The City of Jacksonville has two separate laws that provide protection for certain trees and require mitigation for damage or removal of certain trees caused by the process of land development. Mitigation is required either through planting or replanting of a calculated amount of mitigation trees or through making a specified payment into the Tree Protection and Related Expenses Trust Fund codified by Sec. 111.760, Ordinance Code. These laws are Article 25 of the Charter of the City of Jacksonville and Chapter 656, Part 12, Subparts A & B of the Ordinance Code. Each provision has specific criteria for what is characterized as a "protected tree" and thus would require replacing through the development process of a site, or if a replacement is not made, how the "mitigation fee" is calculated for removal of trees without replacement. The mitigation fee that is paid by developers who are unable to replace the trees destroyed during construction, as required by both provisions, is placed in the Tree Protection and Related Expenses Trust Fund. Moreover, funds received from application of the Charter are held in Fund 15305 and funds received from application of the Ordinance Code are held in the Fund 15304.

**Prepared 3/2/23 LD**

The City of Jacksonville has two separate laws that provide protection for certain trees and require mitigation for damage or removal of certain trees caused by the process of land development. Mitigation is required either through planting or replanting of a calculated amount of mitigation trees or through making a specified payment into the Tree Protection and Related Expenses Trust Fund codified by Sec. 111.760, Ordinance Code. These laws are Article 25 of the Charter of the City of Jacksonville and Chapter 656, Part 12, Subparts A & B of the Ordinance Code. Each provision has specific criteria for what is characterized as a "protected tree" and thus would require replacing through the development process of a site, or if a replacement is not made, how the "mitigation fee" is calculated for removal of trees without replacement. The mitigation fee that is paid by developers who are unable to replace the trees destroyed during construction, as required by both provisions, is placed in the Tree Protection and Related Expenses Trust Fund. Moreover, funds received from application of the Charter are held in Fund 15305 and funds received from application of the Ordinance Code are held in the Fund 15304.

  - c) Proposed Level 2 Project(s)
    - i. Price Park HOA Tree Planting Project (Attachment A) – Justin Gearhart

1. Presentation – This is in District 6 and is a smaller project. It was initially submitted as 630-CITY requests but was changed to level 2 because of the various locations of the requests.
  2. Public Comment – Mr. Long pointed out this neighborhood is 2-3 years old; trees should have been included in the original design when it was built. It's a shame we are planting trees in a brand-new neighborhood. Mr. Gearhart agreed; the HOA board was surprised as well. Mr. Hart pointed out that the City should have said, when the plans were presented, where trees should be planted. Ms. Fraser wondered if the Ordinance allowed for the Tree Mitigation money to provide trees at the time the developer is planting them? Mr. Arpen asked if the spacing between the trees could be added. Mr. Gearhart agreed it would be added to the description.
  3. Vote – Mr. Hart made a motion to approve the project, seconded by Ms. Fraser, none opposed, motion carried.
- ii. Amelia View Phase 2 Tree Planting Project (Attachment B) – Justin Gearhart
1. Presentation – There was a previous project which was quite successful. The HOA requested additional trees.
  2. Public Comment –
  3. Vote – Mr. Hart made a motion to approve the project, seconded by Mr. Long, none opposed, motion carried.
- iii. Northwest Parks Tree Planting Project (Attachment C) – Kathleen McGovern
1. Presentation – This project is 15 parks on the northwest side of town. These projects were requested from various entities, residential requests, Duval Soil & Water Conservation, Council Member Requests, Northshore Association and multiple requests from the Parks Department Director.
    - i. Most of the requests involved providing more shade but we also had an issue we were trying to address to define the perimeters of the parks to deter people from driving into them. We used larger trees to give a substantial border to illustrate this is for pedestrians, not vehicles.
    - ii. Ms. Fraser pointed out that when Gold Star Highway project was done, the Commission took the position that 3" trees would be the standard. Most of the trees on this project are 4". We need to be consistent in what the policy is; is it our position as the Tree Commission that the standard is 3" and then next year it's a 4" and that's an investment we want to make and if there is an outstanding reason for a larger tree we'll consider it. Mr. Hart added we have always set the 3" parameters but Ms. McGovern has given the reason for the 4" trees to block noise, etc. Ms. Fraser pointed out that many of those trees are not perimeter trees.
    - iii. Ms. McGovern replied that recently we have done projects in Hannah Park and Northbank Riverwalk and used 4" trees. In my experience, the survivability of the tree is based more on the quality of the tree planted, whether it's been hardened off and the care it receives after planting. The contracts require these things as well as the tree be Florida Fancy. Ms. Fraser responded that it's not the survivability of the tree which is in question, a warranty on a 4"

tree is more than the warranty on a 3" tree, if a 3" tree is planted it will also survive given all the care it is given and the cost of a 3" tree is less than in a year we get the growth. It's more about the investment, the 3" is our position, outside some extraordinary explanation, perimeter explanation that larger is not an investment we need to make. Ms. McGovern suggested not limiting the tree selection, leave it to the Arborist who is designing the project.

- iv. Mr. Long agreed we should get as much bang for our buck as we can, so as many trees as we can get planted. When it makes sense in the Arborists' opinion, we should rely on their expertise for the size of the tree. Yes they provide shade but they are also helping change the areas where these trees will make a huge difference. We want to get as much for our money as we can but when you give us a good explanation of why we should use that larger tree, we should rely on the expertise.
2. Public Comment – Mr. Zaffaroni added it would be a mistake to have a blanket number for new tree caliper. There are tree species which have a large difference between the sizes, in addition availability can be an issue. While it's a good idea to have a standard or preference, the site, the overall cost and what the goal is are all criteria to be considered.
3. Vote – Mr. Hart made a motion to approve the project, seconded by Mr. Long, none opposed, motion carried.

## 5. Old Business

- a) Strategic Planning Subcommittees (Attachment G) - Commissioners please select a subcommittee to be chair of and make your selection known to Ms. Chism
  - i. Urban Forestry Master Plan (Strategy #3) – Susan Fraser
    1. There was a very robust discussion at the first meeting. Some ideas and a consensus was discussed to determine what the Urban Forestry Master Plan would do for the City should we get it funded and implemented. The next meeting is Thursday, April 20<sup>th</sup>. This committee will determine a scope of work for an Urban Forestry Master Plan, both what's typical in the industry and does Jacksonville need all those components, or other components.
    - ii. Commission's Planting Priorities (Strategy #5) – This subcommittee has not been selected.
    - iii. Landscape Ordinance Review (Strategy #9) – Susan Grandin/Curtis Hart
      1. A meeting will be scheduled between Ms. Grandin and Mr. Hart to review how far along the revisions have come.
  - b) Commission's Palm Tree Ordinance Revision – Susan Grandin
    - i. Ms. Grandin will continue the revisions.

## 6. New Business

- a) CM Becton Legislation – Susan Grandin
  - i. When the landscape ordinance was written, there was a set way to handle violations with no reductions possible. When someone removes a tree and honestly didn't know a permit was required, or the mitigation amount for the trees removed is more than the property is worth, there is no avenue for the City to work with the person to reduce the fine without the threat of a lawsuit.

- ii. What the legislation is proposing is to create that process. Ms. Cavin, Chief of Development Service, has designed a matrix to determine if a reduction in fine is warranted. There are subjective criteria and objective criteria. If the person being fined is unhappy with the amount of the reduction, if any, they can appeal the decision to the Tree Commission.
- iii. CM Salem voiced his concern about possible abuse by claiming ignorance.
- iv. Ms. Cavin went over the matrix which is meant to be reasonable guidelines to reduce a fine in the case where the fine is more than the property is worth. There are some safeguards to keep what CM Salem is afraid of from happening. The fine reduction cannot be 100%, the maximum is 90%.
- v. Ms. Fraser asked about #3 on the matrix, the amounts of numbers are unrealistic. Ms. Cavin said the numbers could be revised.
- vi. Ms. Grandin suggested weighting the matrix, e.g., the person must pass the first gauntlet before they can move on to the rest.
- vii. Mr. Long pointed out the Tree Commission would only change the ruling if something was “clearly erroneous.”
- viii. Mr. Arpen asked what happens if the property owner or contractor will not pay? Ms. Cavin said they have property lockdowns and cannot pull any permits. Ms. Grandin suggested taking them to court. Mr. Arpen pointed out that property lockdowns and not pulling any permits is not a deterrent.
- ix. Mr. Hart made a motion for the Tree Commission to be the quasi-legal body to hear appeals seconded by Mr. Long, none opposed, motion passed.

**Reports:**

- b) Fund balance and encumbrance report for 15(F) (Ordinance Tree Fund), 15(N) (Charter Tree Fund) and BJP (Attachment D) – Jose Regueiro
  - i. Ms. Fraser pointed out in same tab, there is a spreadsheet which Lee Dupree provided in a separate meeting. Does this provide the information we want and is it a form we would like to continue to receive.
  - ii. Mr. Hart suggested it be labeled. Ms. Fraser suggested Mr. Regueiro runs his report and sends it to Mr. Dupree to complete his spreadsheet. Ms. Powell suggested another meeting with Mr. Dupree and Mr. Regueiro. Ms. Fraser suggested everyone review the financial reports and be prepared to give an opinion at the next meeting. Mr. Hart suggested keeping all the reports.
- c) Fund Status of 630-CITY, Remove & Replace and Level 2 Programs (Attachment E) – Justin Gearhart
  - i. Ms. Grandin asked what the N/A designation was on the spreadsheet. Mr. Gearhart replied, that indicates further documentation is necessary, either purchase orders have not yet been generated or in the case of Wolfson High School and contract is still required.
  - ii. Mr. Regueiro suggested Mr. Gearhart wait 1 week after the first to “pull the numbers.”
- d) Status of Pending Level 2 Tree Projects (Attachment F) – Justin Gearhart
- e) Parks Department Project Update – Kathleen McGovern/Jill Enz

- i. Ms. Enz reported the Special Committee on Parks has set aside approximately \$20M to add more shade to playgrounds. There will probably be more tree planting projects coming before the Commission.
- ii. The new 1-year warranty contract has been awarded. We are awaiting purchase orders to be issued to start District 5 and District 7 tree planting projects.

**7. Public Comment**

- a) Ms. Chism will email the spreadsheet with the Commissioner's term dates.
- b) Mr. November said he had spoken with Larry Figart about joining the Tree Commission. Mr. Figart declined becoming a Commissioner but did say he would like to help in other ways.

**8. Adjournment** – the next Tree Commission meeting is scheduled for Wednesday, May 17, 2023, at 9:30am and will be a Hybrid/Zoom meeting in Ed Ball Building, 10<sup>th</sup> Floor, Public Works Office, conference room 5.

Prepared 3/2/23 LD

The City of Jacksonville has two separate laws that provide protection for certain trees and require mitigation for damage or removal of certain trees caused by the process of land development. Mitigation is required either through planting or replanting of a calculated amount of mitigation trees or through making a specified payment into the Tree Protection and Related Expenses Trust Fund codified by Sec. 111.760, Ordinance Code. These laws are Article 25 of the Charter of the City of Jacksonville and Chapter 656, Part 12, Subparts A & B of the Ordinance Code. Each provision has specific criteria for what is characterized as a "protected tree" and thus would require replacing through the development process of a site, or if a replacement is not made, how the "mitigation fee" is calculated for removal of trees without replacement. The mitigation fee that is paid by developers who are unable to replace the trees destroyed during construction, as required by both provisions, is placed in the Tree Protection and Related Expenses Trust Fund. Moreover, funds received from application of the Charter are held in Fund 15305 and funds received from application of the Ordinance Code are held in the Fund 15304.

  - b) Approval of Urban Forestry Master Plan Meeting Minutes from March 16, 2023 meeting – Chair
    - i. Motion made by Ms. Fraser, seconded by Mr. Hart to approve the minutes, none opposed, motion passed.
  - c) Proposed Level 2 Project(s)
    - i. Price Park HOA Tree Planting Project (Attachment A) – Justin Gearhart

1. Presentation – This is in District 6 and is a smaller project. It was initially submitted as 630-CITY requests but was changed to level 2 because of the various locations of the requests.
  2. Public Comment – Mr. Long pointed out this neighborhood is 2-3 years old; trees should have been included in the original design when it was built. It's a shame we are planting trees in a brand-new neighborhood. Mr. Gearhart agreed; the HOA board was surprised as well. Mr. Hart pointed out that the City should have said, when the plans were presented, where trees should be planted. Ms. Fraser wondered if the Ordinance allowed for the Tree Mitigation money to provide trees at the time the developer is planting them? Mr. Arpen asked if the spacing between the trees could be added. Mr. Gearhart agreed it would be added to the description.
  3. Vote – Mr. Hart made a motion to approve the project, seconded by Ms. Fraser, none opposed, motion carried.
- ii. Amelia View Phase 2 Tree Planting Project (Attachment B) – Justin Gearhart
1. Presentation – There was a previous project which was quite successful. The HOA requested additional trees.
  2. Public Comment –
  3. Vote – Mr. Hart made a motion to approve the project, seconded by Mr. Long, none opposed, motion carried.
- iii. Northwest Parks Tree Planting Project (Attachment C) – Kathleen McGovern
1. Presentation – This project is 15 parks on the northwest side of town. These projects were requested from various entities, residential requests, Duval Soil & Water Conservation, Council Member Requests, Northshore Association and multiple requests from the Parks Department Director.
    - i. Most of the requests involved providing more shade but we also had an issue we were trying to address to define the perimeters of the parks to deter people from driving into them. We used larger trees to give a substantial border to illustrate this is for pedestrians, not vehicles.
    - ii. Ms. Fraser pointed out that when Gold Star Highway project was done, the Commission took the position that 3" trees would be the standard. Most of the trees on this project are 4". We need to be consistent in what the policy is; is it our position as the Tree Commission that the standard is 3" and then next year it's a 4" and that's an investment we want to make and if there is an outstanding reason for a larger tree we'll consider it. Mr. Hart added we have always set the 3" parameters but Ms. McGovern has given the reason for the 4" trees to block noise, etc. Ms. Fraser pointed out that many of those trees are not perimeter trees.
    - iii. Ms. McGovern replied that recently we have done projects in Hannah Park and Northbank Riverwalk and used 4" trees. In my experience, the survivability of the tree is based more on the quality of the tree planted, whether it's been hardened off and the care it receives after planting. The contracts require these things as well as the tree be Florida Fancy. Ms. Fraser responded that it's not the survivability of the tree which is in question, a warranty on a 4"

tree is more than the warranty on a 3" tree, if a 3" tree is planted it will also survive given all the care it is given and the cost of a 3" tree is less than in a year we get the growth. It's more about the investment, the 3" is our position, outside some extraordinary explanation, perimeter explanation that larger is not an investment we need to make. Ms. McGovern suggested not limiting the tree selection, leave it to the Arborist who is designing the project.

- iv. Mr. Long agreed we should get as much bang for our buck as we can, so as many trees as we can get planted. When it makes sense in the Arborists' opinion, we should rely on their expertise for the size of the tree. Yes they provide shade but they are also helping change the areas where these trees will make a huge difference. We want to get as much for our money as we can but when you give us a good explanation of why we should use that larger tree, we should rely on the expertise.
2. Public Comment – Mr. Zaffaroni added it would be a mistake to have a blanket number for new tree caliper. There are tree species which have a large difference between the sizes, in addition availability can be an issue. While it's a good idea to have a standard or preference, the site, the overall cost and what the goal is are all criteria to be considered.
3. Vote – Mr. Hart made a motion to approve the project, seconded by Mr. Long, none opposed, motion carried.

## 5. Old Business

- a) Strategic Planning Subcommittees (Attachment G) - Commissioners please select a subcommittee to be chair of and make your selection known to Ms. Chism
  - i. Urban Forestry Master Plan (Strategy #3) – Susan Fraser
    1. There was a very robust discussion at the first meeting. Some ideas and a consensus was discussed to determine what the Urban Forestry Master Plan would do for the City should we get it funded and implemented. The next meeting is Thursday, April 20<sup>th</sup>. This committee will determine a scope of work for an Urban Forestry Master Plan, both what's typical in the industry and does Jacksonville need all those components, or other components.
    - ii. Commission's Planting Priorities (Strategy #5) – This subcommittee has not been selected.
    - iii. Landscape Ordinance Review (Strategy #9) – Susan Grandin/Curtis Hart
      1. A meeting will be scheduled between Ms. Grandin and Mr. Hart to review how far along the revisions have come.
  - b) Commission's Palm Tree Ordinance Revision – Susan Grandin
    - i. Ms. Grandin will continue the revisions.

## 6. New Business

- a) CM Becton Legislation – Susan Grandin
  - i. When the landscape ordinance was written, there was a set way to handle violations with no reductions possible. When someone removes a tree and honestly didn't know a permit was required, or the mitigation amount for the trees removed is more than the property is worth, there is no avenue for the City to work with the person to reduce the fine without the threat of a lawsuit.

- ii. What the legislation is proposing is to create that process. Ms. Cavin, Chief of Development Service, has designed a matrix to determine if a reduction in fine is warranted. There are subjective criteria and objective criteria. If the person being fined is unhappy with the amount of the reduction, if any, they can appeal the decision to the Tree Commission.
- iii. CM Salem voiced his concern about possible abuse by claiming ignorance.
- iv. Ms. Cavin went over the matrix which is meant to be reasonable guidelines to reduce a fine in the case where the fine is more than the property is worth. There are some safeguards to keep what CM Salem is afraid of from happening. The fine reduction cannot be 100%, the maximum is 90%.
- v. Ms. Fraser asked about #3 on the matrix, the amounts of numbers are unrealistic. Ms. Cavin said the numbers could be revised.
- vi. Ms. Grandin suggested weighting the matrix, e.g., the person must pass the first gauntlet before they can move on to the rest.
- vii. Mr. Long pointed out the Tree Commission would only change the ruling if something was “clearly erroneous.”
- viii. Mr. Arpen asked what happens if the property owner or contractor will not pay? Ms. Cavin said they have property lockdowns and cannot pull any permits. Ms. Grandin suggested taking them to court. Mr. Arpen pointed out that property lockdowns and not pulling any permits is not a deterrent.
- ix. Mr. Hart made a motion for the Tree Commission to be the quasi-legal body to hear appeals seconded by Mr. Long, none opposed, motion passed.

**Reports:**

- b) Fund balance and encumbrance report for 15(F) (Ordinance Tree Fund), 15(N) (Charter Tree Fund) and BJP (Attachment D) – Jose Regueiro
  - i. Ms. Fraser pointed out in same tab, there is a spreadsheet which Lee Dupree provided in a separate meeting. Does this provide the information we want and is it a form we would like to continue to receive.
  - ii. Mr. Hart suggested it be labeled. Ms. Fraser suggested Mr. Regueiro runs his report and sends it to Mr. Dupree to complete his spreadsheet. Ms. Powell suggested another meeting with Mr. Dupree and Mr. Regueiro. Ms. Fraser suggested everyone review the financial reports and be prepared to give an opinion at the next meeting. Mr. Hart suggested keeping all the reports.
- c) Fund Status of 630-CITY, Remove & Replace and Level 2 Programs (Attachment E) – Justin Gearhart
  - i. Ms. Grandin asked what the N/A designation was on the spreadsheet. Mr. Gearhart replied, that indicates further documentation is necessary, either purchase orders have not yet been generated or in the case of Wolfson High School and contract is still required.
  - ii. Mr. Regueiro suggested Mr. Gearhart wait 1 week after the first to “pull the numbers.”
- d) Status of Pending Level 2 Tree Projects (Attachment F) – Justin Gearhart
- e) Parks Department Project Update – Kathleen McGovern/Jill Enz

- i. Ms. Enz reported the Special Committee on Parks has set aside approximately \$20M to add more shade to playgrounds. There will probably be more tree planting projects coming before the Commission.
- ii. The new 1-year warranty contract has been awarded. We are awaiting purchase orders to be issued to start District 5 and District 7 tree planting projects.

**7. Public Comment**

- a) Ms. Chism will email the spreadsheet with the Commissioner's term dates.
- b) Mr. November said he had spoken with Larry Figart about joining the Tree Commission. Mr. Figart declined becoming a Commissioner but did say he would like to help in other ways.

**8. Adjournment** – the next Tree Commission meeting is scheduled for Wednesday, May 17, 2023, at 9:30am and will be a Hybrid/Zoom meeting in Ed Ball Building, 10<sup>th</sup> Floor, Public Works Office, conference room 5.

The City of Jacksonville has two separate laws that provide protection for certain trees and require mitigation for damage or removal of certain trees caused by the process of land development. Mitigation is required either through planting or replanting of a calculated amount of mitigation trees or through making a specified payment into the Tree Protection and Related Expenses Trust Fund codified by Sec. 111.760, Ordinance Code. These laws are Article 25 of the Charter of the City of Jacksonville and Chapter 656, Part 12, Subparts A & B of the Ordinance Code. Each provision has specific criteria for what is characterized as a "protected tree" and thus would require replacing through the development process of a site, or if a replacement is not made, how the "mitigation fee" is calculated for removal of trees without replacement. The mitigation fee that is paid by developers who are unable to replace the trees destroyed during construction, as required by both provisions, is placed in the Tree Protection and Related Expenses Trust Fund. Moreover, funds received from application of the Charter are held in Fund 15305 and funds received from application of the Ordinance Code are held in the Fund 15304.
