J B COXWELL CONTRACTING, INC
LOWER EASTSIDE IMPROVEMENTS
CONTRACT 6533-55

CO# 5
12/17/18

NBR	MASTER ITEM DESCRIPTION	QUANTITY	UOM	UNIT COST	NET ADDITION	NET DELETION	NET TOTAL
	UNFORESEEN CONDITIONS						
1	Force Account work performed on 8/20/18 amd 8/21/18. This work included the storm manhole modifications to Structure # 20 required for the 8' gravity sewer installation per JEA standards.	1	LS	$2,761.22	$2,761.22		
	JUSTIFICATION: This work is necessary to modify manhole # 20 due to the storm and sanitary sewer conflict and so it is less likely to collect obstructions and cause any maintenance issues in the future.						
2	Force Account work perfromed on 10/29,10/30,11/2,11/6,11/7,and 11/14. This work included standby cost for AT&T fiber optic cable that were in **direct conflict with storm drainage installation on Van Buren/7th** ← DPW pursuing reimbursement from AT+T.	1	LS	26,535.45	$26,535.45		
	JUSTIFICATION: This work became necessary to avoid any additional delays in storm drainage installation on Van Buren and 7th Streets.						
3	Duct Bank removal and disposal on 7th Street. This work included the removal of concrete encased duct bank that needed to be removed in order to install 72" storm drainage on 7th Street and force account work performed on 9/15/18.	1	LS	$71,351.69	$71,351.69		
	JUSTIFICATION: This work became necessary due to unforeseen composition of the steel reinforced duct bank and the required seperation needed between existing and newly installed utilities.						
	TOTAL UNFORESEEN CONDITIONS				$100,648.36	$0.00	
	NET TOTAL UNFORESEEN CONDITIONS						**$100,648.36**
	SUBTOTAL CHANGE ORDER # 5				$100,648.36	$0.00	
	NET TOTAL CHANGE ORDER # 5				**$100,648.36**

DEPARTMENT OF PUBLIC WORKS
Construction Engineering & Management
REQUEST FOR MODIFICATION (RFM)

PROJECT: Lower Eastside Drainage Improvements Phase III

DATE: August 21, 2018

RFM # COJ No.1

CONTRACTOR: JB Coxwell Contracting, Inc.

SPEC REF: Sidewalk Layout at Existing Power Poles

CONTRACT/P.O. #: 6533-56

DWG REF: C-25 to WS-8 (Structures S20 & SS-8)

JBCCI installed storm conflict structure S-20 and prepared to install the 8-inch sewer line through this structure an found that the invert elevation of the sewer pipe was 1.88 feet higher than plans show. Actual sewer invert is 8.7 and the plans show this invert to be 6.82. Thus, the sewer pipe would need to be sloped severely downward (1.8 feet over about 30 feet in length). This slope is well outside the JEA specifications and we have been directed b Wayne McDowell of JEA to correct this conflict to keep the existing sewer at the same slope as it is currently Based on the specific layout of the utilities in the area, a cost-effective way in managing this conflict is to modify th structure (S-20) such that the sewer pipe enters/exits this structure about 1.5 feet higher than originally engineered This would entail filling in the two existing openings and creating two new openings. It will also involve modifying the opening on sewer structure SS-8. This work would be done under a time and material basis and recorded in th field on a Force Account sheet. Moving the sewer pipe up closer to the top of this storm structure will allow th proper slope on the sewer line and get it up and out of the routine flow elevations so it's less likely to collec obstructions and cause maintenance problems. JBCCI requests approval from the COJ to modify structures S-2C and SS-8 as specified above to alleviate this conflict.

SUBJECT: Lower Eastside Drainage Improvements Phase 3
AT&T Cable conflict with Storm Drainage Installation

Dear Mr. Patel,

I have attached to this document force accounts from J.B. Coxwell (JBCCI) for standby costs for unmarked AT&T cable that were in direct conflict with storm drainage installation on Van Buren Street/E 3rd Street and on 7th Street/Milnor Street. These conflicts were discovered between 10/29/18 thru 11/14/18.

The AT&T fiber optic cables were in the direct path of the storm drainage installation and caused considerable delays and additional cost to the project because these cables were not moved prior to construction. JBCCI has been in direct communication with AT&T on numerous occasions per the Utility Work Schedule to assure relocation and protection of AT&T facilities in a timely manner.

The City wishes to resolve this matter as soon as possible and expect that AT&T will compensate the COJ for these JBCCI force accounts for storm drainage direct conflicts with AT&T cable. Your prompt response and cooperation in this matter would be appreciated.

Sincerely,

ENGLAND-THIMS & MILLER, INC.

Subject: RE: Lower Eastside - 7th Street Duct Bank Removal & Disposal
Attachments: PCO No.5A - Duct Bank Reml & Disposal.pdf

Jim,

We have completed the removal of the electrical duct bank (PCO-5A, attached) – this work was done in 2018 and I thought if we could get the final total approved, we could get this on the September invoice for the year end pay application. Based on the totals received from the field, we removed a total of 215 Linear Feet of duct bank. Based on PCO 5A, the final price is as shown below.

Mobilization -	1 each @ $7,500 =	$ 7,500
Duct bank removal 215 LF@$280/LF=		$60,200
Total		**$67,700**

Please review and let me know if you want to try and get this approved so I can add it to the last invoice of this fiscal year. If not, we can add it next month.
If you need anything else from us to help process this request, please do not hesitate to contact me.

Thank you,
Gary

RE: Lower Eastside Drainage Improvements PH 3
Contract Nos. COJ 6533-56/JEA 164267
JBCCI Project Nos. 1706/1709
Proposed Change Order No.5A – East 7th Street Duct Bank Removal & Disposal

Dear Mr. Donchez:

As requested during our last project progress meeting, J.B. Coxwell Contracting, Inc. (JBCCI) has prepared this Proposed Change Order (PCO) No.5A to remove and dispose of selected sections of the in-active concrete and steel-reinforced electrical duct bank which extends along East 7th Street.

JBCCI excavated the 875 linear feet (LF) section of duct bank such that the top and top edges were uncovered. Once the line was exposed, the locations of the top and sides were surveyed, and this information was provided to the project engineer (Hanson) such that they could identify areas where conflicts with the duct bank are suspected. On July 11, 2018, Hanson provided three plan sheets which showed four locations where conflicts are known. These four locations totaled 195 linear feet (LF) of duct bank which is within the current alignment of the proposed utilities. The estimated costs to excavate, remove and backfill the 195 LF of duct bank is presented below. If additional sections of conduit need to be removed to provide the proper separation between utilities or such that the proposed utilities can be properly installed, they will be removed at the price per foot unit cost below. Because this activity will require specialized equipment and significant mobilization costs, all re-enforced electrical conduit should be removed at one time (one mobilization). If it is determined later that additional conduit must be removed, and we have demobilized the equipment, another mobilization would be required for each time we have to return to this effort. One (1) mobilization has been included in the cost below.

Item	Estimated Cost
1) Mobilization – Equipment/Personnel	$ 7,500
2) Remove and Dispose of Duct Bank (195 LF @ $280/LF)	$ 54,600
Total	**$ 62,100**

JBCCI can initiate this scope of work within one week of receiving approval from the City of Jacksonville. We estimate that the work can be completed in 6 days. If you have any questions or want to further discuss this proposal and cost estimate, please do not hesitate to contact me or Chris Blank at (904) 786-1120 or via email at garyy@jbcoxwell.com.

Respectfully,
J. B. COXWELL CONTRACTING, INC.
