Angel,

As we discussed on the telephone today Thrive Operations acquired the assets of DSM Technology Consultants effective June 1, 2022. We continued to operate as DSM until we could complete the Novation process with GSA and complete the integration of the DSM systems into Thrive. We completed the Novation process with GSA on March 15, 2023 and our systems integration was completed on 12/1/22. Since most of our clients are government entities a number of them chose to complete the transition over to Thrive upon the start of their fiscal year (July & October). Some chose to make it effective prior to the end of their fiscal year. I have also attached of a communication that we had prepared.

Please let me know if you have any questions.

Best regards,

THRIVE

Summary

If Duval County Clerk of Courts only needs to declare a subset of VMs the price will be determined at the time of declaration. DSM declared pricing for resources (vCPU and RAM) would replace the at rest pricing for the same services upon declaration. This will then be pro-rated by the number of days the customer is failed over to DSM.

If Microsoft Software Assurance is not in place for the customer and a declaration is called the above licensing costs would be added to the declared pricing. Quantities could be changed to match users and servers required if different. Microsoft Service Provider Licensing Agreement (SPLA) would be a complete month fees as Microsoft does not pro-rate SPLA fees.

Angel,

Per DSM the State contract has been approved for 5 more years. I had DSM give me a new quote that would include an Immutable back up. See quote attached.

As stated below, I am having Mike (DSM) recheck his quote.

I'll update you as soon as I hear back from him.

Thanks,

Thanks Mike.

So, after reviewing it appears that the yearly reoccurring cost has **increased by $11,137.32** and we have a one-time cost of **$7,935.34** for the DSM Protect Hardware Immutability Implementation & the Project Management. Per our conversation I thought the yearly cost would be "around the same". Can you please double check the cost?

Also, does the State contract include the addition of the immutable back up?

Thank you,

Sheri and David,
It was good to speak with you today. As you can see below DSM will be extending the contract with GSA and are already approved.

This process starts next month, and we will share the new expiration date once completed.

David,
In the second or third week of July we will work with you to run RVtools to gather more information.

I've attached the Ransomware Health Check and a DR template that I customized with your name.

Please let me know if you need anything else. I'll check back in with you in mid July.

Nick can answer any questions you may have on the contract.

Service Contract Labor Standards: The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and / or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
