Re: Fee Proposal for Independent Drive Realignment – Early Works
Design-Build Construction Delivery for City of Jacksonville
City Contract No. 71754-22

Dear Mr. Page:

J.B. Coxwell Contracting, Inc. (JBCCI) is pleased to submit for your review and consideration the following design-build scope of services and attached lump sum fee proposal for Construction & Engineering services for the above referenced project. The general scope of this early works phase involves establishing the Maintenance of Traffic, Erosion Control, Site preparation, Demolition and Post Design Services. This proposal is based on the current plans by GAI Consultants, Inc. (GAI) that are not ten-set approved at this time.

The intent of this early works proposal is to provide services to the City of Jacksonville by commencing the project while finalizing the 100% construction Guaranteed Maximum Price (GMP) within twenty-one calendar days (21) of this proposal. This proposal is the next phase based on the original DCP.

The proposed lump sum amount for this project is $331,892.24, which includes a 15% project contingency. The project contingency is for the Design-Builder's benefit and does not cover changed field conditions, unknown field conditions or added scope of work. JBCCI will obtain a City of Jacksonville (COJ) right of way permit for this work as required. Additional fees may be required for the Design-Builder due to changed field conditions, unknown field conditions, or added scope of work. The work related to this early works package will be completed within sixty calendar days (60) from notice-to-proceed with the understanding that COJ anticipates a start date of June 5, 2023.

This lump sum amount is inclusive of only those services noted on the attached proposal(s) and which are anticipated at this time. No services or work other than those noted in the proposals are included. Additionally, any unknown condition(s) which may surface during design or any other increase in scope of services may result in a request for additional services. However, no work will proceed without first obtaining prior approval from COJ for additional services. This proposal is valid for sixty (60) days unless otherwise agreed upon.

Post design services are limited to the scope outlined in GAI's letter. This proposal assumes that the current Maintenance of Traffic plan will be approved to close the entire project worksite, utilizing the detour in the attached plans, to construct the project in one continuous phase.

JBCCI is very appreciative of the opportunity to provide you with our design-build services. Should you have any questions or need any further information, please don't hesitate to contact us. We are also available to review and discuss this proposal with you and/or others at your convenience.

Regards,
J.B. Coxwell Contracting, Inc.

The Contractor and all of his/her Subcontractors shall visit the site and become fully aware of and familiar with all existing conditions relating to this Project. The Design Build Firm shall inform itself concerning the location of existing utilities, pipelines, and structures of every type which may interfere with the work. The Design Build Firm shall prepare the proposal in full understanding of the conditions that may be encountered and the resultant responsibilities in connection therewith. All existing utilities, pipes, wires, and other structures or items which must be preserved in place shall be identified by the Design Build Firm.

SECTION 3

SCOPE OF WORK

3-1 GENERAL.

The Design Build Firm is required to submit its proposal for the design work necessary to realign Independent Drive. A Project sketch is provided in Figure 1. Insurance, indemnification, and project bonds shall be as provided in the City Contract #71754-22.

3-2 SCOPE OF PERMITTING SERVICES

The Design Build Firm is responsible for preparing a list of all permits necessary to complete the construction phase.

3-3 DESIGN PARAMETERS AND SCOPE OFSERVICES

a. To accommodate the planned Riverfront Park to the east of the Water Street / Hogan Street intersection, the alignment of Independent Drive is expected to be modified to extend due west from the roundabout at Laura Street to intersect with Hogan Street rather than follow its current southwesterly curved alignment (see Figure 1). The design of this modification will include roadway design, traffic analysis, lighting, minor landscape and hardscape, geotechnical, and survey. Pending confirmation, it is anticipated that the intersections of Water St at Hogan St and Independent Drive at Hogan St will be stop controlled; and no signalization design is expected to be required. Geotechnical effort will include three (3) roadway borings at 10 ft depth for establishment of existing pavement condition and development of pavement design for the realigned roadway.

b. Prepare MOT plans that will be implemented during construction. The MOT plans shall be coordinated, reviewed, and approved by the City Traffic Operations Section.

c. The Design Build Firm shall be solely responsible for developing an erosion and sediment control plan in compliance with City, State and Federal requirements. Refer to the NPDES as established under the 40CFR122.2.

d. Determine the traffic control requirements for the roadways after the realignment. Provide designs for traffic control devices, including pavement markings, signage, and guardrails, as required by MUTCD, FDOT, and City standards.

e. The Design Build Firm is responsible for obtaining core borings, soil sampling, surveys, and site investigations necessary to prepare the design. Determine the surveys needed to complete the project.

f. Determine the requirements to relocate any existing utilities that will be impacted by the Project.

g. The Design Build Firm shall furnish the City with four (4) sets of signed, sealed, and dated 60% plans for the Project. In addition, the Design Build Firm shall provide the City with the electronic version of all documents prepared to support the design and construction of the project, including design drawings in AutoCAD, etc.

h. The AutoCAD files shall comply with the following requirements: (1) All drawings shall be 100% AutoCAD files, 2012 Version or newer; (2) Use standard AIA layer system; (3) All AutoCAD files shall be transferred to CD by "E-transmit" command; (4) Use standard AutoCAD fonts/text files only, no third party application; (5) Title blocks and logos to be compatible with Items 1-4, use the City of Jacksonville title block; (6) The "z" coordinate shall be set to zero in all cases; and (7) All drawings shall be 11" x 17" (full scale).

SECTION 4

SUBMITTAL OF TP AND GMP

4-1 GENERAL

The Design Build Firm shall submit three (3) sets of its proposal consisting of the following elements:

a. TP as defined in Sections 1 thru 3 of this DCP and in City Contract #71754-22.

b. Separate Cost of the Work consisting of the cost as defined in City Contract #71754-22.

c. Proposed Design Build Firm's Contingency as provided in City Contract #71754-22.

d. Proposed Design Build Firm's Fees as provided in City Contract #71754-22.

e. A statement of additional services.

f. The time limit for acceptance of the GMP Proposal.

END OF THE DESIGN CRITERIA PACKAGE.

EROSION AND SEDIMENTATION CONTROL NOTES

1. THE CONTRACTOR MUST IMPLEMENT AND MAINTAIN ALL EROSION AND SEDIMENT CONTROL MEASURES REQUIRED TO RETAIN SEDIMENT ON-SITE AND TO PREVENT VIOLATIONS OF THE WATER QUALITY CRITERIA AND STANDARDS IN CHAPTERS 62-4 AND 62-302 F.A.C. ALL EROSION/SEDIMENT CONTROL PRACTICES MUST BE IN ACCORDANCE WITH THE GUIDELINES AND SPECIFICATIONS IN SECTION 6 OF THE FLORIDA LAND DEVELOPMENT MANUAL - A GUIDE TO SOUND LAND AND WATER MANAGEMENT (FLORIDA DEPARTMENT OF ENVIRONMENTAL REGULATION 1988) AS WELL AS THE CITY OF JACKSONVILLE STANDARDS UNLESS A PROJECT-SPECIFIC EROSION AND SEDIMENT CONTROL PLAN IS APPROVED BY THE WATER MANAGEMENT DISTRICT IN WHICH CASE THE PRACTICES MUST BE IN ACCORDANCE WITH THE PLAN IF SITE SPECIFIC CONDITIONS REQUIRE ADDITIONAL MEASURES DURING ANY PHASE OF CONSTRUCTION OR OPERATION TO PREVENT EROSION OR CONTROL SEDIMENT THE CONTRACTOR MUST IMPLEMENT THE NECESSARY ADDITIONAL EROSION AND SEDIMENT CONTROL MEASURES

2. STABILIZATION MEASURES SHALL BE INITIATED FOR EROSION AND SEDIMENT CONTROL ON DISTURBED AREAS AS SOON AS PRACTICABLE IN PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITIES HAVE TEMPORARILY OR PERMANENTLY CEASED BUT IN NO CASE MORE THAN 14 DAYS AFTER THE CONSTRUCTION ACTIVITY IN THAT PORTION OF THE SITE HAS TEMPORARILY OR PERMANENTLY CEASED

3. THE LOCATION AND TYPE OF THE EROSION CONTROL MEASURES SHOWN ON THESE DRAWINGS ARE PROVIDED FOR GENERAL GUIDANCE TO THE CONTRACTOR. THE METHODS AND SEQUENCING OF CONSTRUCTION EMPLOYED BY THE CONTRACTOR MAY REQUIRE MORE OR LESS EROSION CONTROL MEASURES THAN THAT DEPICTED TO MAINTAIN ADEQUATE EROSION AND SEDIMENT CONTROL FOR THE CONSTRUCTION ACTIVITIES

4. EROSION TURBIDITY BARRIERS MUST BE INSTALLED AT ALL LOCATIONS WHERE THE POSSIBILITY OF TRANSFERRING SEDIMENT OR SUSPENDED SOLIDS TO ADJACENT PROPERTIES, JURISDICTIONAL WETLANDS AND/OR RECEIVING WATER BODIES EXISTS DUE TO THE PROPOSED WORK. TURBIDITY BARRIERS MUST REMAIN IN PLACE AT ALL LOCATIONS UNTIL CONSTRUCTION IS COMPLETED AND SOILS ARE STABILIZED AND VEGETATION HAS BEEN ESTABLISHED. THEREAFTER THE CONTRACTOR WILL BE RESPONSIBLE FOR THE REMOVAL OF THE BARRIERS. THE CONTRACTOR SHALL MAINTAIN THE EROSION/TURBIDITY CONTROL BARRIERS DAILY. THE CONTRACTOR IS TOTALLY RESPONSIBLE FOR PROVIDING THE NECESSARY EROSION/TURBIDITY CONTROL FOR THIS PROJECT. 8. THE CONTRACTOR WILL BE RESPONSIBLE FOR VERIFYING VERTICALLY AND HORIZONTALLY (VVH) EXISTING UTILITIES PRIOR TO EXCAVATIONS AND/OR BORES AT THE DIRECTION OF THE ENGINEER. THIS SHOULD BE PERFORMED USING VACUUM EXCAVATION OR COMPARABLE NON-DESTRUCTIVE EQUIPMENT. ALL RIGHTS-OF-WAY SHALL BE RESTORED TO THE CONDITION WHICH EXISTED PRIOR TO THE BORE. THIS WILL BE INCLUDED IN THE COST OF THE BORE.
9. EXISTING UTILITIES ARE TO REMAIN IN PLACE UNLESS OTHERWISE NOTED

TEMPORARY OVERHEAD POWER SERVICE WIRE MAY BE USED WHERE UNDERGROUND SERVICE IS INTERRUPTED. PROVIDE ANY NEW POLES NECESSARY TO MINIMIZE SERVICE WIRE SAG. THE CONTRACTOR MAY ELECT TO PROVIDE NEW TEMPORARY LIGHTING WHEN THE ROADWAY CONSTRUCTION AFFECTS THE EXISTING LIGHTING. EXISTING ILLUMINATION LEVELS SHALL BE MAINTAINED BY THE ELECTRICAL CONTRACTOR DURING ALL PHASES OF CONSTRUCTION. PORTABLE GENERATOR-OPERATED LIGHTS ARE NOT ACCEPTABLE FOR USE AS TEMPORARY LIGHTING
15. CONTRACTOR MAY FIELD ADJUST LIGHT POLES WITHIN A 2 FT. RADIUS OF PLAN LOCATIONS TO MINIMIZE AND AVOID UTILITY CONFLICTS. PULLBOXES ARE SHOWN FOR DIAGRAMMATIC PURPOSES ONLY AND MAY BE FIELD ADJUSTED AS NEEDED

GENERAL NOTES:

1. Cross Slopes and Grades

   A. Sidewalk, ramp, and landing slopes (i.e. 0.02, 0.05, and 1:12) shown in this index are maximums. With approval of the Engineer, provide the minimum feasible slope where the requirements cannot be met.

   B. Landings must have cross-slopes less than or equal to 0.02 in any direction.

   C. Maintain a single longitudinal slope along each side of the curb ramp. Ramp slopes are not required to exceed 15 feet in length.

   D. Joints permitted at the location of Slope Breaks. Otherwise locate joints in accordance with Index 522-001. No joints are permitted within the ramp portion of the Curb Ramp.

2. Curb, Curb and Gutter and/or Sidewalk

   A. Refer to Index 522-001 for concrete thickness and sidewalk details.

   B. Remove any existing curb, curb and gutter, or sidewalk to the nearest joint beyond the curb transition or to the extent that no remaining section is less than 5 feet long.

   C. Width of Curb Ramp is 4'-0" minimum. Match Sidewalk or Shared Use Path width as shown in the Plans.

3. Curb Ramp Alpha-Identification

   A. Sidewalk curb ramp alpha-identifications (e.g. CR-A) are provided for reference purposes in the Plans.

   B. Alpha-identifications CR-I and CR-J are intentionally omitted.

4. Detectable Warnings

   A. Install detectable warnings in accordance with Specification 527.

   B. Place detectable warnings across the full width of the ramp or landing, to a minimum depth of 2 feet measured perpendicular to the curb line and no greater than 5 feet from the back of the curb or edge of pavement.

   C. If detectable warnings are shown in the Plans on slopes greater than 5%, align the truncated domes with the centerline of the ramp, otherwise, the truncated domes are not required to be aligned.
