in Colorado (Texas and Maryland have similar fees). These fees are setup by local/state government entities, and are charged at the direction of local/state laws. United Rentals passes these fees directly to the customer with no markup. These fees are usually negligible in nature and are included quotes provided by our branches.

Rental Protection Plan
United Rentals offers an OPTIONAL, affordable and smart way to protect your agency from the unforeseen. The plan covers accidental damage or theft of United Rentals equipment. This RPP coverage must be selected prior to delivery of the equipment. Additional details can be requested from your local branch. See attached document for additional information on our RPP program. Non-governmental agencies (non-profits, NGO, etc.) will be required to provide a certificate of insurance in order to opt out of the RPP program.

58	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	Standard Delivery during normal working hours Delivery/Pickup Charges – $120 flat charge (each way) then $3.95 per mile After Hours, Weekends, and Holidays An additional call out fee may be incurred, and will be communicated at the time of request. Third Party Hauling In a situation where both parties mutually agree to utilize a third party hauler please refer to pricing tab "Third Party Rentals" for applicable charges. Oversize/Permitted Loads All applicable fees will be communicated at time of service. Field Automation Strategy & Technology (FAST) The Field Automation Strategy and Technology (FAST) program builds on the current strengths of our field platform with new technologies and procedures that support operations. This program is focused on supporting branches in improving delivery and pickup scheduling, route mapping, and overall equipment transportation performance. This includes equipment bar-coding, handheld devices for drivers, new dispatch capabilities, and procedural improvements. FAST makes the Rental Flow process more user-friendly for customers and for United Rentals. Table 13: Audit and Administrative Fee

Line Item	Question	Response *
62	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell.	The United Rentals government team will be available to provide up-to-date information. In addition to direct communication with the team a sample report has been provided in the response. United Rentals customer quotes, orders, change orders and updates are recorded within United Rentals' RentalMan computerized rental system. They are recorded in date order, with unique, individualized numerical designations. Customer accounts are identified as eligible to utilize the Sourcewell contract and are identified further within the RentalMan system with a customer level code and United Rentals' pricing agreement for the contract will be loaded into the customer account file. United Rentals will identify and report all product/equipment sourced as part of a Sourcewell contact purchases and provide timely payment of administrative fees to Sourcewell. On a quarterly basis, we will perform analysis of the detailed pricing file, review the pricing agreement for accuracy or updates/changes, and audit the individual customer invoices and transactions for accuracy and compliance with the contract.
63	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor's sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member's cost of goods. (See the RFP and template Contract for additional details.)	United Rentals proposes a 2% administrative fee on all eligible sales and rentals. This represents a 0.25% increase in administrative fees from the current contract.

87	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	The list below are some of the internal metrics that will be tracked and measured to substantiate success of the contract. # of accounts utilizing Sourcewell Revenue per account utilizing Sourcewell Total Revenue under contract Account Growth Declining and Inactive Accounts As an example, within the last six months 7,190 Sourcewell members have utilized the current United Rentals' Sourcewell contract.
88	Identify any additional costs not included in the rental equipment cost, such as delivery fees, loading and unloading fees, equipment fuel surcharges, environmental fees or permits.	Installation, set up costs for Specialty equipment rental Solutions United Rentals' proposal includes items for specialty equipment solutions such as installation, set up, mandatory training, or initial inspection, the costs of which will be negotiated at the time of the rental quote. Power and HVAC Services may include power and HVAC system start-up support, installation of low voltage cables, installation of temporary chilled water piping, on-site training for Customer's employees, 24/7 technical assistance and on-site support, and monitoring of selected installing trades. Trench Services may include the engineering, delivery and pickup of the trench/shoring system (the "System"). Scaffolding Services may include the installation and dismantling of scaffolding, including all parts and accessories Portable Restroom Services- Additional fees may be charged for tip-overs, relocation of the units on the same site and vandalism/graffiti. Fluid Solutions may include the design, installation, operation, ongoing maintenance, monitoring, and dismantling of the Fluid Solutions system ("Fluid Solutions Services"). Multiple shift for generators and other power equipment Rental charges accrue during Saturdays, Sundays and Holidays. Rental rates are for normal "one-shift" usage based on an eight (8) hours per day, 40 hours per week and 160 hours per four-week period. On power equipment, operations in excess of one shift will be as follows: one and one-half times the rental charge for double shift and two times the rental charge for triple shift. Refueling Service Charge Customer acknowledges that a "Refueling Service Charge" will be applied to all Equipment not returned with a full tank of fuel. The exact cost of the Refueling Service Charge may vary depending on the rate being charged by the branch location on the date Customer returns the Equipment. Customer acknowledges that the Refueling Service Charge is not a retail sale of fuel. Customer may avoid the Refueling Service Charge if Customer returns the Equipment with a full tank of fuel. Tire Repair Repair or replacement of tires and tubes on Equipment is the responsibility of Customer and is not included in the rental rate. Environmental Fee Due to the hazardous nature of some of our waste products, United Rentals charges an Environmental Service Charge on rental invoices for equipment which contains an internal combustion engine, hydraulic oils or similar components. The Charge is 1.84% of the rental charge, with a maximum charge of $99 per invoice. This charge is not a tax or government mandated fee. We are offering to waive this fee for this new contract in order to provide the participating

		entities additional new savings. Additional Fees Some government entities have special fees, such as the SMM fee in Colorado (Texas and Maryland have similar fees). These fees are setup by local/state government entities, and are charged at the direction of local/state laws. United Rentals passes these fees directly to the customer with no markup. These fees are usually negligible in nature and are included quotes provided by our branches. Rental Protection Plan United Rentals offers an OPTIONAL, affordable and smart way to protect your agency from the unforeseen. The plan covers accidental damage or theft of United Rentals equipment. This RPP coverage must be selected prior to delivery of the equipment. Additional details can be requested from your local branch. See attached document for additional information on our RPP program. Non-governmental agencies (non-profits, NGO, etc.) will be required to provide a certificate of insurance in order to opt out of the RPP program. United Guard Full coverage offered for used equipment (OPTIONAL). Equipment over $2,500 that is eligible for United Guard™ must be nine years old or newer. Licensed vehicles are not eligible for United Guard. Used equipment must be in rental ready condition at time of sale. United Guard is available within 72 hours of equipment purchase and cannot be renewed once the term expires. Other conditions and restrictions may apply. We have also provided additional information about United Guard™ in the documents section. Standard Delivery during normal working hours Delivery/Pickup Charges – $120 flat charge (each way) then $3.95 per mile Standard Delivery/Pick-up during normal working hours in Canada 159 CAN$ flat rate (each way) plus 3.25 CAN$ per kilometer	
89	Describe your rent-to-buy option program for new rental equipment, if applicable.	We do not offer rent-to-buy options for new equipment.	
90	Describe your used rental equipment sales program, if applicable.	United Rentals sells top-quality used equipment that is sourced directly from leading manufacturers. • Customers can buy with confidence, as this equipment is expertly maintained by the same team that services the United Rentals fleet. • Customers can continue to rely on United Rentals for maintenance of any purchased equipment through its Customer Equipment Solutions.	
91	Describe any training programs related to this proposal, such as OSHA training, safety training, or other related certifications.	United Rentals solves customer safety challenges through instructor-led, online, blended, and virtual reality training through our United Academy. • With more than 80 full-time trainers and more than 400 Certified Evaluators across North America, we were able to train 90,000 customers in 2019. • Our course offerings span equipment operator training, required OSHA courses, and Trench Safety training. • Simplified training management with record consolidation, certification tracking, and individualized wallet cards.	

92	Describe maintenance responsibility (e.g., vendor or end user) related to long-term rentals.	You don't have time to mess around. United Rentals understands. From our shop to field mechanics, our teams of professionals perform detailed maintenance to keep the equipment on your site working. United Rentals strives to reduce rental equipment breakdowns through a rigorous quality assurance program. This starts with a thorough preventive maintenance program and rent-ready inspections then followed by a condition report so the equipment we deliver on your site is ready-to-work. Equipment productivity is never left to chance. United Rentals takes a number of Industry Leading steps to ensure all rental equipment performs at its' intended peak by the manufacturer. This is a dynamic and multiple step process. United Rentals' proprietary rental software tracks all owned equipment throughout its' entire life from acquisition to disposal, routes/labels equipment status, and even documents all services/PM's/annuals/and more: • An incoming driver denotes any issues noticed on first glance regarding operations, safety, cosmetics, or any damages---notifies the dispatcher/Service Department. • Off-rent equipment that is returned to our facilities are "TRIAGED" to determine if a) can simply go to any factory trained tech or b) must be marked as "hard down" assigning a specialist to handle the process from start to finish. • A trained tech is assigned throughout the process ensuring that all safety devices are intact, general service is performed, standard repairs are made at that time, fluid levels/ changes completed, and 80+ item checklist is completed to verify piece is "Rental Ready. • It's moved to "Rent Ready Status & Ready Line" in branch. • Another check is performed on the equipment at the time of rental/loading. Driver/Yard Associate verifies all safety/ operations are sound • The Driver upon delivery performs a final equipment inspection to ensure proper safe-operations exist. All of this is tracked in a sophisticated electronic system that integrates our Driver handheld units at pickup, to internal service records/scheduling for tech's, to Telematics (GPS) tracking hours to assist in service intervals, to Driver handheld units at delivery. One final manual device is a "rent ready" tag that is initialed by the tech and certifying it is ready for use During the rental, our system estimates use in addition to physical checks and inquiries for hour meter updates. Maintenance steps (requirements) for each category and class of equipment are tracked within our system based on hours, miles and days. Reporting is generated daily for inspection and scheduling purposes. Service and safety bulletins released by manufacturers are loaded centrally and tracked within this same reporting system. We will schedule with Sourcewell to do maintenance during a down time when equipment is on-rent. Customer agrees to check filters, oil, fluid levels and tire air pressure, to clean and visually inspect the equipment daily and to immediately notify United Rentals when equipment needs repair or maintenance. Should the equipment be involved in an accident, become unsafe, malfunction or require repair, customer shall immediately cease using the equipment and immediately notify United Rentals.

93	Describe procedures for repair or replacement of rental equipment that becomes inoperable during the rental period.	We strive to lead our industry in service performance, particularly when it comes to equipment maintenance and readiness for rental. United Rentals invests in our service personnel to ensure that they are up to speed on manufacturer's service requirement with internal or manufacturer sponsored training. We have also invested heavily in resources designed to make our company more efficient in maintaining our equipment to the highest standards. All 1180+ United Rentals locations use the same systems in order to ensure that Preventive Maintenance, ANSI inspections and manufacturer's service bulletins are being completed with integrity per our company procedure. Some of the specific procedures are: • Preventive maintenance: PM's are governed by the stricter of two regulatory programs: Either 1) Per manufacturer's recommendation of service requirement or; 2) Perform an inspection inside of 90 days and / or service of the equipment with 250 operating hours. The "Rental Flow" process also tracks pending PM's due for service personnel to monitor. These PM's are performed at our locations as well as at customer locations by qualified field service technicians. • ANSI inspections on aerial equipment, booms and scissors, are required by law. United Rentals has a NO-EXCEPTIONS policy related to ASNI inspections; if a unit does not receive this inspection within a year from its last date, it is taken out of rental service. • Manufacturer's service bulletins are handled as United Rentals is notified, either in our shops or in the field. United Rentals can provide a response to issues within 2 hours and a full resolution to issues within 24 hours to Sourcewell participating entities. In the unlikely event that a problem should arise, Sourcewell simply needs to contact the local branch or the 24-Hour National Account Customer Solution Center to advise them of the issue. United Rentals will then work with Sourcewell to amicably resolve the issue to the parties' mutual satisfaction. To the extent there is a problem with a piece of equipment, United Rentals will deploy one of its factory-trained technicians to perform the repair and/or supply the necessary parts. United Rentals promptly responds to repair and maintenance service calls. Our qualified staff routinely handles situations over the phone to gain instant resolution, or assist in a faster "triage" of the equipment prior to arriving on site. In the event the equipment cannot be repaired on site, United Rentals will replace the equipment as quickly as it can.
94	Explain the procedures and timelines for providing equipment to a vendor or dealer location that does not have a piece of equipment in inventory.	A request for equipment can be made through the Government Sales and Service Center – getting the requested equipment to the member will be handled on a case by case basis and members will be notified of a timeframe of availability and delivery Re-Rent Policy: Occasionally, equipment that is not in the UR network may be sourced from outside the company. This service is rare due to our fleet size and our ability to share equipment between branches In order to provide maximum responsiveness for our customers, any equipment that is re-rented will be charged a locally managed mark-up from the inter-company discounted rate and will not be subject to the pricing discount agreement with Sourcewell, but negotiated with the member prior to purchase order award.

95	Describe the extent to which your proposal includes a customer owned equipment repair program. f applicable, describe the types of repair procedures, including transportation, on-site repair, labor and parts costs, or warranty offering.	How you manage your fleet can have a big impact on driving overall worksite performance. And that's why we created a site-specific Fleet Maintenance Management Program to help you maintain-and manage-your owned equipment and site vehicles using the same systems, processes and expertise we apply every day to our more than 14+ billion dollars in fleet. From inspections and repairs to utilization tracking and strategic consulting, our experts can keep your assets ready when you are-and help you get the most from your investment in fleet. Working together, we'll build out a site-specific program that maximizes the benefits based on your site's needs. You focus on running your worksite, while we turn the challenges of managing your fleet into an efficient, hassle-free operation. Primary components of most fleet management solutions include: • Maintenance Services • Parts and Material Management • Fleet Systems • Fleet Advisory We'll station a dedicated team of our factory-trained, certified mechanics right on your site. No repair is too complex, and every repair is done with the same level of quality and expertise we use to condition our more than 690K+ unit rental fleet. f we can't service something ourselves, we'll contract the right vendors on your behalf. We will design a parts and material program to meet the immediate needs of critical and non-essential assets while balancing the requirements (and expense!) of stocked parts to that of just-in-time delivery. We have the brands you rely on for every kind of fix, from routine tune-ups to major repair. All labor pricing is included in the attached pricing spreadsheet.
