**One City. One Jacksonville.**

# ARE YOU ALL IN?

Each one of us plays a role in improving the safety of Jacksonville's roadways - from bicyclists and pedestrians to motorcyclists and drivers. **Roadway safety is a team effort!** Help make every street in Jacksonville a safe place to walk, ride or drive by following these safety tips:

- ✓ **Devices down. Heads up.** Minimize all distractions when traveling on roadways. Your life matters most.
- ✓ **One click does the trick.** Always wear your seatbelt. No excuses.
- ✓ **When in doubt, wait it out.** Never proceed if you are uncertain a driver sees you. Make eye contact.
- ✓ **Go the distance to save your life.** Only cross the street at a corner or crosswalk. Every time.
- ✓ **Use your head.** Always wear a helmet when riding a bicycle or motorcycle.
- ✓ **Be Seen.** Walk or jog facing traffic. Wear bright or reflective clothing.
- ✓ **Every corner is a crosswalk.** Drivers should slow down and yield to pedestrians at every intersection, whether it's a marked or unmarked crosswalk.
- ✓ **Go with the flow.** If you're riding your bike on the street, ride on the right side with the flow of traffic and use hand signals when turning.
- ✓ **Share the road and stay alert!** Drivers should pass bicyclists with at least 3 feet passing distance—it's the law.
- ✓ **Be bright, use lights.** When riding bikes at dusk, dawn or in the evening, be bright and use lights - and make sure your bike has reflectors, as well.
- ✓ **Follow the rules.** State law says bicycles riding on the street should obey the same rules as motor vehicles, and those on the sidewalk should obey the same rules as pedestrians.
