BID# CF-0164-16 OPEN DATE: **2016-09-21**

GENERAL GOVERNMENT AWARDS COMMITTEE

KIND AND BASIS OF CONTRACT:
CONSTRUCTION FIXED

AGENCY: **MUNICIPAL CODE**

BASIS OF AWARD: **BY ITEM TO THE LOWEST RESPONSIVE, RESPONSIBLE BIDDER**

NUMBER OF BIDS INVITED 6 NUMBER RECEIVED 3 OTHER 0

SUMMARY OF BIDS AND RECOMMENDED ACTIONS:

Item #34 was awarded to Michael Lloyd Hauling on 10/13/16 in the amount of $5,675.00 which included $275.00 cost of asbestos survey as required by the bid specifications. The performed asbestos survey requires a wet demolition be performed prior to demolition.

Recommend approval to increase award for Item #34 to Michael Lloyd Hauling as the lowest responsive, responsible bidder in the amount of $1,000.00 for the wet demolition. Revised total award amount for Item #34 not-to-exceed $6,675.00.

This award to be funded by account: ERCD1N1FR-03410 to be executed by Purchase Order/Change Order.

RE: Change Order Request for Item #34 on Formal Demolition Bid #CF-0164-16

The asbestos survey of 1411 W 9th St revealed the asbestos content in the chimney mastic which requires wet demolition of the structure.

I recommend approval of the change order request submitted by Michael Lloyd Hauling in the amount of $1,000.00 (reference purchase order #7A03122).

Reference: Two (2) Single Story Structures – Asbestos Demolition Survey – House & Shed
1411 West 9th Street
Jacksonville, Florida – JON 5848

Dear Mr. Llyod:

Pursuant to your request an Asbestos Demolition Survey has been performed at the above location for the purpose of identifying asbestos that needs to be removed prior to the planned demolition of the structures. The purpose of the investigation was to visually identify homogenous materials that need to have bulk samples obtained for analysis to determine the presence of Asbestos Containing Building Materials with in the structures. The scope of this survey was limited to the referenced two (2) single story structures in Jacksonville, Florida. The buildings were inspected for demolition. The facility has two single story structures for demolition, which are constructed with concrete, wood, drywall, plaster, sheet flooring, texture paint, chimney mastic, steel and aluminum. There were seven (7) suspected materials that were sampled for Polarized Light Microscopy (PLM) analysis. Based on the visual inspection, it was evident that National Emission Standard for Hazardous Air Pollutants (NESHAP) 40 CFR Part 61 regulated Asbestos Material was found to be present at the facility. The scope of work for this survey included sampling and analysis of suspect homogenous building materials. The asbestos demolition inspection process was initiated on January 18, 2017. Materials must contain greater than 1% asbestos to be regulated. The following recommendations are provided for the material that was found to contain Asbestos Fibers within the referenced structure.

RECOMMENDATIONS

Recommended response actions have been selected for all Asbestos Containing Materials identified by this survey within the facility. Recommendations for response actions, where arrived at, are stated as follows:

FRIABLE ASBESTOS CONTAINING MATERIALS

Friable Asbestos Material means any material containing more than one (1%) percent asbestos, that when dry can be crumbled, pulverized or reduced to powder by hand pressure.

(904) 665-0100 (904) 612-1456 • MOBILE (904) 665-0101 • FAX

Friable Asbestos Material was found in the following area:

None.

The above material is considered friable and must be removed by a Certified Florida Asbestos Abatement Contractor prior to any disturbance caused by renovation or demolition of the referenced structure.

CATEGORY I, NON-FRIABLE ASBESTOS MATERIAL

HM-5 Chimney Mastic – Black [5% Chrysotile Asbestos]

CATEGORY II, NON-FRIABLE ASBESTOS MATERIAL

None.

NONREGULATED BY NESHAP; REGULATED BY OSHA

None.

The preceding materials are considered a Category I or II Non-Friable Material and therefore, under normal circumstances, the Category I material does not need not be removed prior to demolition, because generally these materials do not release significant amounts of Asbestos Fibers, even when damaged.

Category I material must be kept wet to prevent the release of fibers during demolition. The Category I asbestos waste must be placed in a permitted asbestos landfill in accordance with FDEP regulations. Friable asbestos and Category II material must be removed prior to demolition or renovation of the structure. Yet, in the event removal is deemed necessary as a part of renovation all Asbestos Containing Material should be removed by a Florida Licensed Asbestos Contractor. The building materials identified in this asbestos renovation survey were in good condition to significantly damaged at the time of the inspection. The material condition can change over time and will degrade with exposure to water, air movement, physical damage, weather and chemical exposure.

The structure has an address of, 1411 West 9th Street, Jacksonville, Florida. The facility was at one time a house and shed. The facility has two single story structures for demolition.

When implementing the response actions, parties responsible for final selection should remember that actions shall be sufficient to protect HUMAN HEALTH AND THE ENVIRONMENT, but may also be the least burdensome method. Nothing in these recommendations should be construed as PROHIBITING or discouraging removal.

All parties shall comply with all applicable laws, ordinances, rules and regulations of Federal, State and Local Governments and Agencies relating to or affecting the proposed work in whole or in part when implementing any response action associated with the facility.

The following samples are recommended to be further analyzed by the point count method using a positive stop approach.

None.

This asbestos survey shall not be used as a design or specification for the removal of asbestos within the referenced structures.

RECOMMENDATIONS FOR ASBESTOS ABATEMENT: (1411 West 9th Street, Jacksonville, Florida)

The HM-5 asbestos material should be wet demolished or should be removed by an asbestos abatement contractor keeping in mind that the most economical method or least burdensome method can be used. This material is regulated by the Occupational Safety and Health Administration (OSHA) Construction Standard for Asbestos found in Title 29 Code of Federal Regulations (CFR) Part 1926.1101 and by the National Emission Standards for Hazardous Air Pollutants (NESHAP) Title 40 CFR Part 61.145.

It has been a pleasure working with you and I look forward to working with you once again in the future. I can be reached at (904) 665-0100 or mobile (904) 612-1456 if you should have any questions.

Respectfully submitted,

1/26/2017
